Dr. P.K. Chakrabarty, ADG (PP&B), ICAR and Chairman of sub-committee briefed about the deliberations of the sub-committee as under:-</p> <p><i>“The Member-Secretary of the sub-committee presented an overview of previous three meetings. The Chairman requested the participants including the representatives of the paint industries to share any new or additional inputs if any on the subject. Based on deliberations of the participants it was unanimously accepted that safety from toxic chemicals is the prime responsibility and major concern of everyone in Govt. and/or in public. It was felt that the agro-climatic regions of India are different from Europe, USA or Australia. It was also felt that the biocides essentially being comprised of chemicals that are pesticidal in action, must be brought under the ambit of Insecticides Act 1968 for biosafety. Nevertheless, it was also felt that the objectives of use of biocides are different from that of the agrochemicals for use in agriculture. Thus formulating guidelines for use of biocides without devising complete protocols for chemistry, toxicology, bioassay and packaging will not serve the purpose of regulation. It was therefore decided that the interim report on the points of registration of biocides may be submitted to the Registration Committee first and finalization of guidelines and formulation of the protocols may be completed subsequently on priority”.</i></p> <p>RC advised that the sub-committee should submit its report at the earliest.</p>
