	Committee deliberated the minutes of 386th meeting of registration Committee and confirmed the same.

2.0	<u>Presentation</u>
2.1	Presentation of M/s Director, ICAR National Research Centre for Grape, Pune
	<p>Dr. S.D. Sawant, Director, NRC Grapes (ICAR) presented their research finding on <i>Bacillus subtilis</i> strain DR-39 having properties for biodegradation of agrochemical residue in Grapes. The strain DR-39 has been identified by the institute on the basis of morphological, Biochemical and molecular analysis. The NRCG presented results of field testing of <i>Bacillus subtilis</i> strain DR-39 for its capabilities in bio degradation of various agrochemical residues associated with Grapes.</p> <p>RC deliberated the Agenda and noted that the request of NRC Grapes is for use of specific bacterial strain for biodegradation of pesticidal residues and not for any pesticidal purpose. Therefore, the RC is of the view that at first stage the applicant may be informed to seek the opinion from APEDA regarding permissible limits of this organism in Grapes if any and after the receipt of the opinion the matter may be presented to the Registration Committee.</p>

Ltd., has recently submitted the application for registration of 1-MCP. Even though there have been recommendation from State Government of Uttarakhand & Himachal Pradesh to allow import of the chemical for use on Apple during post-harvest period for enhancement of shelf life, RC is prima-facie of the view that the safety concerns associated with the product are required to be evaluated before allowing import of 1-MCP. Hence, the permission for import of the product at this stage is not supported by science based facts. RC also noted that a sub-committee constituted by RC is working on framing of guidelines for the product and desired that the guidelines should be finalized and submitted to RC expeditiously preferably within a period of one month and the same may be placed in the next RC meeting for consideration and appropriate decision. Further, considering the importance of the chemical as requested/recommended by the State Governments in enhancing the shelf life of Apple, RC decided to evaluate the application of M/s Tropical Agrosystem Pvt. Ltd., in a fast track mode, considering the interest of farmers in the relevant states in reducing the losses in post harvest.</p>
