<u>Agenda item No.</u>	<u>Particulars of Agenda</u>
1.0	Confirmation of minutes of the 403rd meeting of the Registration Committee.
	The minutes of 403 rd meeting were Confirmed.
	NIL
2.0	<u>Presentation</u>

2.1	Application of M/s PI Industries Ltd., for grant of registration for formulation import of PB Rope L/PB Knot under section 9(3)
	<p>RC deliberated the agenda in detail considering the following which includes excerpts of 395th RC recommendations:</p> <ul style="list-style-type: none"> i) It was also noted that the product PB Rope L (Gossyplure) is already approved for registration by the RC in its 211th meeting under section 9(3b). ii) Considering the importance of pheromone based mating disruption technology in IPM strategies for controlling the population of PBW, RC in its 391st meeting accorded priority. iii) The relevant Guidelines provides that as regards formulation, no data are required unless it is added with some other pesticide. iv) As per guidelines, the requirement of various data for registration of technical pheromones should be determined on case to case basis considering the chemistry, use pattern and toxicity of the pheromones. v) RC noted that the applicant has submitted a certificate declaring authenticity of the sample and the toxicological studies which included Acute oral Rat, Acute dermal rat, Acute inhalation rat, Primary skin irritation Rabbit, Irritation to Mucous membrane, Skin sensitization to guinea pig, toxicity to bird (northern Bobwhite) toxicity to fish (Rainbow trout) and mutagenicity AMES Test. vi) RC also noted that as per Bioefficacy data and ICAR comments, the use rate for Gossyplure (PB Rope L/PB Knot) is 140 gm a.i. in an area of 10 hectare and hence the low use rate per acre below 150 gm a.i. (as indicated in guidelines) is established. The guidelines also clearly state that Pheromone used in solid matrix dispenses and having low annual use rates can be waived of sub-cronic toxicity studies, developmental toxicity studies and immunotoxicity studies. vii) Further RC also observed that as per guidelines the Lepidopteran Pheromones that are naturally occurring compound designated by an unbranched aliphatic chain (between 9 and 18 carbons) ending in an alcohol, aldehyde or acetate functional group and containing upto 3 double bonds in aliphatic backbones can be exempted from the sub-acute toxicity carcinogenicity, effect on reproduction and metabolism if their use rates do not exceeds 150 gm/acre/year with good agricultural practices. As such the product qualifies for exemption as approved in 395th RC. viii) RC also noted that similar substances have been exempted earlier by RC from the requirement of registration for IPM programmes for reducing population of pests (Stem borer) as per Agenda Item No. 2.2 in its 293rd meeting held on 26.09.2008. ix) For mass trapping this pheromone trap is already in use and nothing adverse has been heard. Moreover, pheromone is not directly applied on plants.

	<p>x) The representatives of M/s PI industry had made presentation regarding the use rate of PB Rope L for 10 ha. and 25 ha. has been clarified to the satisfaction of Registration Committee.</p> <p>xi) The recommendations of Dr. Rehan sub-committee were also discussed and found that guidelines were cited clearly and it was also mentioned that since the applicant has submitted OECD guidelines in support of the waiver of the teratogenicity and immune toxicity studies, it mentions that waiver of the studies may be granted if the repeated dose toxicity of the group is described and submitted. Moreover the applicant has submitted report of AMES test only against the requirement of battery of three tests including AMES test to ascertain non-mutagenic potential, which may be submitted.</p>
2.2	<p>Presentation by M/s UPL Ltd., in pursuant to order passed by Appellate Authority in Appeal No. 09 of 2016 regarding decision taken by the Registration Committee in its 362nd meeting for grant of registration to the firm for the product <i>Acephate 45% + Cypermethrin 5% DF</i>.</p>
	<p>The representatives of M/s UPL Ltd., had made presentation regarding the condition on the certificate of registration of their product <i>Acephate 45 + Cypermethrin 5% DF</i> with following references of past RC decisions. The committee perused the observations in the order of the Hon'ble Appellate Authority and observed that their case was already approved in its 356th RC meeting vide agenda item no. 6.4 held on 25.06.2015. However, the RC felt it desirable that in view of the ICAR Comments the matter needs to be revisited and accordingly a subcommittee was formed under the Chairmanship of PPA in 358th RC meeting vide agenda item no. 2.2 to examine the issues of Resurgence and Resistance of the above product with respect to claim on whitefly. The report of the subcommittee was considered in 362nd RC meeting vide agenda item no. 11.1 held on 28.01.2016 and the decision of the RC is as under:-</p> <p><i>“The Chairman of the Sub-committee circulated the report in the meeting. After detail deliberations the Committee approved both the combination formulations to be used in Cotton for controlling sucking pests and boll worms (except white fly) subject to fixation of MRL. The Committee further decided “that a condition may be incorporated in the Certificate of Registration that one season study on resurgence, development of resistance of these pesticides against aphids, jassids and white fly has to be submitted by the registrant within two years from the date of issue of the Certificate of Registration (CR) so that decision on continuance of label claim on aphids and jassids and label expansion against white fly can be taken. In case of non-compliance of the condition, the Certificate of Registration shall be deemed invalid. The Committee further decided that the study protocol may be prepared jointly by the registrant & ADG (PP) and be submitted to the Sectt. of CIB&RC for approval by Registration Committee”.</i></p> <p>After perusing the minutes RC decided that the certificate of registration may be issued to the applicant except whitefly for which certain studies are to be carried out, the same were not carried out as the issue was subjudice in Appeal before Appellate Authority. The representatives of UPL on being questioned informed to the RC that nothing adverse</p>

	<p>on resistance and resurgence of the Synthetic Pyrethroids product has been reported as on date. However, keeping in view the larger public interest especially farmers, the committee at this stage, decided to approve the above registration on Aphids & Jassids. The decision on whitefly would be subject to the outcome of the studies, which shall be carried out by ICAR/SAUs on the above referred issue. RC constituted the following committee to develop the protocol on whitefly in association with pesticide industries:</p> <ol style="list-style-type: none"> 1. Dr. Rajan, ADG (PP), ICAR- Chairman 2. Dr. S. Vanila, Principal Scientist, NCIPM – Member 3. Dr. V. N. Waghmare, Director, CICR, Nagpur- Member 4. Sh. Kiran W. Deshkar – Member Secretary <p>Further, the RC desired that the pesticide industry associations should also be invited by the sub-committee to suggest modalities to be adopted on the issue so as to develop the protocols for carrying out the above referred studies and generation of data by its member companies holding registration certificate for any of the Synthetic Pyrethroids. The protocol shall be placed before the RC for approval.</p> <p>And it was further decided that in case the studies reveal that there is requirement for the generation of additional scientific data on the issue of whitefly the same shall be generated by the applicants and will submit it before the RC for further evaluation. A condition to this effect shall be recorded in certificate of registration. All registrant who have been issued certificate of registration Synthetic Pyrethroids shall submit their certificate of registration for incorporating the above condition under section 9(3C) of the Insecticide Act, 1968.</p>
2.3	<p>Presentation by M/s Bayer crop Science for grant of registration for import of <i>Thidiazuron Technical 98% w/w min. under section 9(3).</i></p> <p style="text-align: center;">And</p> <p>For grant of registration for indigenous manufacture of the product <i>Thidiazuron 30.51% + Diuron 15.25 w/w SC under section 9(3).</i></p>
	<p>The representatives of M/s Bayer Crop Science had made presentation regarding data generation on source from Germany and the product will be manufactured in China. The applicant explained that the composition of both products are same except for one impurity which is in higher quantity in the material produced source from China however, the amount of this impurity is also well below the global specification of the product. Further, this impurity has been tested through QSAR and AMES test of the product source from China has been submitted by the applicant which does not show any alert or revealed any mutagenic potential.</p> <p>Further, the RC asked the applicant for submitting data on phytotoxicity, succeeding crop, effect on parasites & predators data as claimed by the applicant that they have already generated the data from Punjab Agriculture University.</p>
