**Proceedings of the Brainstorming Session on "Non-cropped area and use of glyphosate"**  
**on 24<sup>th</sup> June 2019 at 11:00 A.M. in the Divisional Library**

The followings were present:

Sl. No.	Name	Designation & Address
1.	Dr. V.K. Singh	Head, Division of Agronomy & Chairman
2.	Dr. J.C. Majumdar	Crop Care Federation of India, New Delhi
3.	Dr. A. Krishna Reddy	CIB&RC, Faridabad
4.	Dr. T.K. Das	Professor & Principal Scientist (Weed Science)
5.	Dr. Raj Singh	Principal Scientist (Weed Science)
6.	Dr. Rajvir Sharma	Principal Scientist (Weed Science)
7.	Dr. Shivadhar	Principal Scientist
8.	Dr. T. Banerjee	Principal Scientist (Agricultural Chemicals)
9.	Dr. Rajiv K Singh	Principal Scientist
10.	Dr. Rajanna G A	Scientist

A brainstorming session was scheduled to discuss the points pertaining to the "Non-cropped area and use of glyphosate".

At the outset, the Chairman and Head, Division of Agronomy welcomed all the scientists present in the meeting. Two presentations/deliberations on the "Non-cropped area and use of glyphosate" were made, one by the Chairman and the other by Dr. T.K. Das, which was followed by discussion. All the members took active part in the discussion and put forward several valuable suggestions. After a long deliberation, the following definition of "non-cropped area with regard to use of glyphosate" was framed and endorsed unanimously:

1. The non-cropped/non-crop area with regard to use of glyphosate can be defined as "any land/area where any crop or vegetation is not being intentionally grown for certain period.

This non-cropped/non-crop area may include other unintentionally cultivated lands, area around farm houses, courtyards and backyards of houses, farm roads/paths, village roads/paths, banks of irrigation canals/channels with no chances of contaminating water, fallow land or no-till fallow lands (before or between the fellow time of two crops sown), drains, bus stops, airports, areas around non-commercial fruit trees, area around oil refineries, ordinance depots/factories etc.

The meeting ended with the vote of thanks to Chair and Members present.

### **Report of the sub-committee on implementation of crop grouping principles for extending label claims under the chairpersonship of Dr. P. K. Chakrabarty, ADG (PP &B)**

#### **Background**

The concept of crop grouping aims at uniting crops into a group or subgroup to facilitate use of pesticides in as many crops as scientifically possible. Globally, concerted efforts are being made for the implementation of Crop Grouping to so that the growers have access to new and effective crop protection tools and technologies. In India, one of the major issues is that there is label claim for use of pesticides in only 15-20 % crops. This also becomes a major limiting factor in the export of agricultural produce.

The process of label claim approval of a particular crop-pesticide combination is time consuming and usually requires 4-5 years with considerable monetary inputs. Due to such immense efforts, time and cost necessitated, label claim on many crops is usually not taken up, specifically for minor crops. For example, there are a number of crops on which a particular pesticide finds its use, but the overall market potential does not justify the expenses for bio-efficacy and residue data generation/ fixation of MRLs on such crops as these are cultivated in relatively smaller geographies. Such crops, in the Indian context, are generally referred to the commodities that require very low agro-inputs for cultivation but due to dietary value and importance in international trade these are very vital for the country. Out of approximately 280 registered pesticides in India, labelled use is restricted to less than 100 crops of the 554 crops (<15%). The absence of label claims for spices, fruits, leafy vegetables etc. leave farmers with fewer / limited pest management options. In addition, they also bear the risk of rejection in international trade on account of off-label use of the pesticide and the absence of country MRLs.

## Chronology of Events

The Department of Agriculture, Co-operation & Farmers Welfare constituted a sub-committee under the Chairmanship of Dr. T.P. Rajendran, former ICAR-Assistant Director General (Plant Protection) in March 2013 to study the aspects of crop grouping within the draft principles of Codex Committee for Pesticide Residues (CCPR).

The Members of the Sub-committee included:

1. Dr. T.P. Rajendran, the then Assistant Director General (PP), ICAR & Officer on Special Duty, National Institute of Biotic Stress Management, Raipur (Chairman)
2. Dr. K.K. Sharma, Network Coordinator, ICAR-AINP on Pesticide Residues, ICAR-IARI, New Delhi (Member)
3. Dr. A. Madhavan, Food Safety Standards Authority of India, FDA Bhawan, Kotla Road, New Delhi (Member)
4. Dr. B.S. Phogat, Asst. Plant Protection Advisor & Secretary (CIB & RC), Directorate of Plant Protection Quarantine and Storage, Faridabad. (Member)
5. Dr. P.S. Chandurkar, Consultant, Directorate of Plant Protection Quarantine and Storage, Faridabad. (Member)
6. Dr. S.N. Sushil, Plant Protection Advisor, Directorate of Plant Protection Quarantine and Storage, Faridabad. (Convener)

Based on the published final report of the Committee on Crop Grouping, over five hundred and fifty four Indian crops were grouped into definitive Crop Types / Crop Groups / Crop Sub-groups through similarities in their botanical classification, morphology, growth habit, the portion of the commodity harvested and/or consumed, and cultural practices. This report was based on the Codex Guidelines of crop grouping focusing on the **(1) principles and guidance on the selection of representative commodities and (2) classification of crop commodities with representative commodities**. Representative crops under the crop commodity

group were identified, which is subject to amendment under varying situation of trade patterns, perception of risks on pesticide residues and the introduction of new crops in the country for cultivation. For residue purposes, these 'representative crops' are typically those which are:

1. Most likely to contain the highest residues
2. Major in terms of production and/or consumption, and
3. Similar in morphology, growth habit, pest problems and edible portion to those other commodities within the group.

The committee also recommended:

- a. Extrapolation of existing MRLs of the given pesticide substance to those crops within the same Crop Group / Sub-group of crops and termed as Group MRL within the principles and guidance.
- b. Crop grouping needs to be reviewed, keeping in view the revisions at CCPR level.
- c. The report of the Committee may be considered as the National document on Crop Grouping with reference to the fixation of maximum residue limit (MRL) of pesticides in agricultural commodities by the Food Safety Standard Authority of India.

The said document was published by CIB&RC on their website for inviting comments from Stakeholders. The Registration Committee in its 354<sup>th</sup> meeting held on 31<sup>st</sup> March 2015 decided to seek views of Food Safety and Standards Authority of India (FSSAI) for adopting the crop grouping principles for determination of their MRLs for different categories of crops grown in India. FSSAI, in principle, consented Crop Grouping approach of data generation and MRL Fixation. Subsequently, based on comments of FSSAI, the registration committee in its 360<sup>th</sup> meeting held on 11<sup>th</sup> December 2015 decided that the MRLs can be extrapolated in the group of crops, if the Good Agriculture Practices (GAP) are similar to the crop in the group on which MRL / risk assessment has already been carried out on the basis of scientific data submitted by the applicant.

## **Constitution of Sub Committee on Implementation Crop Grouping Principles for Extending Label Claims**

The Registration Committee in its 369<sup>th</sup> meeting held on 4<sup>th</sup> October, 2016 deliberated the implementation of crop grouping and opined that the issue needs further scientific discussion since it effects the environment and human beings directly; and constituted a sub-committee under the Chairmanship of Dr. P.K. Chakrabarty, ADG (PP), ICAR & Member RC to recommend the procedure to implement Crop Grouping principles while protecting the environment and human beings within the ambit of the Insecticides Act.

The sub-committee comprised of the following members:

1. Dr. P.K. Chakrabarty, ADG (PP &B), ICAR, Krishi Bhawan, New Delhi (Chairman)
2. Dr. K.K. Sharma, Network Coordinator, AINP on Pesticide Residues, ICAR-IARI
3. Dr. T.A. Usmani, JD(PP) -Member
4. Dr. P.S.Nain, JD(PP)- Member
5. Miss. Kamlesh Miglani, DD(Chem) -Member
6. Dr. Vashudha Gautam, AD(E) -Member
7. Dr. Subhash Kumar, DD(WS) – Member Secretary
8. Dr. Vandana Tripathy, Senior Scientist, AINP on Pesticide Residues, ICAR-IARI -Co-opted Member

## **Workshop on “Crop Grouping and Minor Use Concept for Crop Protection Products in India”**

The issue of off-label use of pesticides in Indian agriculture was identified as a major SPS/ TBT concern in Indo-Canada joint working group where ADG (PP & B) was made the nodal person by DAC&FW to sort out the national issue of label expansion of pesticides based on the principle followed by the PMC, Canada. As an outcome, a

workshop on “Crop Grouping and Minor Use Concept for Crop Protection Products in India” was jointly organized by Indian Council of Agricultural Research (ICAR) and CropLife India (CLI) on October 24-25, 2017 at NASC Complex, ICAR, New Delhi. The expert officials from Ministry of Agriculture and Farmer’s Welfare, ICAR, FSSAI, CIB&RC, SAUs and international experts from USDA, Agri Food Canada and representatives of Crop Protection industry participated in the workshop.

The workshop recommended

1. To establish at the earliest guidelines for implementation of Crop Grouping principles for group MRLs;
2. Label claim expansion within the crop group/ sub-groups; to define criteria for identification of minor crops in the Indian context;
3. Adoption of bio-efficacy and residue data requirements for minor crops based on scientific rationale through data mining or extrapolation/ national monitoring data based on global practices.

The sub-committee deliberated the modalities and guidelines for implementation of Crop Grouping principles with regard to data generation and group MRLs.

### **Recommendations of the sub-committee for implementation of crop grouping:**

1. After series of intense deliberations over several sessions, the committee improvised/ modified the existing crop grouping scheme/ list of crops including certain representative crops, in consonance with the latest Codex Crop Grouping Classification (2017) and keeping in view the crops of major relevance to India identified on the basis of their acreage and production (Reference: Pocket book of Agricultural Statistics 2017 by MoA&FW). The revised crop grouping classification is attached as **Annexure I**.

2. The committee proposed the requirement for bio-efficacy and residue data generation for representative and member crops (**Annexure II**).

<b>Group 029</b>	Tea	Tea	Black, green, fermented tea

\*To be included in the Codex crop grouping

They are used mainly in a fermented and dried form or only as dried leaves for the preparation of infusions, which are used as beverages. Newly grown vegetative shoots (terminal bud and 2-3 leaves) of tea are plucked, withered, twisted and communicated and thereafter, in general, fermented and dried. Teas made from other plants are often prepared in a similar way.

## Annexure II

### Proposed Data generation Scheme for implementation of crop grouping for fixation of Sub group MRL

S. No.	Crop	Number of Locations(L) and Seasons (S)			MRL fixation/ value (Subgroup)
		Bio- efficacy	Residue		
			Insecticides Fungicides, Seed Treatment, Plant Growth Regulators	Herbicides	
1	<b>Representative Crop(s)</b>	3L 2S	4L 1S	3L 2S	Based on highest residue/worst case from Rep. crops subgroup MRL to be set
2	<b>Member commodity in same Sub Group (Dose is comparable with representative crop i.e. does not exceed the recommended dose by more than 25%)*</b>	3L 1S 2L 1S	1L1S	1L1S	Sub Group MRL shall apply to member crops

\* It will be applicable once FSSAI adopts the proposed guidelines for fixation of MRL at 1.25X dose.

- ❑ The bio-efficacy and residue data must be generated for the representative crop for recommendation of label claim and fixation of PHI by CIB&RC. The same recommendation will be forwarded to FSSAI for the fixation of Sub-Group MRL. However, the FSSAI shall issue notification for MRL fixation on that particular representative crop(s) only. A suitable communication mechanism between CIB&RC & FSSAI would be necessary to refer the Sub group MRLs so established. MRLs fixed based on particular commodity crop group approach has to be indicated as part of RC Minutes. It is important for reference of subsequent registrant who may seek label claim on member crop commodities.
- ❑ For other member commodities of the same sub group, bio-efficacy and residue data must be generated for those particular commodities on which the label claim is desired.
- ❑ In other words, subgroup MRL does not ensure label claim on all member commodities unless requisite bio-efficacy and residue data is generated on individual member crops. After obtaining the recommendation of Registration Committee, the FSSAI will issue notification for the Sub group MRL fixation on the member crop(s).
- ❑ **Crop grouping is a dynamic process and both classification and data requirements will be reviewed as and when required.**

**Comments on the crop grouping document received from various stakeholders**

Group	Suggestion from stakeholders	Comments of committee
Sub group 11B	Muskmelon and cantaloupe are same having same botanical name as <i>Cucumis melo</i> and therefore we request you to mention only Muskmelon.	<p><b>Cantaloupe</b> is a variety of the <i>Cucumis melo</i> species in the Cucurbitaceae family.</p> <p><i>Subspecies: C. melo subsp. Melo</i></p> <p><b>As per the latest Codex classification, it is mentioned separately.</b></p>

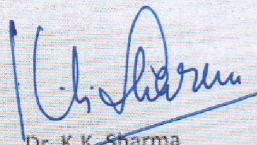

Group	Suggestion from stakeholders	Comments of committee
Sub group 12C	Mention eggplant or brinjal since eggplant/brinjal and aubergine are same crops (synonyms) with botanical name as <i>Solanum melogena</i> .	<b>As per the latest Codex classification, all the synonyms of the same crop are retained.</b>
Sub group 001C	Add: Mosambi	Already present as 'Orange, Sweet'
Sub group 002A	Add: Babugosa	Babugosha is a variety of pear.
Sub group 005A	Gooseberry? Otaheite?	Otaheite Gooseberry is a variety of amla <a href="https://hort.purdue.edu/newcrop/morton/otaheite_gooseberry.html">https://hort.purdue.edu/newcrop/morton/otaheite_gooseberry.html</a>  <b>As per the latest Codex classification, it is mentioned separately.</b>
