

MINUTES OF THE 421st REGISTRATION COMMITTEE MEETING HELD ON 21.08.2020 (10:00 Hrs) THROUGH VIDEO CONFERENCE.

The 421st Meeting of the Registration Committee (RC) was held under the Chairmanship of Dr. S. K. Malhotra, Agriculture Commissioner & Chairman, Registration Committee on 21.08.2020 at 10:00 Hrs onwards through NIC video conference. Sh. Rajesh Malik, Director (PP) & PPA; DR C. D Tripathi, Professor Emeritus, Department of Pharmacology, VMMC and S J Hospital, New Delhi; Dr. Rajan, In charge ADG (PP) ICAR, Krishi Bhawan, New Delhi; Dr. S. P. Sahni, (Representative of Drug Controller General of India), New Delhi; Dr. K. K. Sharma, Project Coordinator MPRNL, IARI, New Delhi; Dr. Vishal Chaudhary, Deputy Industrial Advisor, Ministry of Chemical and Petrochemical and Dr. J. P. Singh, Secretary, CIB&RC attended the meeting.

Experts/ Officers from the Secretariat of CIB&RC attended the meeting to present their agenda and volunteered to provide the assistance during the deliberations were Dr. Sushil K. Khurana, Consultant (Pathology); Dr. Sandhya Kulshrestha, Consultant (Pharma); Dr. Sarita Bhalla, Consultant (Pharma); Dr Vandana Seth, JD(Chem); Sh. Hari Om Miglani, Sr. LO; Sh. A. K. Reddy, DD(WS); Sh. Kiran W. Deshkar, DD (E); Dr. Sneha Poddar, DD (Chem); Dr. Vandana Pandey, AD (PP); Dr. Brijesh Tripathi, AD (Chem.); Ms. Raunaq, AD (Chem.) and Dr. Archana Sinha, JD (Chem), CIL.

At the outset, Chairman welcomed the members & experts and asked Secretary, CIB&RC to take up the agenda for deliberations. The decisions taken by the RC are as under:

<u>Agenda item No.</u>	<u>Particulars of Agenda</u>
1.0	Confirmation of minutes of the 420th meeting of the Registration Committee.
	RC deliberated the minutes of 420 th RC meeting and confirm the minutes with some modifications : 1) item no. 2.4 : "The Committee noted the reply of the applicant dated 24.07.2020 wherein the applicant has mentioned that the data generation on the required studies for registration will be completed by early 2021. Hence, it is decided that the application may be closed. It may be revived when complete data is generated and submitted by the applicant."
2.0	<u>Presentation</u>
2.1	Presentation of M/s Anu Products, for the registration of <i>Isoprothiolane Technical 97% Min, Difenaconazole Technical 95% Min. and Fenopxaprop-P-ethyl Technical 88% min</i> under section 9(4) TIM
	The presentation was made by the representative of M/s Anu Products Ltd. & deliberated. It was observed that the issue was same as agenda item no 10.28 of this RC which is the follow –up of presentations of 420 th RC. Therefore, the decision would be same as for

	agenda item no 10.28.
2.2	Presentation of M/s Syngenta India Ltd., for the registration of <i>Ametryn 73.1% w/w + Trifloxysulfuron Sodium 1.8% w/w WG.</i>
	The representatives of the applicant made a presentation, and intimated the percentage of a.i. on which the product Trifloxysulfuron Sodium technical was registered in various countries. On the query regarding application on minimum 90% a.i. and data submission on higher a.i. with respect to Trifloxysulfuron Sodium technical the applicant informed that impurity profile was also tested where no alert was obtained. RC advised the applicant to submit a copy of presentation to the Secretariat of CIB&RC along with their comments on impurity profile on no alerts observed. The RC deliberated the case in detail and decided to approve with subject to the fixation of MRL. The RC also directed the applicant for submitting a duly filled MRL proforma to Sectt. of CIB&RC for submitting to FSSAI.
2.3	Presentation of M/s NATCO Pharma for the registration of <i>Chlorantraniliprole Technical 93.00% w/w.</i>
	Representative of the applicant made a presentation of the product Chlorantraniliprole Technical 93.00% w/w. The committee noted request of the applicant and directed to complete data requirement on shelf life. Applicant also requested for consideration of the case with minimal shelf life till the complete data is developed. In processing sampling is also pending and Secretariat was advised for management for this purpose.
2.4	Presentation of M/s Bharat Petroleum for the registration of Petroleum Derived Spray Oil (Aromatic free paraffinic oil)
	Representative of the applicant made the presentation. Committee noted the request of the applicant in the category of 9(3b) and further agreed that the matter will be reviewed with other applicants who has applied for registration of Petroleum Derived Spray Oil (Aromatic free paraffinic oil) in the same category.
2.5	Presentation of M/s Future Crop Science regarding clarifications/representations for genuineness of consents from technical consent providers
	A presentation was made by the applicant. RC directed the concerned expert to put all facts along with other similar cases in the upcoming RC.
2.6	Presentation of M/s Crop Chemicals India Ltd., regarding clarifications/representations for genuineness of consents from technical consent providers.
	A presentation was made by the applicant. RC directed the concerned expert to put all facts along with other similar cases in the upcoming RC.
3.0	<u>Government Business</u>
3.1	Minutes of the meeting in house working group for “Establishment of minimum purity in India based on the registration of technical active ingredient by the United States Environmental Protection Agency (US EPA)”.
	RC deliberated the comments received from the stake holders on the report of in house working group and decided to accept the following recommendations of the group given as below:-

	<ol style="list-style-type: none"> 1. The minimum purity of active ingredient in a technical material may be as per the claim for it by the applicant on FORM I or not below the approved lower certified limit in the US EPA specifications (CSF). Minutes of 417th RC meeting held on 15.06.2020 2. The maximum content of toxicologically significant and/or relevant impurities shall be same as US EPA approved limit. 3. The maximum content of impurities that are toxicologically non relevant shall be set as following: <ul style="list-style-type: none"> o <i>Max. Concentration of impurity in India = US EPA nominal content + 3*SD.</i> o <i>for technical material produced using unique technologies, like fermentation etc, the concentration of toxicologically non-relevant impurities shall be as per US EPA nominal + 6*SD to accommodate variability.</i> 4. The applicant shall submit a copy of CSF along with FORM I while submitting the application as mandatory document. 5. Any change in CSF in the source country shall be brought into the knowledge of RC by the applicant by submitting copy of revised CSF for endorsing the revised composition on CR. 6. A condition on the Certificate of Registration shall be incorporated regarding submission of revised CSF immediately for consideration of the RC as and when undertaken in the source country.
3.2	Strengthening of preliminary scrutiny of various category of 9(3), 9(3b), 9(3) Export), 9(4) TIM and 9(4) FIM category of applications, preparation of checklist based on guidelines approved by the RC.
	As a follow up action of item 3.2 (3) of the 420 th RC the matter was deliberated in detail and the RC approved check lists for preliminary scrutiny of various categories of application for immediate implementation. Secretariat is directed to upload all the approved checklists for preliminary scrutiny on the website.
4.0	<u>Export Cases</u>
4.1	List under section 9(3) Export applications.
	Committee deliberated the agenda and approved the case as per Annexure 4.1.1, 4.1.2 , 4.1.3 & 4.1.4, (expect Sr. No. 45,49,53,60 of Annexure 4.1.1). It was reiterated that the application of import for export category shall be subject to the decision taken by the committee in its 356 th meeting. It was also directed to strictly follow Gazette Notification SO 3951 (E) dated 08.08.2018 published on 09.08.2018 of Ministry of Agriculture and Farmers Welfare while issuing approvals.
5.0	<u>9(3B) Cases</u>
	NIL
6.0	<u>9(3) CASES</u>
6.1	Consideration of an application of M/s Dhanuka Agritech Ltd., for grant of registration for indigenous manufacture of <i>Quizalofop ethyl 10% EC</i> under section 9(3) (FIM vs FIT).
	RC deliberated the agenda and approved for grant of registration of Quizalofop ethyl 10% EC.

6.2	Consideration of application of M/s ATGC Biotech Pvt. Ltd., for grant of registration for indigenous manufacture of <i>Gossypure (SCLP PBW) Technical</i>
	RC deliberated the agenda and approved the case for grant of registration for indigenous manufacture of <i>Gossypure (SCLP PBW) Technical</i> with provisional registration of four months since study for shelf life as claimed by applicant is undergoing and data shall be submitted by January, 2022.
6.3	Consideration of an application of M/s Willowood Chemical Pvt. Ltd., for grant of registration for Technical Import of <i>Acetamiprid Technical 99% w/w min.</i> under section 9(3) (TI vs TIM).
	RC deliberated the agenda and approved for grant of registration for Technical Import of <i>Acetamiprid Technical 99% w/w min.</i> under section 9(3) (TI vs TIM) for import manufactured by M/s Hengshui Northern & Chemical Co. Ltd., Xiaozhang Industrial Zone, Zaoqiang Country, Hebei Province, P. R. China and supplied by M/s Willowood (Hangzhou) Co. Ltd., Room No. 2003, Golden Plaza, No 118, Qingchun Road, Xiacheng District, Hangzhou City, Zhejiang Province, China with shelf life of One Year.
6.4	Consideration of an application of M/s Crystal Crop Protection Pvt. Ltd., for grant of registration for Technical Import (New Source) for <i>Fomesafen Technical 95% w/w min.</i> under section 9(3)
	RC deliberated the agenda and approved for grant for Technical Import (New Source) for <i>Fomesafen Technical 95% w/w min.</i> under section 9(3) for import manufactured by M/s Inner Mongolia Join Dream Fine Chemicals Co. Ltd. (Add. Zhiongcheng Road East, Wuda Economic Development Zone, Wuhai 016000, Inner Mongolia, China) and supplied by M/s Hebei Bestar Commerce and Trade Co. Ltd., (Add. 6-3-203 No. 66 Dianda Street, Xinhua District, Shijiazhuang, Hebei, China) with shelf life of two years. RC further directed the Secretariat of CIB&RC to issue the CR only after receipt of satisfactory report of NMR spectra of the product.
6.5	Consideration of an application of M/s Crystal Crop Protection Pvt. Ltd., for grant of registration for indigenous manufacture of <i>Fomesafen 12% + Quizalofop ethyl 3% SC</i> under section 9(3).
	RC deliberated the agenda and approved for grant of registration for Indigenous Manufacturing of Formulation <i>Fomesafen 12% + Quizalofop ethyl 3% SC for use in Soybean crop to control Echinochloa colona, Eleusine indica, Dactyloctenium aegyptium, Digitaria and Cyperus rotundus subject to MRL fixation of Fomesafen in Soybean crop.</i> The MRL of <i>Quizalofop ethyl</i> is already fixed in Soybean crop. The following cautionary statement may be added in label and leaflets: <ol style="list-style-type: none"> 1. The product is highly toxic to Bees exposed to direct treatment and thus should be avoided during active foraging period of bees. 2. The product is moderately to highly toxic to fresh water fish and aquatic invertebrates and may be avoided near aquaculture. RC further directed the Secretariat of CIB&RC to issue the CR only after receipt of satisfactory report of NMR spectra of the Technical.
7.0	<u>9(4) TIM CASES</u>
7.1	Consideration of application of M/s Ichiban Crop Science Ltd., for grant of registration for indigenous manufacture of <i>Pyrazosulfuron ethyl Technical 97.00% w/w min.</i> under section 9(4).

	Committee deliberated the agenda and approved for grant of registration for <i>Pyrazosulfuron ethyl Technical 97.00% w/w min.</i>
7.2	Consideration of application of M/s Crystal Crop Protection Ltd., for grant of registration for indigenous manufacture of <i>Pyrazosulfuron ethyl Technical 97.00% w/w min.</i> under section 9(4).
	Committee deliberated the agenda and approved for grant of registration for <i>Pyrazosulfuron ethyl Technical 97.00% w/w min.</i>
7.3	Consideration of application of M/s Meghmani Industries Ltd., for grant of registration for indigenous manufacture of <i>Pymetrozine Technical 98.00% w/w min.</i> under section 9(4).
	Committee deliberated the agenda and approved for grant of registration for <i>Pymetrozine Technical 98.00% w/w min.</i>
7.4	Consideration of application of M/s Meghmani Industries Ltd., for grant of registration for indigenous manufacture of <i>Azoxystrobin Technical 96.00% w/w min.</i> under section 9(4).
	Committee deliberated the agenda and approved for grant of registration for <i>Azoxystrobin Technical 96.00% w/w min.</i>
7.5	Consideration of application of M/s Punjab Chemical & Crop Protection Ltd., for grant of registration for indigenous manufacture of <i>Difenthiuron Technical 96.00% w/w min.</i> under section 9(4).
	Committee deliberated the agenda and approved for grant of registration for <i>Difenthiuron Technical 96.00% w/w min.</i>
7.6	Consideration of application of M/s Ichiban Crop Science Ltd., for grant of registration for indigenous manufacture of <i>Acephate Technical 97.00% w/w min.</i> under section 9(4).
	Committee deliberated the agenda and approved for grant of registration for <i>Acephate Technical 97.00% w/w min.</i>
7.7	Consideration of application of M/s Ichiban Crop Science Ltd., for grant of registration for indigenous manufacture of <i>Imazethapyr Technical 97.00% w/w min.</i> under section 9(4).
	Committee deliberated the agenda and approved for grant of registration for <i>Imazethapyr Technical 97.00% w/w min.</i>
8.0	Online filling of application for registration under section 9(4) FIM/FI/TL.
8.1	Consideration of application for grant of registration for Formulation Indigenous Manufacture (FIM) under section 9(4).
	Committee deliberated the agenda and approved as per Annexure – 8.1.1 of the agenda except the products covered under the Gazette Notification SO 3951 (E) dated 08.08.2018 published on 09.08.2018. RC directed the Secretariat of CIB&RC that all the cases under section 9(4) must be issued after confirming the fixation of MRL for the product. It was also directed to re-check the cases and should strictly follow Gazette Notification SO 3951 (E) dated 08.08.2018 and published on 09.08.2018 of Ministry of Agriculture, Cooperation and Farmers Welfare while issuing approvals and further decided that CRs will not be issued till consent letters on original affidavits (hard copy) /Undertaking requirement of

	Public Notice dated 23.04.2019 are received in respect of applications where original consent letters from the technical providers are awaited. If no consent letter on original affidavit (hard copy) / Undertaking requirement of Public Notice dated 23.04.2019 is received within 30 days from the uploading of the minutes same will be apprised to RC for closure of the case. RC further directed the applicants for providing original consent letters on affidavits (hard copy), where were possible, in lieu of the undertaking requirement of public notice 23.04.2019 as due to implementation of nationwide unlock.
8.2	Consideration of an application of M/s Phyto Chem (India) Ltd., for grant of registration of <i>Paraquat dichloride Technical 42% min.</i> for import u/s 9(4).
	RC deliberated the agenda and approved the case for grant of registration of <i>Paraquat dichloride Technical 42% min.</i> for import u/s 9(4) with validity upto 25.01.2021 subject to submission of original documents such as registration certificate/ certificate of DNA & consent letter from the source and original affidavit that the applicant does not possess any certificate of registration for Technical Indigenous Manufacture (TIM). Applicant has to submit an Affidavit in respect of enhanced purity of the product, latest manufacturing process, quality specifications, chemical profiling of active ingredient and impurities.
8.3	Consideration of an application of M/s Crystal Crop Protection Ltd., for grant of registration of <i>Carbofuran Technical 90% w/w min.</i> for import u/s 9(4).
	RC deliberated the agenda and asked the Sectt. of CIB&RC to examine veracity of the approved source as mentioned by applicant in consent letter and put up the facts to upcoming RC.
8.4	Consideration of an application of M/s Sign Chemical Industries Pvt. Ltd., for grant of registration of <i>Cartap hydrochloride Technical 98% w/w min.</i> for import only u/s 9(4).
	RC deliberated the agenda and asked the Sectt. of CIB&RC to examine veracity of the approved source as mentioned by applicant in consent letter and put up the facts to upcoming RC.
9.0	<u>ENDORSEMENT CASES</u>
	<u>Legal endorsement cases</u>
9.1	Consideration of the request from M/s. GT Biosciences Pvt. Ltd., for the endorsement of change in name of the company from M/s. Sai Agrotech registered office 38, Near Water Tank, DARDA Nagar , Yavatmal-445001 (MS) to M/s GT Biosciences Pvt. Ltd.
	RC deliberated the agenda and observed that the applicant has tendered an apology for including the banned products in the endorsement application. In terms of the apology by the applicant RC decided to approve the same. However, RC sternly warns the applicant not to repeat mistake.
9.2	Consideration of the request from M/s Best Agrochem Pvt. Ltd., for endorsement of change of name of company due to merger of M/s Best Agrochem Pvt. Ltd., to M/s Best Agrolife Ltd., with the order of NCLT dated 05.05.2020 on the 334 certificate of registrations.
	RC deliberated the agenda and approved the same in terms of the NCLT order pertaining to amalgamation.
9.3	Consideration of the request from M/s. Indocell Crop Science for the endorsement of

	change of office address from Balaji Industrial Estate, Opp. Krishna Park, Near Rodex Bearing, Gondal National Highway, Rajkot (Gujarat) to 233-Royal Complex, Bhutkhana Chowk, Dhebar Road, Rajkot – 360002 (Gujarat) on the 34 certificate of registrations.
	RC deliberated the agenda and approved the same.
9.4	Consideration of the request from M/s. Ichiban Crop Science Ltd., for endorsement of additional factory address situated at SP-22, 23 RIICO Industrial Area, Keshwana, District – Jaipur, State – Rajasthan on 8 Certificate of Registrations.
	RC deliberated the agenda and approved the same.
9.5	Consideration of the request from M/s. Sensus Agri Solutions for the endorsement of change in name of the company from M/s. Sensus Agri Solution Pvt. Ltd., to M/s Sensus Agri Solution on 35 certificate of registrations.
	RC deliberated the agenda and approved the same.
9.6	Consideration of the request from M/s. Meghmani Organics Ltd., for endorsement of additional factory address situated at CH-1+2A, GIDC, Dahej – 392130, Ta.-Vagra, Dist.- Bharuch, Gujarat on the Certificate of Registration of Profenofos Technical [CIR-63,849/2009-Profenofos Technical for indigenous manufacture (305)-944.
	RC deliberated the agenda and approved the same.
9.7	Consideration of the request from M/s. Rallis India Ltd., for endorsement of additional factory address situated at D 26, MIDC Lote Parashuram, Tq.- Khed, Dist.- Ratnagiri, State – Maharashtra, Pin-415722 on the Certificate of Registration of Buprofezin 20% + Acephate 50% (w/w) WP [CIR-2099/2017 (375)- Buprofezin + Acephate (WP) - 02.
	RC deliberated the agenda and approved the same.
9.8	Consideration of the request from M/s. Gaiagen Technologies Pvt. Ltd., for the endorsement of change in name of the company from M/s. Pest Control (India) Pvt. Ltd., to M/s Gaiagen Technologies Pvt. Ltd. on 21 certificate of registrations.
	RC deliberated the agenda and approved the same.
9.9	Consideration of the request from M/s. Swarup Chemical (P) Ltd., for endorsement of additional factory address situated at B-15 to B-22, UPSIDC Industrial Area, Sandila Dist.- Hardoi, State – Uttar Pradesh on the 47 Certificate of Registrations.
	RC deliberated the agenda and approved the same.
9.10	Consideration of the request from M/s. Agri Biochem Pvt. Ltd., for the endorsement of change in name of the company from M/s. Agrhos International to M/s Agri Biochem Pvt. Ltd., on 35 certificate of registrations.
	RC deliberated the agenda and approved the same.
9.11	Consideration of the request from M/s. Santom Crop Science for the endorsement of change of office and factory address from Office :- 5th Floor, Tower-C, Green Boulevard, B-Block, Sector – 62, Noida – 201309 (UP) and Factory:- E-14, UPSIDC, Prasakhera, Bareilly – 243001 (Uttar Pradesh) to Office & Factory :- Bahadurpur

	Road, Near Rama Shyama Paper Mill, Gopalpur Nagriva, Bareilly – 242331 (UP) on the 72 certificate of registrations.
	RC deliberated the agenda and approved the same.
9.12	Consideration of the request from M/s. Excel Pesticide Industries for the endorsement of change of factory address and establishment of second factory address from H-480 C, Sarana Dungar, Industrial Area, Jhotwara, Distt.- Jaipur (Rajasthan) to F-122, Sarana Dungar, Industrial Area, Jhotwara, Distt.- Jaipur (Rajasthan) on the 21 certificate of registrations.
	RC deliberated the agenda and approved the same.
9.13	Consideration of the request from M/s. ADAMA India Pvt. Ltd., for endorsement of additional factory address situated at Survey No. 494, Koyyalangudem Village, Chontuppall Mandal, Yadadri-Bhuvanagiri District, Telangana State – 508 252 on the Certificate of Registration of Acephate 75% SP [CIR-18,968/94/Acephate (SP) – 262].
	RC deliberated the agenda and approved the same.
9.14	Consideration of the request from M/s. P I Industries Ltd., for endorsement of additional factory address situated at Plot No. 3133 to 3139 and others, GIDC Estate, Panoli, Distt.- Bharuch, Gujarat on the 05 Certificate of Registrations.
	RC deliberated the agenda and approved the same.
9.15	Consideration of the request from M/s. Rallis India Ltd., for endorsement of additional factory address situated at D26, MIDC Lote Parshuram Tq-Khed Distt.-ratnagiri – 415722, State Maharashtra on the Certificate of Registrations of Acephate 45% + Cypermethrin 5% DF [CIR-169203/2020-Acephate + Cypermethrin (DF) (412) – 1512].
	RC deliberated the agenda and approved the same.
9.16	Consideration of the request from M/s. Indofil Industries Ltd., for endorsement of additional factory address situated at Plot No. 104/1/A, GIDC, Halol-2, Distt.- Panchmahal – 389350, Gujarat on the Certificate of Registrations of Dinofefuran 20% SG [CIR-113118/2014-Dinotefuran (SG) (346) -1].
	RC deliberated the agenda and approved the same.
9.17	Consideration of the request from M/s. Bayer CropScience Ltd., for endorsement of additional manufacturing site situated at Village Numbua, Tehsil Derabassi, Distt.- S.A.S. Nagar, Mohali, Punjab – 140507 on the 05 certificate of registrations.
	RC deliberated the agenda and approved the same.
9.18	Consideration of the request from M/s. Rallis India Ltd., for endorsement of additional factory address situated at Plot No. Z-110, Sez Area, GIDC, Dahej, Ta.- Vagara, Bharuch, Gujarat - 392130 on the Certificate of Registrations of 2,4-D Soium Salt Technical 80% w/w WP [5-29(49)/2,4-D (W) - 40].
	RC deliberated the agenda and approved the same.

9.19	Consideration of the request from M/s. Tagros Chemicals India Pvt. Ltd., for endorsement of transfer of 72 nos. Of registration certificate issued from M/s Gujarat Agrochem Ltd., w.r.t. to the amalgamation scheme.
	RC deliberated the agenda and approved the same in terms of the NCLT order pertaining to amalgamation.
9.20	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Hexaconazole 75% WG [CIR-154762/2018-Hexaconazole (WG) (391) – 1047].
	RC deliberated the agenda and approved the same.
9.21	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Imidacloprid 17.8% SL [CIR-151349/2018-Imidacloprid (SL) (388)-2088].
	RC deliberated the agenda and approved the same.
9.22	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Hexaconazole 5% SC [CIR-154761/2018-Hexaconazole (SC) (391) - 1046].
	RC deliberated the agenda and approved the same.
9.23	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Gibberellic acid 0.186% SP [CIR-155897/2018-Gibberellic acid (SP) (392) - 718].
	RC deliberated the agenda and approved the same.
9.24	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Gibberellic acid 0.001% L [CIR-155898/2018-Gibberellic acid (L) (392) - 719].
	RC deliberated the agenda and approved the same.
9.25	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Dimethoate 30% EC [CIR-157528/2019-Dimethoate (EC) (394) – 202].
	RC deliberated the agenda and approved the same.
9.26	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Imidacloprid 30.5% SC [CIR-151350/2018-Imidacloprid (SC) (388) - 2091].
	RC deliberated the agenda and approved the same.
9.27	Consideration of the request from M/s. Sumo Insecticides for endorsement of

	change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Imidacloprid 48% FS [CIR-151351/2018-Imidacloprid (FS) (388) – 2090].
	RC deliberated the agenda and approved the same.
9.28	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Imidacloprid 70% WG [CIR-151354/2018-Imidacloprid (WG) (388) – 2091].
	RC deliberated the agenda and approved the same.
9.29	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Lambda cyhalothrin 5% EC [CIR-157530/2019-Lambda cyhalothrin (EC) (394) - 1130].
	RC deliberated the agenda and approved the same.
9.30	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Lambda cyhalothrin 2.5% EC [CIR-157527/2019-Lambda cyhalothrin (EC) (394)-1128].
	RC deliberated the agenda and approved the same.
9.31	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Lambda cyhalothrin 4.9% CS [CIR-157529/2019-Lambda cyhalothrin (CS) (394) - 1129].
	RC deliberated the agenda and approved the same.
9.32	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Lambda cyhalothrin 10% WP [CIR-157532/2019-Lambda cyhalothrin (WP) (394) - 1133].
	RC deliberated the agenda and approved the same.
9.33	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Pendimethalin 30% EC [CIR-151347/2018-Pendimethalin (EC) (388) - 840].
	RC deliberated the agenda and approved the same.
9.34	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Thiamethoxam 25% WG [CIR-155896/2018-Thiamethoxam (WG) (392) 1630].
	RC deliberated the agenda and approved the same.

9.35	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Thiamethoxam 70% WS [CIR-155894/2018-Thiamethoam (WS) (392) - 1628].
	RC deliberated the agenda and approved the same.
9.36	Consideration of the request from M/s. Sumo Insecticides for endorsement of change of name of the company name from M/s Vidhan Agrotech Industries to M/s Sumo Insecticides on the certificate of registration of Emamectin benzoate 5% SG [CIR-157531/2019-Emamectin benzoate (WG) (394)-1007].
	RC deliberated the agenda and approved the same.
	<u>Plant Pathology Endorsement</u>
9.37	9(4) Endorsement (Plant Pathology).
	RC deliberated the agenda and approved as per the annexure 9.37.1
10.0	<u>MISCELLANEOUS ITEMS</u>
10.1	Report of the sub-committee for approval of laboratory/institution testing facilities for generating and accepting data for the purpose of registration of pesticides.
	<p>RC deliberated the subcommittee report and approved the following recommendations:-</p> <ol style="list-style-type: none"> 1. Inspection and approval of GLP/NABL accredited laboratories, henceforth, is not required by CIB&RC. 2. Chemistry, residue, persistence and packaging data generated by the GLP/NABL accredited laboratories/Institutions may be considered for registration of pesticides subject to approval of testing parameters in the scope of accreditation certificate. 3. While applying for the grant of registration, the applicant should enclose copy of GLP/NABL certificate of the lab from where chemistry, residue, persistence and packaging lab data has been generated. 4. For development of better quality of pesticides and making them acceptable globally, regulatory system should steadily advance towards adopting GLP practices. <p>RC further directed the Sectt. of CIB&RC to prepare a updated list of NABL/GLP accredited labs with their scope and validity and data should only be accepted from those labs have requisite scope and validity .</p>
10.2	Request for import of sample quantity of product A23213A by M/s Syngenta Biosciences Pvt. Ltd.
	RC deliberated the agenda and closed the application on applicant's request.
10.3	File received after 413th RC (Agenda Item No. 3.2) decision.
	RC deliberated the agenda and decided to close the applications.

10.4	Consideration of application for import permits for boric acid for non-insecticidal use.										
	RC deliberated the agenda and approved as per Annexure 10.4.1.										
10.5	Consideration of application for import permits multiuse insecticides (other than boric acid) for non insecticidal use.										
	RC deliberated the agenda and approved as per Annexure 10.5.1.										
10.6	Request received for revival of application.										
	RC deliberated the agenda and allowed to revive the following applications of label expansion. 1. 9914-END/2018 2. 9920-END/2018										
10.7	Report of expert group for grant of registration for <i>Tricontanol</i>.										
	RC approved the recommendations of the report submitted by expert group. RC decided that there is no requirement of consent letter for technical of Tricontanol as the same is not registered since Tricontanol formulations are directly manufactured from the plant extracts. RC further decided to form a following expert group to look into the issues related to agenda no. 9.21 of 399 th RC and directed to submit its report within one month. 1. Dr. Sushil K. Khurana, Consultant (Path) – Chairman 2. Sh. A. K. Reddy, DD (WS) – Member 3. Dr. Brijesh Tripathi, AD (Chem) - Member 4. Dr. Vandana Seth, JD (Chem.) – Member Secretary.										
10.8	Fixation of MRL by CIB&RC till actual MRLS is fixed by FSSAI.										
	Committee deliberated the agenda and agreed to consider 0.01 mg/kg as default MRL for below mentioned case. The default MRL value will be applicable for six months as per minutes of (item 10.10) 417 th RC meeting from the date of uploading the minutes. <table border="1"> <thead> <tr> <th>Sr. No.</th> <th>Name of Molecule</th> <th>Name of Crop</th> <th>File No.</th> <th>RC meeting & Agenda</th> </tr> </thead> <tbody> <tr> <td>1.</td> <td>Tebuconazole 50% + Trifloxystrobin 25% WG</td> <td>Cow pea</td> <td>9808-END/2018 - CIR-II</td> <td>413(Agenda No. 9.5)</td> </tr> </tbody> </table>	Sr. No.	Name of Molecule	Name of Crop	File No.	RC meeting & Agenda	1.	Tebuconazole 50% + Trifloxystrobin 25% WG	Cow pea	9808-END/2018 - CIR-II	413(Agenda No. 9.5)
Sr. No.	Name of Molecule	Name of Crop	File No.	RC meeting & Agenda							
1.	Tebuconazole 50% + Trifloxystrobin 25% WG	Cow pea	9808-END/2018 - CIR-II	413(Agenda No. 9.5)							
10.9	Consideration of application for enhancement of shelf life under section 9(4).										
	RC deliberated the agenda and approved as per Annexure 10.9.1.										
10.10	Report of sub-committee on field persistence studies in plant and their analytical test studies in plant samples after considering all stake holders representation										

	RC deliberated the agenda and approved for uploading the sub-committee report. Annexure-10.10.1
10.11	Application for import of sample quantity of 26 Liters of IKF-5411 400SC formulation coded herbicide for RTT purpose of M/s ISK Biosciences India Pvt.
	Committee deliberated the agenda and approved for import of 26 Liters of coded molecule IKF-5411 400SC for RTT purpose.
10.12	Request for permission to do locust control trials with CIB&RC approved chemicals.
	RC deliberated the agenda and deferred for further clarification on technical issues.
10.13	Agenda for import of coded molecule A23373A of M/s Syngenta Biosciences Pvt. Ltd.
	Committee deliberated the agenda and approved import of 116 L of coded molecule A23373A for RTT purpose.
10.14	Proposal for assigning of label claim of Chlorantraniliprole 18.3% SC, Fipronil 0.3% G and Chlorpyrifos 20% EC in Wheat against pink stem borer (<i>Sesamia inferens</i>) and Army Worm (<i>Mythimna separata</i>) as a special case.
	Committee deliberated the agenda and suggested pesticide industry to come forward for data generation and application according to approved guideline.
10.15	RTT ex-post-facto status on 14.08.2020.
	RC deliberated the agenda and approved as per Annexure 10.15.1.
10.16	Consideration of an application of M/s Pioneer Pesticides Pvt. Ltd., for withdrawal of certificate for manufacturing of pesticides by CIB&RC u/s 9(4).
	RC deliberated the agenda and decided to call back the Certificate of Registration issued to the applicant. RC decided to inform the applicant to immediately surrender the original Certificate of Registration issued by Secretariat, CIB & RC within 15 days from date of hoisting of the minutes on CIB & RC website.
10.17	Legal action against applicants for submitting fake affidavit for technical consent.
	RC noted the progress made in the matter so far and further directed the concerned expert to examine the other similar applications and bring facts to the RC.
10.18	Follow up action of decision of 413th RC vide agenda no. 10.49.
	RC noted and directed Secretariat to hoist the list of authorized persons provided by the Company for issuing affidavit of consent for supplying technical grade material on the website.
10.19	Consideration for closure of applications for registration for which deficiency reply has not been submitted within the prescribed timelines.
	RC deliberated the agenda and decided to give 30 days additional time for responding to the applicants.
10.20	Request of M/s BASF India Ltd., to re-open the closed file for registration of <i>Dinotefuran 0.5% RB (gel)</i> formulation for import u/s 9(3).

	The Committee noted that study on honey bees as per guidelines has not been submitted by the applicant and they have requested for waiver. Hence, the Committee decided that the application may be reopened only when complete data is submitted by the applicant as per guidelines of the RC.
10.21	Correction in agenda item no. 9.31 of 416th RC meeting in respect of endorsement of alternate packing for change in primary packing, secondary and transport packing for Transfluthrin 1% FU application of M/s Godrej Consumer Products Ltd.
	RC noted the correction in the agenda item and approved the same.
10.22	Application for grant of validity extension for registered bio-pesticides strain under 9(3b).
	RC deliberated the agenda and agreed for closure of the files.
10.23	Technical consent verification of Formulation Certificate issued to 10 companies that have been identified Fake Case under section 9(4) FIM.
	RC noted the status and directed the concerned expert to examine and bring facts to the RC.
10.24	Revisit current guidelines for registration of pesticides u/s 9(3) and 9(4).
	RC deliberated the Agenda and approved revised sub-committee with new composition. Dr. Archana Sinha, JD (Chem) will continue to remain as a member. RC further decided that the sub-committee will submit report before 30 th September, 2020.
10.25	Status of NMR of 9(3)/9(4) TIM cases.
	RC noted the status and deliberated the agenda and decided that in case of the product samples shelf life is expired, the applicant will make sure to re-submit the sample to CIL within 10 days from uploading the minutes on the website for early NMR analysis.
10.26	List of free sale certificate application.
	RC deliberated the agenda and approved as per Annexure-10.26.1
10.27	List of 9(3)/9(3b) FI/TIM files where deficiencies reply has not been submitted by the applicant within the prescribed timeline as decided by the RC in its 400th meeting.
	RC decided to close the file 4790-FI/9(3)/2014 as the applicant has not responded within the stipulated time period.
10.28	Follow up action on the agendas of 420th RC meeting and on other agendas in various RC meetings.
	RC directed Secretariat to bring cases with complete facts and presentation may be made in next RC.
10.29	Consideration of application for import permits for Boric Acid for non-insecticidal use.
	This agenda shifted to agenda item no. 10.4.

10.30	Consideration of application of M/s BASF India Ltd. For registration of <i>Alphacypermethrin 30g/l + Flufenoxuron 30g/l SC</i> formulation for import u/s 9(3) of Insecticides Act 1968
	The Committee deliberated the agenda in detail and noted the status of registration of the product in other countries. The Committee noted that Flufenoxuron is banned in EU countries and Flufenoxuron containing products are not registered in USEPA. Further, this product is approved for use through Professional Operators in countries where registered and the applicant inspite of communicating many a times have not submitted intention to use the product through Pest Control Operators. The Committee was appraised that the product is not approved under WHO prequalified scheme and that the applicant has not submitted data as per the decision in 416 th RC meeting and instead has again requested for waiver of studies. Hence, the Committee decided to close the application.
10.31	Follow up status of appeal No.12 of 2019 filed by M/s Spectrum Ethers Ltd. Against CIB&RC for file No.29-TIM/9(4)/2011-CIR-I.
	RC deliberated the agenda and decided to give the last opportunity and applicant may be asked to submit the deficiency reply within 30 days or else the file will be closed.
10.32	List of closure of files in Toxicology {Consultant (Path)} which are deficient as per 400th RC meeting regarding.
	RC deliberated the matter and directed the concerned expert to bring status with complete facts in the next RC.
10.33	Consideration of application for import permits for multiuse insecticides (other than Boric Acid) for non-insecticidal use.
	This agenda shifted to item no. 10.5.
10.34	Online applications of FIM 9(4) were deliberated in 414th, 415th, 417th & 418th RC agenda.
	RC noted for the list of 414 th , 415 th , 416 th , 417 th & 418 th RC agenda regarding details of technical consent providers at Annexure 10.34.1, 10.34.2, 10.34.3, 10.34.4, 10.34.5
10.35	Follow up action of 420th RC agenda item No.3.3 report of the in-house committee on objections/suggestion received from the stack holders on draft Gazette Notification SO 531(E) dated 31.01.2020 regarding banning of <i>Tricyclazole</i> and <i>Buprofezin</i>
	The RC perused the report of the sub-committee, and deliberated it in detail and accepted the recommendations for onward transmission to DAC&FW.
11.0	Any Other item
11.1	Amendments of labels and leaflets as per Insecticides Rules 1971 vide notifications GSR 782 (E) dt 14.10.2020 and GSR 355(E) dt 05.06.2020.
	RC deliberated the issue and observed that in view of the Central Government had published gazette notification GSR 782 dt 14.10.2019 for amendments in label and leaflets of pesticides as per the provisions of Insecticides Rules 1971. Various representations were received from various pesticides industries and associations regarding the practical difficulties faced in the implementation of the above said rules and to extend the timeline given for implementation. Central Government after considering all the objections and suggestions has published another notification GSR 355 dt 05.06.2020 with the intention of resolving the issues of

practical difficulties in printing the label and timeline extended for 3 months.

However, the above notifications GSR 782 and GSR 355 have been challenged by few pesticide associations in the Hon'ble High Court of Delhi vide writ petition WP 4136/2020 and 4137/2020.

On the directions of the Hon'ble High court to resolve few remaining issues, a meeting was held under the chairmanship of JS (PP) on 22.07.2020 with all stake holders including the petitioners.

The issues raised by the stakeholders in the meeting were deliberated one by one and clarifications were provided to the stake holders during the meeting on each issue. The minutes of meeting held on 22.07.2020 are attached at **Annexure 11.1.1**.

RC deliberated the issues raised in the meeting and agrees to the clarifications provided by the central government in toto. Further, RC emphasized that the amendments in label and leaflet shall be carried out as per the decision taken in 417th RC meeting with in the specified time line.

Annexure 4.1.1**List of cases of Export of Pesticides Registration**

Report
on
Persistence Studies in Plant

By

**The Expert Committee under the
Chairmanship of Dr. K.K. Sharma,
Network Coordinator, ICAR-AINP on
Pesticide Residue, ICAR-IARI, New Delhi
28th November, 2018**

To

**Dr. S.K. Malhotra, Agriculture Commissioner,
DAC&FW & Chairman, Registration
Committee, Krishi Bhawan, New Delhi**

REPORT OF THE EXPERT COMMITTEE UNDER THE CHAIRMANSHIP OF DR KK SHARMA, NETWORK COORDINATOR, ICAR-AINP ON PESTICIDE RESIDUE, IARI, NEW DELHI, ON THE PERSISTENCE STUDIES IN PLANT

The Registration Committee (RC) in its 380th meeting held on 20-11-2017, while deliberating the deferred Agenda item no. 9.25 of 379th meeting of RC, constituted the following expert Committee

1. Dr KK Sharma, Network Coordinator, ICAR-AINP on Pesticide Residue, IARI, ND
- Chairman
2. Dr Archana Sinha, Joint Director (Chem), DPPQS, Faridabad - Member
3. Dr Subhash Kumar, Deputy Director (WS), DPPQS - Member Secretary

The Committee co-opted the following Members in various meetings.

4. Dr Vandana Tripathy, Senior Scientist, AINP on Pesticide Residue, ICAR-IARI, ND
5. Dr CS Rao, Director, Pesticide Management, NIPHM, Hyderabad;

6. Dr PG Shah, Residue Analyst, Pesticide Residue Laboratory, Anand Agriculture University, Anand
7. Dr Balwinder Singh, Consultant, MPRNL, Ex-Director Research, PAU, Ludhiana;
8. Dr JK Dubey, Professor, Dr YS Parmar University of Horticulture & Forestry, Solan
9. Dr Saudamini Mohapatra, Principal scientist, ICAR-IIHR, Bengaluru

The TOR of the Committee has been: -

- (i) To suggest the Field Persistence studies in plant and their analytical test studies in plant samples, issues raised in Agenda of RC
- (ii) The committee can co-opt any other expert as deemed fit for the purpose and shall submit its report within 60 days.

The following issue were raised in the 389th meeting of RC while deliberating the deferred Agenda item no.9.25 of 379th meeting: -

RC has approved various laboratories for Bio-efficacy, Persistence studies and Residue studies for the purpose of registration of pesticides. With respect to residue data, field studies are carried out in SAU and/or ICAR institutes and analytical test studies are carried out in the RC approved laboratory(ies). However, for persistence data, many of the RC approved laboratories are carrying out field studies themselves. Therefore, requirement of guidance was sought from RC, whether, these laboratories are approved by RC to conduct Analytical test of the samples only or to carry out the field studies along with analytical test of the samples.

The committee deliberated these issues during the meetings held on 18.05.2018, 25.06.2018, 10.08.2018 and 05.10.2018. The lists of participants are enclosed at **Annexure-1** .

The Committee recommends the following: -

1. For registration of pesticides, for data generation on persistence in plant; and residues in plant and soil, Field experiments should be carried out by the ICAR Institutes /SAUs only. IPFT, Gurgaon; and UPASI (for Tea only) institutes are already approved by the RC to carry out the field studies w.r.t. bio-efficacy including Residues.
2. All the Samples collected from field experiments should get analyzed from the nearest laboratory(ies) of ICAR/SAU which are NABL accredited or holding GLP certification or RC approved, for analytical studies of the pesticides persistence and residues. It is recommended that RC may approve only NABL accredited or GLP certified laboratory(ies) for analysis of pesticide residues.

3. The Committee decided to develop a SOP for Persistence in Plant and Residues in Plant & Soil to address the issue in totality.
4. The Expert Committee recommends that as per the critical GAP of CODEX, the residue and persistence data may be generated at recommended dose, 25 % higher than recommended dose, and control for registration purposes.
5. Accordingly, MRL may be fixed by the FSSAI based on the data generated at 125% of the recommended dose, as per the international practice.
6. Regarding LOQ for the sensitivity of the method, the Committee recommends that the LOQ may be proposed by the applicant firm, however, final LOQ of a pesticide should be reported by the laboratory as per the acceptable recovery achieved, under intimation to applicant firm.
7. The committee observed and recommends that requirement of processing factor arises only, if residues of a pesticide are likely to be higher in the processed raw food, consumed by the public e.g. Rice, Tea, Chillies, Pepper etc.
8. The Persistence (decline study) and Residue data must be generated under Indian conditions.
9. The Committee framed & recommended the SOP consisting following guidance documents: -
 - (A) Good agricultural practices for persistence and residue field studies **(Appendix-A)**
 - (B) Protocol for sampling for residue and persistence analytical test studies **(Appendix-B)**
 - (C) Guidelines for Persistence and Residue analytical test studies **(Appendix-C)**
10. The Committee recommends that these Guidance documents shall replace the existing Protocol for Residue Studies in the Gaitonde Committee Report of 30th November, 1978 and further amendments by RC made earlier to this report.

Annexure-1

List of Participants in the 1st meeting of the Expert Committee held on 18-05-2018 in PC Cell at ICAR-IARI, New Delhi

1. Dr KK Sharma, Network Coordinator, AINP on Pesticide Residue, ICAR-IARI, ND
- Chairman
2. Dr Archana Sinha, Joint Director(Chem), DPPQS, Faridabad - Member
3. Dr Vandana Tripathy, Senior Scientist, AINP on Pesticide Residue, ICAR-IARI, ND
-Co-opted member
4. Dr Subhash Kumar, Deputy Director (WS), DPPQS - Member Secretary

List of Participants of the 2nd meeting of the Expert Committee held on 25-06-2018 in PC Cell at ICAR-IARI, New Delhi

1. Dr KK Sharma, Network Coordinator, AINP on Pesticide Residue, ICAR-IARI, ND
- Chairman
2. Dr Archana Sinha, Joint Director(Chem), DPPQS, Faridabad - Member
3. Dr VandanaTripathy, Senior Scientist, AINP on Pesticide Residue, ICAR-IARI, ND
-Co-opted member
4. Dr CS Rao, Director, Pesticide Management, NIPHM, Hyderabad;
-Co-opted member
5. Dr PG Shah, Residue Analyst, Pesticide Residue Laboratory, Anand Agriculture University, Anand
-Co-opted member
6. Dr Balwinder Singh, Consultant, MPRNL, Ex-Director Research, PAU, Ludhiana;
-Co-opted member
7. Dr Subhash Kumar, Deputy Director (WS), DPPQS - Member Secretary

List of Participants of the 3rd meeting of the Expert Committee held on 10-08-2018 in PC Cell at ICAR-IARI, New Delhi

1. Dr KK Sharma, Network Coordinator, AINP on Pesticide Residue, ICAR-IARI, ND
- Chairman
2. Dr VandanaTripathy, Senior Scientist, AINP on Pesticide Residue, ICAR-IARI, ND
-Co-opted member
3. Dr PG Shah, Residue Analyst, Pesticide Residue Laboratory, Anand Agriculture University, Anand
-Co-opted member
4. Dr Balwinder Singh, Consultant, MPRNL, Ex-Director Research, PAU, Ludhiana;
-Co-opted member
5. Dr Subhash Kumar, Deputy Director (WS), DPPQS - Member Secretary

List of Participants of the 4th meeting of the Expert Committee held on 05-10-2018 in PC Cell at ICAR-IARI, New Delhi

1. Dr KK Sharma, Network Coordinator, AINP on Pesticide Residue, ICAR-IARI, ND
- Chairman
2. Dr Archana Sinha, Joint Director(Chem), DPPQS, Faridabad - Member
3. Dr VandanaTripathy, Senior Scientist, AINP on Pesticide Residue, ICAR-IARI, ND
-Co-opted member
4. Dr PG Shah, Residue Analyst, Pesticide Residue Laboratory, Anand Agriculture University, Anand
-Co-opted member
5. Dr Balwinder Singh, Consultant, MPRNL, Ex-Director Research, PAU, Ludhiana;
-Co-opted member
6. Dr JK Dubey, Professor, Dr YS Parmar University of Horticulture & Forestry, Solan
-Co-opted member
7. Dr Saudamini Mohapatra, Principal scientist, ICAR-IIHR, Bengaluru
-Co-opted member
8. Dr Subhash Kumar, Deputy Director (WS), DPPQS - Member Secretary

Appendix-A

(A) GOOD AGRICULTURAL PRACTICES (GAP) FOR PERSISTENCE AND RESIDUE FIELD STUDIES

Good Agricultural Practices (GAP) are on-farm and post-harvest practices to be followed by farmers at farm level for safe and healthy food production. The components of GAP include principles and practices to be followed from seed including soil management, water management, agronomic practices etc., and finally food intended for human consumption. The GAP of DAC&FW /ICAR / SAU can be followed for conducting the trials.

The ever increasing population in India requires more food to feed the nation, and in addition to food security, the safe food production plays very vital role for human safety as modern agriculture utilize agro-chemicals for harvesting high crop yields. This can be achieved by the judicious and scientific application of pesticides to manage the target pests on crops and also to meet the food safety standards.

Pesticides are one of the most important agricultural input for crop protection, which is of concern for food safety. Supervised trials for residue studies should be conducted as per the pesticide recommendations / approved uses as per the Insecticide Act, 1968. The pesticides in GAP include nationally recommended dosages against target pest on specific crop, time of application and method of application under actual conditions necessary for effective pest control and to observe the pre-harvest interval (PHI). Approved uses of pesticides vary from country to country in a particular crop against target pest, and in some cases, vary from region to region. The use of pesticides in GAP should be within the range and level of highest authorized use, and authorized safe use at national level which not only include use on crops but also in any stage of storage, transport, distribution and processing of food commodities.

Supervised field trials in crops are conducted to determine pesticide residue levels in or on raw agricultural commodities, including feed items, and should be designed to reflect pesticide use patterns that lead to the highest possible residues according to GAP. On the basis of the supervised field trials, the Supervised Trials Median Residue (STMR), Highest Residue (HR) and the Maximum Residue Limit (MRL) are estimated. All three residue estimates are used in dietary risk assessment, while the MRL is also used for monitoring whether the pesticide is used in compliance with the label (i.e. with GAP). The selection of supervised trials, which correspond to the critical GAP (cGAP) and suitable for estimation of MRL, STMR and HR values, is one of the most important phases of the evaluation of pesticide residues. The critical GAP refers to the worst scenario where there is a possibility of deviation from the recommended GAP, for example, application of pesticides at higher doses based on the geographical situations, crop canopy and pest incidence. In case of residue studies, it is desired to take up the studies at both recommended and 25 % higher than the recommended doses for pesticide applications for desired aim to achieve the food safety, through risk analysis at highest dose applications. The critical GAP is the set of current registered (or proposed)

uses involving the highest rates and shortest PHIs for the same pesticide on the same crop. The use patterns in the supervised field trials should reflect this critical GAP.

The Indian Good Agricultural Practices (INDGAP) document (<http://qcin.org/documents/GAP/INDIAGAP-FINAL.pdf>) can be referred in addition to DAC&FW /ICAR / SAU package of Practices for conducting supervised field trials in India wherein critical GAP can be considered as 25 % higher than recommended application dose.

FIELD TRIAL PARAMETERS:

Number of trials:

Prior to planning of the field trials for residue studies, the required number of field trials and number of locations are decided to obtain sufficient data for requisite statistical analysis. The number of field trials and samples is dependent on the variability of pesticide use conditions, geographical distribution, the consequent variation of the residue data, and importance of the commodity in terms of production, trade and dietary consumption.

Field trials should be conducted in agro-ecological and geographical regions where the crops are predominantly grown commercially and should reflect the main types of crop production practices, which can significantly impact residues, for example, furrow and sprinkler irrigation, pruning of grape leaves. Similarly, in case of soil applied pesticides, since soil type influence the pesticide dynamics, the field trials should include field sites with different soil types.

Presently, as per requirements of the Central Insecticide Board and Registration Committee (CIB&RC) for residue data generation in/on a crop, trials in four locations in one season has to be conducted for residue studies of insecticides and fungicides, while in case of herbicides, residue data from three locations for two seasons is required. In general, the number of trials for any crop is 4 to 6.

For stored products (e.g., potatoes, grains, seeds, fruits), post-harvest treatment should be carried out in a number of storage locations with variable conditions such as temperature, humidity, storage method (stacks/boxes) etc., provided the product use is not intended for stored products in controlled environmental conditions.

Plot Size:

The plot size may vary from crop to crop, but it should be large enough to allow application of test pesticide simulating use by farmers in general and provide sufficient representative sample. Each plot size should be minimum 20 m² for row crops, 4 trees for orchard crops and 8 vines for vineyard crops. Control plot should be in the immediate vicinity of the treated plots and utmost care should be taken to avoid contamination / spray drift. For this purpose adequate buffer zones be left in between adjacent plots. The number of plots (replications) for each treatment in each location has to be at least three.

Crop Variety:

The pesticide behavior varies from variety to variety of the same crop, based on various morphological and physiological characters such as hairiness, smoothness, surface texture, crop canopy, erectness, early ripening, late maturity etc., which may have impact on uptake and degradation of pesticide and their metabolites. The pesticide behavior on the same crop changes in different seasons. It is not possible to conduct trials on all varieties / hybrids of the same crop, however, most popular, highly preferred and consumed variety during high production season should be considered for residue trials.

Location:

The field trials should be conducted in different agro-climatic zones, where the crops are predominantly grown commercially following the GAP.

Other field operations:

While conducting the field trial, the general agricultural practices such as inter-cultivation, irrigation, fertilizer application, weeding, pruning *etc.* shall be followed as per the recommended practices, so that residue dynamics will not alter, and such operations shall be performed in the same manner in all plots and trials.

Pesticide applications:

The application of pesticides using approved application equipments or commonly used sprayer ensures that the spray solution is equally spread across the field and simulates the commercial field application of a farmer's field.

The spray solution should be prepared fresh as per the recommended guidelines. Sufficient spray solution should be used to cover the entire field so as to reach the target site / pest, and necessary care must be taken by the person, who is spraying to ensure safety. The pesticide application should not be made in strong wind, during rain or when rainfall is expected shortly after application.

The dose of pesticide, number of application and spray solution concentration should be as per approved use of pesticide as per Insecticide Act, 1968, and however, in all trials, it is desired to conduct trials with minimum three treatments *viz.* control, recommended dose, and 25% higher than the recommended dose with three or more replications (cGAP).

Appendix-B

(B) PROTOCOL FOR SAMPLING FOR PERSISTENCE AND RESIDUE ANALYTICAL TEST STUDIES

1. General Recommendations

The best information about the residue behavior of the pesticide under study would be obtained by the analysis of the entire yield of a plot. Since this is not practicable, representative samples have to be taken. Careful attention to the details of sampling is essential if worthwhile samples are to be obtained. Valid analytical results can only be obtained if the samples have been properly taken, dispatched and stored before analysis.

In selecting sampling points and/or the sampling method, all factors that control the residue distribution over the entire experimental plot must be considered. The best approach for any given plot can only be determined by a sufficiently trained person who is capable of recognizing the importance and usefulness of the residue data sought, and who can interpret the results.

The samples must be representative to enable the analytical result to be applied to the entire experimental unit. The greater the number of plants sampled in a field plot, the more representative the sample will be. However, economics and the practical problems involved in handling large samples affect the magnitude of the sampling programme. The size of sample suggested is the minimum that experience has shown is needed to give a representative, valid sample. The sizes are not usually dictated by the analytical method, which can often determine minute amounts of pesticides in small amounts of sample.

1.1 Method of Sampling

Generally, the selection of the portions that make up the field sample should be made depending on the circumstances:

- randomly, e.g. by the use of random numbers
- systematically, e.g. in the case of field crops on a diagonal ("X" or an "S" course)
- selectively from predetermined sampling-points, e.g. in the case of tree fruits, take both exposed samples and those covered by foliage so that each fruit has an equal chance of being taken.

Points to be borne in mind are:

- Avoid taking samples at the beginning or at the extreme end of plots (start and finish of spraying).
- Take and bag the required weight or number of samples in the field and do not subsample until the samples are in a clean field laboratory or in the analytical laboratory.
- Sample all parts of the crop that can be consumed by humans or livestock.
- Sample the parts of the crop that normally constitute the commercial commodity are described.
- Where appropriate, consider commercial harvesting practice which reflects normal "Good Agricultural Practice".

1.2 Replication

In certain cases where there is likely to be considerable within-plot variation, such as orchard and glasshouse trials, three sample replicates per plot may be taken at or near harvest. Sample integrity should be maintained throughout the procedure.

The Study Plan should prescribe when replicate samples are needed. Replicate samples should be clearly indicated in the sampling and analytical reports.

1.3 Sample Handling

- Take care not to remove surface residues during handling, packing or preparation.
- Avoid any damage to or deterioration of the sample which might affect residue levels.
- To provide a representative sample of the raw commodity, adhering soil may have to be removed from some crops, such as root crops. This may be done by brushing and, if necessary, gentle quick rinsing with cold running water.
- Sample control plots before treated plots.

2. Contamination

It is vital to avoid any contamination with the pesticide under study or with other chemicals during sampling, transportation or subsequent operations. Special attention should, therefore, be paid to the following:

- Ensure that sampling tools and bags are clean. To avoid contamination use new bags and containers of suitable size and adequate strength. The bags or containers should be made of materials which will not interfere with the analysis.
- Avoid contamination of the sample by hands and clothes which may have been in contact with pesticides.
- Do not allow the samples to come into contact with containers or equipment (including vehicles) that have been used for transporting or storing pesticides.

- Avoid sampling at the plot borders because the residue deposit may not be representative.
- Take special care to avoid contamination when commercial mechanical harvesting practices are used.
- Avoid cross-contamination of crop and soil samples.
- Sampling should proceed from the control to the lowest treatment and so on to the highest treatment.

The possibility of spray drift or overlap, especially where the plot is small and particularly when various pesticides and dosages are applied to adjacent areas should be considered and avoided when the experimental plots are marked.

3. Control Samples

Control samples are in every way as important as samples from test plots. The quality of control samples should be similar to that of the test samples, e.g. maturity of fruit, type of foliage, etc.

Always take control samples. In decline studies of up to 14 days' duration, control samples from the start and from the end of the study may suffice.

4. Sampling in Decline (Dissipation) Studies and at Normal Harvest Time

Representative and valid sampling protocols might be different for decline studies and residue trials at normal harvest time.

4.1 Sampling in Decline (Dissipation) Studies

The first sampling may take place on the day of application. These samples have to be taken immediately after application or, in the case of spray application, immediately after the spray has dried (approx. 2 hours).

- Take great care to avoid contamination.
- Take samples so as to be representative of the average size or weight of crop on the plot.

4.2 Sampling at Normal Harvest Time

- Take samples so as to be representative of typical harvesting practice.
- Avoid taking diseased or undersized crop parts or commodities at a stage when they would not normally be harvested.

4.3 Detailed Sampling Procedures

The following recommendations refer to the sampling for persistence and residue studies. unless otherwise stated.

4.3.1 Fruits and Tree Nuts

- Circle each tree or bush and select fruit from all segments of the tree or plant, high and low, exposed and protected by foliage. For small fruits grown in a row, select fruit from both sides, but not within 1 meter of the end of the row.

- Select the quantity of the fruit according to its density on the tree or plant, i.e. take more from the heavily-laden parts.
- Take both large and small fruits where appropriate, but not so small or damaged that they could not be sold (except when taking immature samples for a residue decline study).
- Take samples of fruit juices, cider and wine in a manner reflecting common practice.

Table1: Sampling of fruits

Commodity	Quantity, method of collection
Citrus fruits e.g. orange, lemon, mandarin, pomelo, grapefruit, clementine, tangelo, tangerine	12 fruits from several places on 4 individual trees.
Pome fruits e.g. apples, pears, quinces, medlars	(If this produces a sample weight of less than 2 kg, more fruit should be taken to yield a 2 kg sample)
Large stone fruit e.g. apricots, nectarines, peaches, plums	
Miscellaneous fruit e.g. avocados, guavas, mangoes, papayas, pomegranates, persimmons, kiwifruit, litchi	
Small stone fruit e.g. cherries	1 kg from several places on 4 trees
Grapes	12 bunches, or parts of 12 bunches, from separate vines to give at least 1 kg
Currants, raspberries and other small berries	0.5 kg from 12 separate areas or bushes
Strawberries, Gooseberries	1 kg from 12 separate areas or bushes
Miscellaneous small fruits e.g. olives, dates, figs	1 kg from several places on 4 trees
Pineapples	12 fruits
Bananas	24 fruits. Take two fingers each from top, middle and lowest hand of four harvestable bunches
Tree nuts e.g. walnuts, chestnuts, almonds	1 kg
Coconut	12 nuts
Fruit juices , wine, cider	1 litre

4.3.2 Vegetables

4.3.2.1 Bulb vegetables, root vegetables, tuber vegetables:

- Take samples from all over the plot, excluding 1 meter at the edges of the plot and the ends of the rows. The number of sampling points depends on the sample size of the crop (see below).

- To provide a representative sample of the raw commodity, adhering soil may have to be removed. This may be done by brushing and, if necessary, gentle rinsing with cold running water.
- Trim off tops according to local agricultural practice. Details of any trimming should be recorded. Where the tops are not used as animal feed (carrots, potatoes) they should be discarded; otherwise (e.g. turnips, beets) they should be bagged separately.

Table 2 : Sampling of bulb, root and tuber vegetables

Commodity	Quantity, method of collection
Fodder beets, Sugar beets	12 plants
Potatoes	12 tubers (the sample should weigh at least 2 kg - where necessary, take a larger number to produce a 2 kg sample). For decline study take 1 Kg of sample
Other root crops e.g. carrots, red beet, Jerusalem artichoke, sweet potato, celeriac, turnip, swede, parsnip, horseradish, salsify, chicory, radish, scorzonera	12 roots (the sample should weigh at least 2 kg - where necessary, take a larger number to produce a 2 kg sample)
Leeks, Bulb onions	12 plants
Spring onions	24 plants (the sample should weigh at least 1 kg - where necessary, take a larger number to produce a 2 kg sample)
Garlic, Shallots	12 bulbs from 12 plants, (the sample should weigh at least 1 kg - where necessary, take a larger number to produce a 1 kg sample)

4.3.2.2 Brassica vegetables, leafy vegetables, stalk and stem vegetables, legume vegetables and fruiting vegetables:

- Take the sample from all parts of the plot, leaving 1 meter at the edges and ends of rows. The number of sampling points depends on the sample size of the crop (see below).
- Sample items of crops such as peas or beans protected from the spray by foliage and also from parts exposed to the spray.
- To provide a representative sample of the raw commodity, adhering soil may have to be removed. This may be done by brushing and, if necessary, gentle rinsing with cold running water.
- Do not trim except for the removal of obviously decomposed or withered leaves. Details of any trimming should be recorded.

The quantities to be taken are shown in Table 3.

4.3.3 Grasses

4.3.3.1 Cereals

- If the plot is small, cut the whole yield.

- If the plot is large but mechanical harvesting is not carried out, cut not less than twelve short lengths of row chosen from all over the plot. Cut stalks 15 cm above the ground and remove the grain from the straw.
- Care should be taken to avoid contamination when mechanical methods are used to separate the parts of the crop. The operation is best carried out in the laboratory.
- If the plots are harvested mechanically, take not less than twelve grab samples of grain and/or straw from the harvester at uniform intervals over the plot.
- Do not sample within 1 meter of the edges of the plot.

The quantities to be taken are shown in Table 4.

4.3.3.2 Grasses, forage and animal feed:

- Cut with shears at normal harvest height (usually 5 cm above the ground) the vegetation from not less than twelve areas uniformly spaced over the entire plot, leaving 1 meter at the edges of the plot.
- Record height of cutting and avoid soil contamination.
- Crops which are harvested mechanically can be sampled from the harvester as it proceeds through the crop.

The quantities to be taken are shown in Table 5.

4.3.3.3 Sugar cane

Select 5 whole canes at maturity stage from the plot and take short (e.g. 20 cm) sections from all parts of the length of the canes. For cane juice samples, care is necessary owing to the rapid changes which normally occur in cane juices. If required, 1 liter samples of juice should be taken and frozen immediately and then shipped in cans.

Table 3. Sampling of other vegetables

Commodity	Quantity, method of collection
Large Brassica crops e.g. cabbage, cauliflower, kohlrabi	12 plants
Broccoli	1 kg from 12 plants
Brussels sprouts	1 kg from 12 plants. Buttons to be taken from at least two levels on each plant.
Cucumbers	12 fruits from 12 separate plants
Gherkins, courgettes, squash	12 fruits from 12 plants (the sample should weigh at least 2 kg - where necessary take a larger number of fruit to produce a 2 kg sample)
Melons, gourds, pumpkins, watermelons [§]	12 fruits from 12 separate plants
Egg plants (aubergines)	12 fruits from 12 separate plants
Sweet corn	12 ears (the sample should weigh at least 2 kg -where

	necessary take a larger number of items to produce a 2 kg sample.)
Mushrooms	12 items (the sample should weigh at least 0.5 kg -where necessary take a larger number of items to produce a 0.5 kg sample)
Tomatoes, Peppers	24 fruits from small-fruited varieties, 12 from large fruited varieties. From 12 plants in all cases. (The sample should weigh a minimum of 2 kg - where necessary take a larger number of items to produce a 2 kg sample.)
Endive ^a	12 plants
Lettuce ^a	12 plants
Spinach ^a , Chicory leaves ^a	1 kg from 12 plants
Kale	2 kg from 12 plants sampled from two levels on the plant
Small-leaf salad crops e.g. cress, dandelion, corn salad	0.5 kg from 12 plants (or sites in plot)
Peas, Phaseolus beans e.g. French, kidney, runner	1 kg (fresh green or dry seed as appropriate)
Pulses e.g. dried broad beans, field beans, lentils, soya beans	1 kg
Celery	12 plants
Asparagus, Rhubarb	12 sticks from 12 separate plants.(the sample should weigh a minimum of 2 kg where necessary take a larger number of sticks to produce a 2 kg sample)
Globe artichoke	12 heads
Fodder crops	2 kg from 12 separate areas of plot. (Crops harvested mechanically can be sampled from the harvester as it proceeds through the crop.)
Oilseed e.g. rape seed, mustard seed, poppy seed	0.5 kg from 12 plants (or sites in plot)

Note: (a) also at immature stages during decline studies

In case of large crops, a sample consisting of 12 units could be 50-100 kg or more. In such cases the sample size may be reduced to 5 units.

Table 4: Sampling of cereals

Commodity	Quantity, method of collection
Cereal grains e.g. wheat, barley, oats, rye, triticale and other small grain cereals; maize (off the cob), rice, sorghum	1 kg

Straw of the above crops	0.5 kg
Maize straw, fodder and forage (mature plants excluding cobs)	12 plants. (Cut each stem into three equal lengths (with leaves attached). Take top portion from stems 1 to 4, middle portion from stems 5 to 8 and bottom portion from stems 9 to 12, thus ensuring that parts of all 12 stems are included in the sample.)
Green or silage maize	12 plants. (Cut each stem and subsample as in previous item, retaining any cobs present on the appropriate portions of stem.)
Maize cobs	12 ears. (The sample should weigh at least 2 kg - where necessary, take a larger number of ears to produce a 2 kg sample.)

Table 5 : Sampling of forage crops and animal feed

Commodity	Quantity, method of collection
Green forage/silage crops of alfalfa, clover, pea and bean forage, vetch, sainfoin, lotus, soybean fodder and forage, rye forage, fodder cereals, sorghum forage	1 kg
Dry hay of the above crops	0.5 kg

4.3.4 Seeds

Use essentially the same technique as for cereals, taking samples of mature seed from at least twelve parts of the plot. Where the sample is harvested by hand, seed should normally be sent to the laboratory in the pod. Where mechanical harvesting is used, only the seed should normally be supplied.

Cotton seed:

- Pick the cotton at the normal stage of harvesting. Take 1 kg, with or without fibre.

Peanuts:

- Collect at the normal stage of harvesting. Take 1 kg.

Sesame seed, rape seed:

- Collect the pods when they have reached the stage of maturity at which they are normally harvested. Take 0.5 kg.

Sunflower seed, safflower seed:

- Where the sampling is done by hand select ripe heads. Where it is done mechanically submit the seed to the laboratory. Take 12 heads or 1 kg of seed.

Coffee and cacao beans:

- Take samples in a manner reflecting common practice, quantity 1 kg. - The freshly harvested produce is not normally required.

4.3.5 Herbs and Spices; Tea Leaves; Hops; Beer

- Take samples in a manner reflecting common practice.
- The freshly harvested produce is not normally required for tea although herbs, such as parsley and chives, should be sampled fresh. In the case of hops, both fresh and dried cones should be supplied.

Table 6: Sampling of Herbs and Spices; Tea Leaves; Hops and Beer

Commodity	Quantity, method of collection
Garden herbs and medicinal plants e.g. parsley, thyme	0.5 kg fresh 0.2 kg dry
Teas (dry leaves)	0.2 kg
Hops (dry cones)	0.5 kg
Beer	1 litre

5. Sampling processed commodities

Where a commodity is normally processed between harvest and marketing, for example by milling, pressing, fermentation, drying or extraction, data may be required on the processed crop or its products. Details of the processing method should be supplied with the samples together with storage and handling histories. In such cases, the trials should be designed to provide samples with appropriate residue levels so that the fate of residues can be studied during the processing. Sample separately any cleanings, husks or by-products which could be used for animal feed.

6. Sampling stored commodities

Supervised trials of post-harvest treatments of stored products should be carried out over a wide range of storage facilities, and the sampling technique must be carefully chosen if valid samples are to be obtained. Procedures for taking valid samples from most commodities in storage units are well established. Such procedures are acceptable in sampling for pesticide residue analysis and may be used if adequate references are given.

The sampling procedures are usually designed for three kinds of storage conditions.

6.1 Sampling from bulk

Obtaining a representative sample from a (large) bulk container (e.g. of cereal grains) is difficult: if possible, samples should be taken at frequent intervals from the stream during transfer into another container. A probe sample is not representative but may be acceptable if:

- it is possible to reach every part of the storage container; and
- a larger number of individual samples are taken before mixing and reducing to produce a final sample.

Pesticide residues are normally higher in the dust fraction and this should be recognised in the sampling procedure.

6.2 Sampling bagged commodities

Sampling of the commodity within a bag must be random. A representative sample from a large stack of bags can be obtained only if every bag is accessible. This is not always possible in practice and the alternative is to obtain a sample from a number of randomly chosen bags by probing. Since pesticide treatments are often directed to the surface of the bag, selective sampling to show the effect of the position of the bag in the stack and the penetration of the pesticide into the bag may be necessary.

6.3 Sampling fruit and vegetables in packing houses

Where post-harvest treatments are applied to fruit and vegetables in packing houses, an adequate number of samples must be taken to determine the range of residue levels resulting from variations in the treatment process. The effects on residue levels of concentration, temperature, duration of treatment, drying (after dip treatments) and subsequent handling may need to be considered.

Post-harvest treated fruit and vegetables should be kept in, or packed in, commercial containers or punnets and stored at ambient or cool-room temperature according to normal commercial practice. Samples should then be drawn for analysis from the commercial containers at suitable intervals representing the time expected between treatment and subsequent marketing. The rate of disappearance or degradation of some residues depends on whether the commodity is held in a sealed or partly sealed container or is open to the air.

The size of samples are the same as shown in Tables 1 - 3.

7. Sample size reduction

Large samples cannot be handled economically, especially if freezing and long transport are involved. Take only that amount prescribed in the Study Plan.

Except cereal grains sampled on the conveyor belt or from the stream of material transferred from one large container to another, mixing of samples and sample size reduction at the field site is not recommended and should be avoided.

8. Sample packing and storage

Once packed and labelled, samples may be stored or immediately sent to the Residue Laboratory according to the nature of the sample, the stability of the residue and the kind of study undertaken.

It is important that packing and shipment are carried out in such a way that the samples arrive as soon as possible (normally within 24-36 hours) after being taken and without change of any kind, e.g. deterioration, physical damage, contamination, loss of residue, or change in moisture content.

Storage and shipping should always be under deep-frozen conditions.

8.1 Packing

8.1.1 Containers

Individual samples should be placed in suitable containers, e.g. heavy polyethylene bags, and then put inside additional heavy paper bags and, where necessary, frozen or refrigerated as soon as possible after sampling according to the nature of the chemical involved. Polyethylene bags alone may become brittle in contact with dry ice and therefore there is a risk of breakage and subsequent loss of the sample.

Avoid other plastic containers, or plastic-lined caps, unless made of "Teflon" or other inert plastic which does not interfere with the analytical method; laboratories have frequently experienced such interference, and PVC bags should be avoided. If cans are used, they should first be checked to demonstrate the absence of materials such as oil films, lacquers or resin from soldered joints that could interfere with analyses.

Glass containers should be used for liquid samples and should be thoroughly cleaned and rinsed with one or more suitable pesticide-free solvent such as acetone, isopropyl alcohol or hexane, and dried before use. Pesticides can migrate to the walls of a container and be adsorbed; hence even a glass container, after the sample is poured out, should be rinsed with solvent if the extraction is not made in the container itself.

In summary, any type of container or wrapping material should be checked before use for possible interference with the analytical method and at the limit of determination of the analysis.

Fasten boxes securely with strong twine, rope or tape.

8.1.2 Shipment of samples

Non-perishable commodities containing residues that are known to be stable over the period required to reach the laboratory can be shipped in a non-frozen state, but samples should be protected against any effects which might cause degradation or contamination.

Where samples need to be frozen, use shipping containers of polystyrene foam, if available, as they are excellent for this purpose. If not available, use two cardboard boxes of slightly different size with insulation between. Proper insulation is essential to ensure samples arrive at the residue laboratory still frozen. Sufficient dry ice must be used for some to remain when samples are received at the residue laboratory. This usually requires a minimum of one kg of dry ice per kg of sample. For journeys lasting more than two days, two kg of dry ice or more per kg of sample may be required. Poorly insulated containers require more dry ice. Use caution in handling dry ice (gloves and ventilated work area). Packages must of course comply with transport regulations.

Frozen samples must never be allowed to thaw, either before or during shipment. They must be shipped under conditions that permit their arrival at the residue laboratory still solidly frozen.

Advise the consignee by telegram or telex of the full details of shipment of samples, including shipping document numbers and flight numbers, so that delay in delivery to the laboratory is avoided.

When samples have to be shipped across national boundaries, quarantine regulations must be observed and appropriate permits obtained well in advance of dispatching samples.

8.2 Labels and records

Label each sample with the appropriate sample identification. The label and ink should be such that the writing will not be illegible if the label becomes wet. Attach the label securely so that it cannot come loose during shipment, and place the label so that it will not become wet from condensation.

Complete the Sampling Report (residue data sheets) clearly and accurately with all the requested trial details. Failure to do so may mean that data will not be acceptable. The completed sheets should be protected by enclosing them in protective polythene bags which should be sent with the sample. Duplicate sheets should be kept by the sender.

Use a label on the outside of the shipping container stating the following:

"Perishable Goods: Deliver immediately upon arrival" and "This material is not fit for human consumption".

8.3 Sample reception and handling

Immediately upon arrival of the samples, the Residue Laboratory personnel should:

- Verify that the copy of the Sampling Report is included with the samples.
- Check and report on the condition of the samples.
- Check to see that the samples match the details of the Sampling Report.
- Check the Sampling Report for accuracy (especially the rate and interval data) and verify that the information is complete.
- Check the Sampling Report to determine whether any special treatment or testing is indicated.

If there are any deviations of any consequence, or the Sampling Report is not received or is incomplete (in such a way that a proper comparison is not possible), the samples should be stored in the simplest form that will preserve the residue and the crop. The trial organizer should then be contacted immediately to determine how to proceed.

Note: it is dangerous to put packages containing dry ice into deep freeze.

8.4 Storage

Samples should be analysed as quickly as possible after collection before physical and chemical changes occur. If prolonged storage is unavoidable, it is usually preferable to store the samples at a low temperature, preferably at or below -20°C. This removes the residue from contact with enzymes which might degrade the pesticide and also prevents further possibility of residues being "bound" in the tissue. Do not store samples (whole or homogenized) for analysis unless an adequate check has been made on the stability of the residue. Fumigant residue samples need special attention and ideally should be

analysed immediately on receipt at the laboratory. Storage at -20°C is likely to be inadequate to prevent loss of fumigant residues.

Studies of the stability of residues in samples, over the time and at the temperature of storage, should be carried out with representative pesticides and substrates. When there is doubt about the stability of residues in storage, spiked control samples should be held under the same conditions as the samples or extracts.

Light degrades many pesticides; it is therefore advisable to protect the sample and any solutions or extracts from needless exposure. Samples other than water should ordinarily be stored in a freezer, preferably at -20°C or below. Even then, physical and chemical changes may occur either in the sample or in the residues sought. Extended storage in freezers can cause moisture to migrate to the surface of the sample then to the freezer coils, slowly desiccating the sample. This effect may be of importance if water content affects the subsequent analysis and can affect the calculated residue concentration. Water samples should be stored slightly above freezing to avoid rupture of the container as a result of freezing.

PORTION OF COMMODITIES TO WHICH MAXIMUM RESIDUE LIMITS APPLY AND WHICH IS ANALYSED

INTRODUCTION

Maximum Residue Limits are in most cases stated in terms of a specific whole raw agricultural commodity as it moves in international trade. In some instances, a qualification is included that describes the part of the raw agricultural commodity to which the maximum residue limit applies, for example, almonds on a shell-free basis and beans without pods. In other instances, such qualifications are not provided. Therefore, unless otherwise specified, the portion of the raw agricultural commodity to which the MRL applies and which is to be prepared as the analytical sample for the determination of pesticide residues is as described in the following table.

CLASSIFICATION OF COMMODITIES	PORTION OF COMMODITY TO WHICH THE MRL APPLIES (AND WHICH IS ANALYSED)							
ROOT AND TUBER VEGETABLES								
Root and tuber vegetables are starchy foods derived from the enlarged solid roots, tubers, corms or rhizomes, mostly subterranean, of various species of plants. The entire vegetable may be consumed.								
<u>Root and Tuber vegetables:</u>	Whole commodity after removing tops. Wash the roots or tubers in cold running water, brushing gently with a soft brush to remove loose soil and debris, if necessary, and then							
<table border="1"> <tr> <td>Beets</td> <td>rutabagas</td> </tr> <tr> <td>carrots</td> <td>sugar beets</td> </tr> <tr> <td>celeriac</td> <td>sweet potatoes</td> </tr> <tr> <td>parsnips</td> <td>turnips</td> </tr> </table>		Beets	rutabagas	carrots	sugar beets	celeriac	sweet potatoes	parsnips
Beets	rutabagas							
carrots	sugar beets							
celeriac	sweet potatoes							
parsnips	turnips							

potatoes radishes	yams	dab lightly with clean tissue paper to dry. For carrots, after drying the tops are carefully cut off with a knife by cutting through the bottom of the stem at the lowest point of attachment of the outer petioles. If an annulus of root tissue is thereby severed from hollow-crown roots, the material should be re-combined with the roots.
----------------------	------	--

BULB VEGETABLES

Bulb vegetables are pungent, flavorful foods derived from the fleshy scale bulbs or growth buds of alliums of the lily family (*Liliaceae*). The entire bulb may be consumed following removal of the parchment-like skin.

Remove adhering soil (e.g. by rinsing in running water or by gentle brushing of the dry commodity)

Bulb vegetables:

garlic leeks	onions spring onions
-----------------	-------------------------

Bulb/dry onions and garlic: Whole commodity after removal of roots and whatever parchment skin is easily detached. Leeks and spring onions: Whole vegetable after removal of roots and adhering soil.

LEAFY VEGETABLES (EXCEPT BRASSICA VEGETABLES)

Leafy vegetables (except Group 4 vegetables) are foods derived from the leaves of a wide variety of edible plants including leafy parts of Group 1 vegetables. The entire leaf may be consumed. Leafy vegetables of the brassica family are grouped separately.

Leafy vegetables:

beet leaves corn salad endive lettuce	radish leaves spinach sugar beet leaves Swiss chard
--	--

Whole commodity after removal of obviously decomposed or withered leaves.

BRASSICA (COLE) LEAFY VEGETABLES

Brassica (Cole) leafy vegetables are foods derived from the leafy parts, stems and immature inflorescences of plants commonly known and botanically classified as brassicas and also known as Cole vegetables. The entire vegetable may be consumed.

Brassica leafy vegetables:

broccoli Brussels sprouts cabbage cabbage, Chinese cabbage, red	cauliflower collards kales kohlrabi mustard greens
---	--

Whole commodity after removal of obviously decomposed or withered leaves. For cauliflower and headed broccoli analyze flower head and stems, discarding leaves; for Brussels sprouts analyze "buttons" only.

cabbage, Savoy		
STEM VEGETABLES		
Stem vegetables are foods derived from the edible stems or shoots of a variety of plants.		
<u>Stem vegetables:</u>		Whole commodity after removal of obviously decomposed or withered leaves. Rhubarb and asparagus: stems only. Celery and asparagus: remove adhering soil (e.g. by rinsing in running water or by gentle brushing of the dry commodity).
artichoke celery	chicory (witloof) rhubarb	
LEGUME VEGETABLES		
Legume vegetables are derived from the dried or succulent seeds and immature pods or leguminous plants commonly known as beans and peas. Succulent forms may be consumed as whole pods or as the shelled product.		
<u>Legume vegetables:</u>		Whole commodity.
beans broad beans dwarf beans French beans green beans kidney beans Lima beans	navy beans runner beans snap beans soybeans peas cow peas sugar peas	
FRUITING VEGETABLES - EDIBLE PEEL		
Fruiting vegetables - edible peel are derived from the immature or mature fruits of various plants, usually annual vines or bushes. The entire fruiting vegetables may be consumed.		
<u>Fruiting vegetables - edible peel:</u>		Whole commodity after removal of stems.
cucumber egg plant gherkin okra	pepper summer squash tomato mushroom ¹¹	
FRUITING VEGETABLES - INEDIBLE PEEL		
<u>Fruiting vegetables - inedible peel:</u>		Whole commodity after removal of stems.
cantaloupe melon pumpkin	squash watermelon winter squash	
CITRUS FRUITS		
Citrus fruits are produced by trees of the <i>Rutaceae</i> family and are characterized by aromatic oily peel, globular form and interior segments of juice-filled vesicles. The fruit is fully exposed to pesticides during the growing season. The fruit pulp may be consumed in succulent form		

and as a beverage. The entire fruit may be used for preserving.		
FRUITING VEGETABLES - INEDIBLE PEEL		
<u>Fruiting vegetables - inedible peel:</u>		Whole commodity after removal of stems.
cantaloupe melon pumpkin	squash watermelon winter squash	
CITRUS FRUITS		
Citrus fruits are produced by trees of the <i>Rutaceae</i> family and are characterized by aromatic oily peel, globular form and interior segments of juice-filled vesicles. The fruit is fully exposed to pesticides during the growing season. The fruit pulp may be consumed in succulent form and as a beverage. The entire fruit may be used for preserving.		
<u>Citrus fruits:</u>		Whole commodity.
POME FRUITS		
Pome fruits are produced by trees related to the genus <i>Pyrus</i> of the rose family (<i>Rosaceae</i>). They are characterized by fleshy tissue surrounding a core consisting of parchment-like carpels enclosing the seed. The entire fruit, except the core, may be consumed in the succulent form or after processing.		
<u>Pome fruits:</u>		Whole commodity after removal of stems.
apple pear	quince	
STONE FRUITS		
Stone fruits are produced by trees related to the genus <i>Prunus</i> of the rose family (<i>Rosaceae</i>) characterized by fleshy tissue surrounding a single hard-shelled seed. The entire fruit, except seed, may be consumed in a succulent or processed form.		
<u>Stone fruits:</u>		Whole commodity after removal of stems and stones but the residue calculated and expressed on the whole commodity without stem.
apricots cherries sour cherries sweet cherries	nectarines peaches plums	
SMALL FRUITS AND BERRIES		
Small fruits and berries are derived from a variety of plants whose fruit is characterized by a high surface-weight ratio. The entire fruit, often including seed, may be consumed in a succulent or processed form.		
<u>Small fruits and berries:</u>		Whole commodity after removal of

blackberries blueberries boysenberries cranberries currants dewberries	gooseberries grapes loganberries raspberries strawberries	caps and stems. Currants: fruit with stems.
ASSORTED FRUITS - EDIBLE PEEL		
Assorted fruits - edible peel are derived from the immature or mature fruits of a variety of plants, usually shrubs or trees from tropical or subtropical regions. The whole fruit may be consumed in a succulent or processed form.		
<u>Assorted fruits - edible peel:</u>		Dates and olives: whole commodity after removal of stems and stones but residue calculated and expressed on the whole fruit. Figs: Whole commodity.
dates figs	olives	
ASSORTED FRUITS - INEDIBLE PEEL		
Assorted fruits - inedible peel are derived from the immature or mature fruits of different kinds of plants, usually shrubs or trees from tropical or subtropical regions. Edible portion is protected by skin, peel or husk. Fruit may be consumed in a fresh or processed form.		
<u>Assorted fruits - inedible peel:</u>		Whole commodity unless qualified. Pineapples: after removal of crown. Avocado and mangoes: whole commodity after removal of stone but calculated on whole fruit. Bananas: after removal of crown tissue and stalks.
avocados bananas guavas kiwi fruit	mangoes papayas passion fruits pineapples	
CEREAL GRAINS		
Cereal grains are derived from the clusters of starchy seeds produced by a variety of plants primarily of the grass family (<i>Poaceae</i>). Husks are removed before consumption.		
<u>Cereal grains:</u>		Whole commodity. Fresh corn and sweet corn: kernels plus cob without husk.
barley maize oats rice	rye sorghum sweet corn wheat	
STALK AND STEM CROPS		
Stalk and stem crops are various kinds of plants, mostly of the grass family (<i>Poaceae</i>) cultivated extensively as animal feed and for the production of sugar. Stems and stalks used for animal feeds are consumed as succulent forage, silage, or as dried fodder or hay. Sugar crops are processed.		

<u>Stalk and stem crops:</u>		Whole commodity.
barley fodder and straw grass fodders	maize fodder sorghum fodder	
LEGUME OILSEEDS		
Legume oilseeds are mature seeds from legumes cultivated for processing into edible vegetable oil or for direct use as human food.		
<u>Legume oilseeds:</u>		Whole kernel after removal of shell.
peanuts		
LEGUME ANIMAL FEEDS		
Legume animal feeds are various species of legumes used for animal forage, grazing, fodder, hay or silage with or without seed. Legume animal feeds are consumed as succulent forage or as dried fodder or hay.		
<u>Legume and animal feeds:</u>		Whole commodity.
alfalfa fodder bean fodder clover fodder	peanut fodder pea fodder soybean fodder	
TREE NUTS		
Tree nuts are the seeds of a variety of trees and shrubs which are characterized by a hard, inedible shell enclosing an oil seed. The edible portion of the nut is consumed in succulent, dried or processed form.		
<u>Tree nuts:</u>		Whole commodity after removal of shell. Chestnuts: whole in skin.
almonds chestnuts filberts	macadamia nuts pecans walnuts	
OILSEED		
Oilseed consists of the seed from a variety of plants used in the production of edible vegetable oils. Some important vegetable oilseeds are by-products of fiber or fruit crops.		
<u>Oilseed:</u>		Whole commodity.
cottonseed linseed rapeseed	Safflower seed sunflower seed	
TROPICAL SEEDS		
Tropical seeds consist of the seeds from several tropical and semitropical trees and shrubs mostly used in the production of beverages and confections. Tropical seeds are consumed after processing.		
<u>Tropical seeds:</u>		Whole commodity.
cacao beans	coffee beans	

HERBS	
Herbs consist of leaves, stems and roots from a variety of herbaceous plants used in relatively small amounts to flavor other foods. They are consumed in succulent or dried form as components of other foods.	
<u>Herbs:</u>	Whole commodity.
SPICES	
Spices consist of aromatic seeds, roots, fruits and berries from a variety of plants used in relatively small amounts to flavor other foods. They are consumed primarily in the dried form as components of other foods.	
<u>Spices:</u>	Whole commodity.
TEAS	
Teas are derived from the leaves of several plants, but principally <i>Camellia sinensis</i> . They are used in the preparation of infusions for consumption as stimulating beverages. They are consumed as extracts of the dried or processed product.	
<u>Teas:</u>	Whole commodity.

Appendix-C

(C) GUIDELINES FOR PERSISTENCE AND RESIDUE ANALYTICAL STUDIES

Residue analytical method is examined in the laboratory considering its validation criteria. The method should be suitable for the purpose it is used. In order to justify the suitability of the method, various validation steps are required to be performed, e.g., analytical recoveries, impact of matrix interference, limit of quantitation(LOQ), repeatability and reproducibility. It is important to note that the residue analytical method should be able to determine the parent compound as well as the metabolite(s) as per the residue definition used for dietary risk assessment. In such cases, different analytical methods may be required to perform as the specific method sometimes cannot cover the parent compound as well as metabolite(s).

Method validation is a mandatory requirement for the laboratories when methods used are;

- 1) non-standard methods
- 2) designed/developed by laboratory

3) modified (standard methods) or amplified by the laboratory

4) adopted by addition of new analyte(s) or matrix outside the scope of the existing validated method

When a laboratory wants to use a reference method that has been extensively validated (e.g., AOAC, Codex Alimentarius, etc.) is required to confirm that it can properly operate standard method before conducting the reference method. This confirmation can be via "verification" of certain key performance characteristics of the standard method. Thus method verification is a partial validation and hence is less extensive.

The method must be validated to assess linearity, recovery (as a measure of trueness), RSDR (as a measure of precision), limit of detection (LOD) and of quantitation (LOQ), and selectivity (proven by identification-confirmation procedures). Additionally, the effect of each matrix on quantitation should be evaluated and the uncertainty of results must also be estimated.

- **Linearity:** The line generated for each analyte at ≥ 5 concentration levels should be provided, together with the slope, the intercept and correlation co-efficient data. The requirement for a calibration line to be used for quantitation is the correlation coefficient (r) to be > 0.98 over the working range.
- **Trueness:** A minimum of 5 replicates is required to check the recovery at the targeted LOQ or reporting level (RL) of the method, and at least one other higher level, for example, 2-10 times the targeted LOQ or the MRL. Where the residue definition includes more than one analyte, then the method should be validated for all analytes included in the residue definition if compliance with maximum residue levels (MRLs) is to be given in the report. Acceptable mean recoveries are usually those within the range 70–120%. However, in certain cases and typically with multi-residue methods, recoveries outside this range are accepted. These are cases, where recovery is low but consistent, i.e. demonstrating acceptable precision (RSDr values $\leq 20\%$). A correction factor for the recovery should be used in the report for these analytes. Additionally, a proficiency test should be sought for these analytes to verify the correctness of the procedure followed.
- **Precision:** A minimum of 5 replicates is required to check the precision, at the targeted LOQ or reporting level (RL) of the method, and at least one other higher level, for example, 2-10 times the targeted LOQ or the MRL. Repeatability RSDr values determined from the validation experiments should be $\leq 20\%$, while within-laboratory reproducibility (RSDR), which may be determined from ongoing QC-data in routine analyses, should be $\leq 25\%$. Contributions arising from sample heterogeneity should be excluded when evaluating precision of the method.
- **Limit of Quantification(LOQ):** By long-standing definition among analytical chemists, the LOQ is the concentration at which the average signal/noise ratio (S/N) equals 10 in the analysis. The LOQ in practice can only be estimated because precise determination of the actual LOQ requires many analyses of spiked samples and matrix blanks but the LOQ can change day-to-day due to the performance state of the instrument, among many other factors. Some validation guidelines require that the LOQ be verified to meet method performance criteria via spiking experiments at the LOQ, however day-to-day variations in LOQ tend to force the analyst to greatly over-estimate the actual method LOQ, which

can be difficult to implement the strict definition of the LOQ ($S/N = 10$). Thus spiking at the Lowest Validated Level (LVL) is the more descriptive and proper approach. Furthermore, quantification of analytes should not be made below the lowest validated level (LVL) in the same analytical sequence. The S/N at the lowest calibrated level (LCL) must be ≥ 10 (conc. \geq LOQ), which can be set as a system suitability check required for each analytical sequence. A quality control matrix spike can also be included in each sequence to verify that the reporting limit is achieved in the analysis (an action level that is typically $>$ the LCL). In essence, the point of the validation is not to determine the LOQ, but to demonstrate that the lowest reported concentration is meeting the need for the analysis.

- **Selectivity:** Response in reagent blank and blank control samples should be $<30\%$ of the LOQ or the reporting level response. The following Identification criteria should be met:
 - The retention time of the analyte in the extract should correspond to that of the calibration standard (may need to be matrix-matched), with a tolerance of ± 0.1 min, for both gas chromatography and liquid chromatography. Larger retention time deviations are acceptable, based on experimental data of the laboratory, as for example RT tolerance $\leq 2s$, with s the standard deviation of the retention time over a certain time period.
 - The peak shape of the analyte in the extract should match with that of the calibration standard, e.g. the peak width, at half of its height, must be within $\pm 10\%$ of the original width of the analyte peak.
 - The chromatographic profile of the isomers of an analyte may provide helpful evidence.

Co-chromatography may be used for providing evidence of analyte identity, however it is not a fully confirmatory technique, as it is based on the retention time criterion only. According to this technique the sample extract is fortified by addition of an appropriate amount of calibration solution. The amount of analyte added must be similar to the amount of the analyte found in the sample extract.

In order not to reject the assumption that the suspect peak is the analyte peak, only the height of the analyte peak and the internal standard peak should be enhanced after taking into account both the amount added and the dilution of the extract. The peak width, at half of its height, must be within $\pm 10\%$ of the original width of the analyte peak or the internal standard peak of the unfortified sample extracts.

- If confirmation is not based on a MS technique, the use of a different chromatographic separation is required that will also satisfy the above mentioned criteria. For example a different chromatographic separation could be the use of a LC system in the case that the initial system was a GC system. In the case that only a GC system is available, then a different chromatographic separation could be at least the use of a column of significantly different polarity.
- **Selectivity requirements for Mass Spectrometry:** Selective ion chromatograms should have peaks exceeding $S/N 3:1$, of similar retention time, peak shape and response ratio to those obtained from a calibration standard analysed at comparable concentration in the same batch. Chromatographic peaks from different selective ions for the same analyte

must overlap with each other. The requirements for different types of MS detectors are given in the following table:

MS mode	Single MS (unit mass resolution)	Single MS of high mass accuracy	MS/MS
Typical system(examples)	Quadrupole, ion trap, time-of-flight(TOF)	High resolution: Q-TOF, Orbitrap, FTMS, magnetic sector	Triple quadrupole, ion trap, hybrid MS(e.g., Q-TOF, Q-trap)
Acquisition	Full scan, Limited m/z range Selected ion monitoring(SIM)	Full scan Limited m/z range, SIM	Selected/multiple reaction monitoring(SRM/MRM), full scan product-ion spectra
Requirements for ions	≥ 3 ions	≥ 2 ions with mass accuracy < 5 ppm.	≥ 2 product ions
Ion ratio	Within ±30%(relative) of average of calibration standards from same sequence.		
Other	S/N ≥ 3, Analyte peaks in the extracted ion chromatograms must fully overlap.		

- **Matrix effects:** Matrix effects are known to occur frequently in both GC and LC methods and should be assessed at the initial method validation stage. The analytes that require use of calibration standards in solvent and the analytes that require use of calibration standards in matrix should be clearly identified during this process. Comparison of response arising from solvent standards and from matrix-matched standards is used for this purpose. A maximum 20% difference is considered as acceptable for using solvent standards as calibration standards. In a different case matrix matched calibration is required.

For adoption of the validated method:

a) Calibration function: Test the response function of the analyte at ≥ 3 analyte levels at LOQ and 2 and 3 times MRL or LOQ (if MRL is at LOQ), plus blank. For non-linear response, determine response curve at 7 ≥ levels and ≥ 3 replicates.

b) Matrix effect: Test the matrix effect with the same or representative matrices.

c) Accuracy & Precision: Analyse analyte/matrix combinations at ≥ 5 replicates spiked at LOQ (or MRL) and 2 X LOQ (or MRL).

d) Specificity and selectivity: Check performance characteristics of detectors used and compare them with those specified in the method. Check response of a blank of the commodity. Make it sure that the measured response in the extract is solely due to the analyte. Response in reagent blank and blank control samples should be <30% of the LOQ or the reporting level response.

Total No. of Applications :368

Satisfactory :363

Rejected :05

- a. Incomplete submission of required documents i.e. valid manufacturing license ,valid SSI, list of products manufactured in the last two years. BOD/ Incorporation certificate (in case of Pvt. & Ltd. company).
- b. Incomplete submission of online Form-I and hardcopy of Form-I, i.e wrong name of applicant and authorized person, wrong address of manufacturing site, wrong entry of product in online Form-I and hardcopy, incorrect/unapproved source of import (in case of FI and TI category. In-situ Production in case of ALP.
- c. Submission of application under wrong category.
- d. Other issue related to SSI /Manufacturing license
- e. CR already issued/MRL not fixed/ banned product.
- f. Non submission of required affidavit/Incorrect/ incomplete affidavit.

No of files having MRL:368

PPS to JS(PP)/ PPS to Director(PP)

Minutes of the meeting under the chairmanship of Sh. Atish Chandra, Joint Secretary (Plant Protection), Department of Agriculture Cooperation & Farmers Welfare in Room No 142, Krishi Bhavan, New Delhi to Discuss issues related to amendment in the Insecticides Rules, 1971 regarding Label and Leaflets dated 22.07.2020 at 11.00. AM (Reference - W.P.(c) No. 4136/2020 and W.P.(c) No. 4137/2020)

The list of the participants is at **Annexure-I**.

Joint Secretary (PP) welcomed the participants and mentioned that in the light of the observations of Hon'ble High Court this meeting has been convened to discuss and resolve the issues related to amendment in rule regarding label and leaflets.

The following issues were raised and deliberated upon:

1. It was apprised that leaflet is an integral part of the label and it is assured that leaflet will reach the farmer / end-user. So, the information required on labels of ultra-small and small packages may be allowed to be shifted on leaflet.
2. The font size, content and language to be printed on the label should be seen in totality and accordingly finalized. The font size should be legible by normal naked eye. On ultra small and small packages in 2020 notification, 5 is the minimum font size that has been prescribed, the same should be made applicable to bigger pack sizes label also. It was also stated that since limited area is available on small and ultra-small pack, either the font size ought not to be fixed and the manufactures should be given the flexibility to use font size or only one language may be prescribed in which all the requisite information may be accommodated on the label.
3. As the pictograms (1 cm X 1 cm) occupy substantial space on small and ultra small pack labels, the pictograms should be provided on the leaflet and not on the label.
4. The requirement of minimum area for toxicity triangle of "one sixteenth of the area of the panel or four square cm whichever is greater" should be removed for small and ultra-small packs label.
5. QR code may be allowed to be printed on anywhere on the container instead on label
6. The requirement on label regarding "read leaflet before use" may not be insisted in regional languages other than English and Hindi.
7. The chemical composition of the insecticides should be insisted in brief only and detailed composition may be provided on leaflet.
8. Individual Secondary packing should be abolished.
9. Implementation time for the notification should be allowed up to the expiry of the registered insecticide available in the market.

One by one all the mentioned issues were deliberated. It was clarified that when it is said that leaflet is an integral part of the label, it implies that the leaflet must reach the farmers / end- users so that the entire information of the product reaches the consumer. But since there are issues of leaflet not being secured properly with the container and the same not

reaching the farmers / end-users, it has been specifically mentioned in the notification that leaflet shall be secured to the primary pack or inserted or kept in between primary and secondary packing or pouch. Thus adequate option has been given to the manufacturer in this regard.

It was clarified that considering font size, content and language, the minimum 5 font size was finalized for small and ultra-small packages. It has been seen that any font size less than 5 is not legible to average eye sight. Further keeping in view the larger availability of space on big pack label, proportionately minimum 7 font size has been finalized, with an objective to have more legibility of the contents. With regard to the content it was explained that the content on small and ultra-small packages is the similar to what is being presently printed by manufacturers with only exception of manufacturers licence number and customer care details.

On pictograms it was clarified that pictograms have been an essential part of the label since its introduction on the labels. Moreover, it was informed that the manufacturers are already printing these pictograms on all pack sizes of insecticides presently being sold in the market.

With regard to the issue of toxicity triangle and its size, it was clarified that the toxicity triangle is one of the crucial parameters providing the first hand information to the farmers / end-users about the acute toxicity or otherwise of the insecticides and it is already implemented on all pack sizes of insecticides presently being sold in the market.

With regard to the QR code, it was clarified that it has been made part of the label but the placement of the same has not been explicitly fixed in the notification. Therefore as suggested it can be placed anywhere on the container where it can be scanned.

On requirement of language it was clarified that the stakeholders are already printing information in Hindi and English on the labels on all pack sizes. However only on bigger pack sizes it has been notified that “read leaflet before use” is required to be printed in all such regional languages where it is proposed for sale.

Further, in the view of linguistic diversity and benefit of the farmers/ end-users, it has been notified that the “label shall be printed at least in English and Hindi languages unless stated otherwise”. Therefore if a State insists on printing of label in any regional language in lieu of either English or Hindi the same has to be complied with.

With regard to the issue of chemical composition, it was clarified that the chemical composition of the insecticides may be mentioned only in brief on label in case of small and ultra small packs and detailed composition should be provided on leaflet. This saves space and this is already being implemented by Registration Committee in new cases of registration.

With regard to the issue of secondary pack it was clarified that the individual secondary packing has not been explicitly mentioned in the notification and Registration committee has also allowed multiple primary packs in a secondary pack in new cases of Registration being considered under the present Notification.

On the issue of timeline, it was mentioned that this has been decided based upon due deliberations with stakeholders previously and practical time frame for each activity has been prescribed in the Notification.

Further a suggestion was put forth by one of the representatives that extended or folded label may be permitted which will further facilitate the manufacturers to place all required information on the labels in case of small and ultra small packs. All participants representing

the industry agreed with this suggestion. In this regard it was clarified that the Notification does not debar such an option however the requirement is that the label has to be well secured to the container and that the leaflet shall be secured to the primary pack or inserted or kept in between primary and secondary packing or pouch so that the desired information reaches the farmers / end-users.

The meet in g ended with thanks to the chair.

Annexure-I

List of Participants attended the meeting held under the chairmanship of Shri Atish Chandra , Joint Secretary (PP) D AC&FW on 22-07-202d at 11:00 hrs in conference Room No. 142, Krishi Bhawan, New Delhi to discuss issues related to the amendment in Insecticides Rules, 1971 regarding label and leaflets w.r.t W.P. 4136 and 4137 filed by CCFI and CLI in the High Court of Delhi.
