2.3	<p>Presentation by M/s Sanjay Chemicals India Pvt. Ltd. In respect their applications No.121199-END/2020 for import permit of Sodium cyanide.</p>
	<p>The representative of applicant made the presentation and following facts appeared.</p> <ul style="list-style-type: none"> • SC IPL was desirous of importing Sodium Cyanide, not for insecticidal use, and accordingly, on 02.04.2019 filed application for import Permit of 2000 MT of Sodium Cyanide before the Registration Committee. In its 407th Meeting on 14.08.2020, the Registration Committee granted the permit to import 500 MT Sodium Cyanide and consequently, Import Permit No. 423/407thRC/2019 (“Subject Permit”) was issued to SC IPL for 500 MT Sodium Cyanide, valid till 11.09.2020. SC IPL also has valid and subsisting Poison License to deal in 2000 MT of Sodium Cyanide. • The Registration Committee granted fresh permit No. 510/421st RC/2020 to SC IPL on

21.08.2020 to import 1500 MT Sodium Cyanide (prior to expiry of the Subject Permit). The applicant had in bona fide, imported 377 MT of Sodium Cyanide under cover of the Subject Permit. The said imports have been duly permitted by the Customs Authorities in accordance with the procedures.

- It is further the submission of the applicant that however, on 22.08.2020 (i.e. after grant of quantity permit of 1500 MT by the Registration Committee) the Techno-Legal Cell of the DPPQ&S, *suomotu*, issued a show-cause notice to the applicant seeking clarification regarding the excess 377 MT imported under the Subject Permit, citing an alleged violation of the Insecticides Act. Further, the Director Agriculture, Pune was simultaneously directed to investigate the documents and submit a report. It is noted that on 15.10.2020, the Director Agriculture submitted its report, and clarified that all import was for non-insecticidal use and there is no irregularity has been observed in the documents.
- SCIPL also submits that it has never been embroiled in any such issue in the past, over 40 years of its operation.
- The applicant also submitted that the present situation appears to be one of procedural irregularity that was compounded by the uncertainty and delay on account of the **pandemic lockdown situation due to COVID 19**, and warrants exercise of discretion by the Registration Committee. It is seen that the Hon'ble Supreme Court and other Courts have held that the benefit of a license/permit, once approved may inure from the date of application. There are several cases of the Hon'ble Bombay High Court and Madras High Court, permitting carrying on of business during the pendency of application/licenses.

The Registration Committee heard the submissions made on behalf of the applicant and observed that the matter pertains to Import Permit qua material that is not for insecticidal-use. The Registration Committee also observed that thus, apparently this appears to be a case of irregularity and not illegality and within discretion of the Registration Committee, before whom SCIPL has applied for enhancement of quantity. The Registration Committee also observed that although the applicant had ought not to have imported excess quantity but as submitted by the applicant due to certain extreme circumstances prevailing in the present Covid-19 situation and further in view of the judgments relied upon by the applicant as referred in the presentation documents. The RC is of the view that the present matter deserves consideration.

Therefore, in view of the above facts, circumstances and judicial precedents cited, the request of the applicant, is allowed and the excess quantity of 377 MT may be adjusted from the subsequent import permit issued for 1500 MT into the import permit earlier issued for 500 MT.

Considering the situation of Covid-19 and lockdown period during submission of their application. RC decided to regularize the excess quantity one time and subject to an undertaking from the applicant that they will not repeat such mistake in future.

	<p>Sectt. of CIB&RC is directed to issue a suitable communication to this effect to the Custom Authorities.</p> <p>Registration Committee also advises the Techno-Legal Cell to apprise the Registration Committee the regulatory body before initiating any proceedings against the applicant especially in such cases.</p>

10.20	Agenda note on the Gazette Notification (Draft) by FSSAI (No.CG-DL-E-22082020-221303 dated August 20, 2020) regarding the downward revision of existing MRLs.
	RC deliberated issue and took issue wise decisions as given below:- a. Gazette Notification by FSSAI dated 24.12.2018 with tolerance limit of 0.01 ppm: Tolerance limit or Maximum Residue Limit_(MRL) is the highest level of a pesticide residue that is legally permitted in/on food as per label claim usage approved by the registration committee. The term "Tolerance" is generally used by the European Union

(EU) for import tolerances that are applicable only to pesticide residues in food commodities imported from other countries. A scientifically validated process is followed for approval of label claim by the RC based on the requisite data (chemistry, efficacy, residue, toxicity, packaging etc.) submitted by the industry, and fixation of MRLs by FSSAI in India after considering residue levels and dietary intake of the commodity by the consumer. The FSSAI Gazette notification dated 24.12.2018 is related to application of the Tolerance limit of 0.01 mg/kg in cases of pesticides for which national MRL have not been fixed. This limit has been fixed arbitrarily without any scientific risk assessment for the consumer safety. The notification violates Insecticide Act, 1968 as it legitimises the use of unapproved pesticides which do not have approved label-claim. Since a given pesticide is approved for many crops, there is likelihood of its drift to the adjacent field/crop on which the pesticide is not approved. Therefore, trace level (>0.01 mg/kg) residues of unapproved pesticide may be detected in the agriculture produce rendering it unfit for export.

The regulatory agencies worldwide follow the risk based assessment approach for the determination of MRLs in food commodities except EU, which follows the hazard based approach. India through the FSSAI-National Codex Contact Point (NCCP) has always advocated for risk based assessment approach and strongly opposed the hazard based assessment for fixation of MRLs in WTO and CCPR.

The unscientific approach of notifying Tolerance Limit (0.01 mg/kg) of pesticides for which MRLs have not been fixed for India will have serious implications and may lead to the rejection of the commodity by the importing country thus jeopardising the government policy of doubling the farmers’.

In view of above and the larger interest of the country, the note on page 51 “*Tolerance limit of 0.01 mg/kg shall apply in cases of pesticides for which MRL have not been fixed*” in the FSSAI Gazette Notification dated 24.12.2018 may be withdrawn.

b. Gazette Notification (Draft) by FSSAI (No. CG-DL-E-22082020-221303 dated August 20, 2020) regarding the downward revision of existing MRLs:

The earlier FSSAI Gazette Notification dated 24.12.2018, had harmonized FSSAI MRLs with Codex MRLs for those pesticide-crop combinations whose MRLs were stringent. The recent FSSAI draft Gazette Notification (No. CG-DL-E-22082020-221303 dated August 20, 2020) reverted the above decision and restored the earlier prescribed stringent MRLs. This change is likely to result in the rejection of agricultural produce by the importing country, causing huge financial loss to farmers, traders, and the foreign exchange earned by the country. India being signatory to CAC and WTO, more than 190 CAC member countries including India, mostly adopt Codex MRLs (CXLs) for their domestic regulation as well as to settle international trade disputes. Codex Committee on Pesticide Residues (CCPR) after comprehensive scientific assessment of the residue data submitted by India has issued notification for adoption of 19 Codex MRLs of spice-pesticide combinations which were later adopted by the European Union (EU) for smooth export of spices from India.

The “Parliamentary Standing Committee on Commerce-154 Report on Export of Agriculture & Marine Products, Plantation Crops, Turmeric and Coir” had recommended

	<p>that fixation of MRL's should be based on scientific risk assessment and in line with the codex standard specifications. Protocols followed by FSSAI and parameters considered for risk assessment and MRL fixation appears to be unscientific thereby leading to fixation of stringent MRLs of pesticides. For example as per the recent study conducted by the ICMR- NIN, Hyderabad, the average Indian adult body weight has been increased from 60 to 65 kg but FSSAI considers 50 kg as average body weight which is 10-15 kg lower. Similarly, food consumption factor considered by FSSAI for risk assessment is also unrealistic as the average daily consumption of rice is taken as 818 gm raw rice for a 50 kg person/day which is much higher than those published by National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation, Government of India and Global Environment Monitoring System (GEMS). Furthermore, for fixation of MRL's of various pesticides on different crops, the agricultural practices followed by farmers have not been taken into account with respect to the waiting period. For example, tomato is a multiple picking crop and farmers harvest it regularly after every 3rd day interval. Pesticide residue data of more than 3 days is also unrealistic and unscientific, and the risk assessment of pesticides should be done only on 3rd day after application for all the multiple picking vegetables.</p> <p>Based on the above and in consonance with the Government of India policy of "Doubling the Farmer's Income" by 2022-23, and in the larger interest of the farmers the earlier policy regarding the adoption of the Codex MRLs (where the Codex MRLs are higher than FSSAI MRL's) must be retained and the FSSAI Gazette notification (Draft) (No. CG-DL-E-22082020-221303 dated August 20, 2020) regarding the downward revision of existing MRLs may be revised accordingly.</p> <p>RC decided that DAC&FW may be communicated to take up these matters with FSSAI.</p> <p>c. RC took a note of variation in label approval and MRL notified and decided to constitute a subcommittee under the Chairmanship of Dr. K. K. Sharma, Network Coordinator, All India Network Project on Pesticide Residues, ICAR-Indian Agricultural Research Institute, New Delhi with following members</p> <ol style="list-style-type: none"> 1. Dr. Sarita Bhalla, Consultant (Pharma.), CIB&RC 2. Sh. Kiran W Deshkar, DD, Entomology, CIB&RC 3. Dr. Vandana Pandey, AD (PP) CIB &RC (Member Secretary), <p>The subcommittee will look in to the matter related to variation in label approval and MRL notified by FSSAI for some of the pesticide and submit its recommendation earliest possible to rectify the gaps.</p>
