	RC deliberated the agenda and approved for grant of registration for formulation import of <i>Triflumizole 42.14% w/w SC</i> under section 9(3) FI without registering technical for import manufactured and supplied by M/s Arysta Lifescience North America LLC, Cary, North Carolina 27513, USA on use of ornamental Rose against powdery mildew. RC further noted that the molecule has already been assessed by several regulatory bodies across the globe and is registered in other countries, The cautionary remarks would be added on dermal allergy being skin sensitizer and toxicity to aquatic organisms including fish along with their mitigation measures. The safety factor 300 will be taken for extrapolation of animal studies to human beings for calculation of ADI for Triflumizole technical whenever expansion of label claims would be requested in future and desired warning may be incorporated that roses treated with this formulation, should not be utilized for any medicinal and edible purposes.
<b>6.16</b>	<b>Consideration of an application of M/s Syngenta India Ltd., for grant of registration for formulation import of <i>Lambda cyhalothrin 2.43% w/w CS</i> under section 9(3).</b>
	Committee deliberated and approved for grant of registration of <i>Lambda cyhalothrin 2.43% w/w CS</i> under section 9(3) for the purpose of Household use for control of Housefly ( <i>Musca domestica</i> ), Mosquitoes ( <i>Anopheles</i> spp.), American Cockroach ( <i>Periplaneta americana</i> ), German cockroach ( <i>Blatella germanica</i> ).
<b>6.17</b>	<b>Consideration of an application of M/s Parijat Industries (India) Pvt. Ltd., for grant of registration for technical import of <i>Thiamethoxam technical 98% w/w min.</i> under section 9(3).</b>

	The members deliberated the agenda and decided to invite applicant in next RC meeting to clarify alongwith documentary evidences that the sample tested in toxicity studies was imported from the source Jiangsu Huifeng Agrochemical Co. Ltd., Weier Road, South area of ocean development zone, Dafeng, Jiangsu 224145 China.
<b>6.18</b>	<b>Consideration of an application of M/s Bayer Cropscience Ltd., for grant of registration for technical import of <i>Cyclanilide technical 97% w/w min.</i> under section 9(3).</b>
	The case was deliberated in detail and safety factor 300 will be taken for extrapolation of animal studies to human beings for the calculation of ADI. RC raised the concerns for having xylene as one of the impurity in the molecule for registration on the basis of Dr S.K.Malhotra committee report. Applicant should be invited for presentation on this issue.
<b>6.19</b>	<b>Consideration of an application of M/s Willowood Chemicals Pvt. Ltd., for grant of registration for technical import of <i>Tricyclazole technical 95% w/w min.</i> under section 9(3).</b>

<b>6.20</b>	<b>Consideration of an application of M/s Shogun Organics Ltd., Mumbai for grant of registration for indigenous manufacture without registering technical of <i>Renofluthrin 5% w/w MUP</i> under section 9(3).</b>
	RC committee went through the external expert comments and after deliberations following points emerged out: <ol style="list-style-type: none"> <li>1. The external expert has recommended for waiver of acute oral toxicity in dog as toxicity study on goat has been submitted, but committee members were on disagreement because of following reasons: <ol style="list-style-type: none"> <li>a) The reason for conducting toxicity study on goat is done to assess residue of pesticide in edible part of animal such as meat, milk etc. Whereas sub acute oral toxicity in dog is carried out to know risk level through symptoms of toxicity on body parts/organs.</li> <li>b) For public health products, where the pesticide will be in direct exposure to human being, the study on rat is not enough and study on toxicity on dog is essential because dog is considered close to human for extrapolation of results. It will give safety assessment against man through rat and dog both which is essentially required for new molecules.</li> <li>c) Since renofluthrin is not a mixture, it is a new compound and is new chemistry, therefore, being new chemistry, all tox data for risk assessment is necessary for the products which as mosquito repellent will give exposure to all age categories of human being as well as surroundings.</li> <li>d) Since, it is new molecule, no any historical data is available on public domain of FAO, OECD, EPA etc. and thus necessitate to submit needed tox studies.</li> </ol> </li> </ol>

	<p>e) Qualification criteria for bridge across or read across was discussed, being a new chemistry and process for manufacturing and also due to lack of historical data it does not have clarity for consideration for waiver.</p> <p>f) External expert has cited about the precedent of agenda item no. 9.14 of 336<sup>th</sup> meeting, for waiver of dog or livestock. On deeply analyzing the earlier decision of RC, it came into notice that waiver was granted to Paclobutrazol, which is not a pesticide but it is a plant growth hormone which is generally regarded as safe where such studies are not required essentially.</p> <p>g) It was also appraised that sub acute oral dog study is conducted and results are obtained after 90 days.</p> <p>Considering above points committee deliberated the agenda in detail and the members were of the opinion that the study on sub-acute oral dog and metabolism cannot be exempted and applicant may be advised to submit data on these parameters for further consideration of their application for registration.</p>
