<b>2.0</b>	<b><u>Presentation</u></b>
<b>2.1</b>	<b>Presentation by M/s Bayer Crop Science Ltd., grant of registration for technical import of <i>Cyclanilide technical 97% w/w min. u/s 9(3).</i></b>
	<p>The representative of M/s Bayer Crop Science Ltd., made a presentation and informed that complete removal of the impurity xylene was not possible, but assured that the percentage of the xylene is kept bare minimum level and further informed that there exists only one manufacturing unit at USA, where the product Cyclanilide technical is being manufactured of uniform standard and from there the product is being distributed to all the countries across the globe including USA and India.</p> <p>RC decided to approve the application of M/s Bayer Crop Science Ltd., for grant of registration for technical import of <i>Cyclanilide technical 97% w/w min.</i> applied u/s 9(3) (TI vs TIM) manufactured by M/s Bayer Crop Science, 8400 Hawthorn, Road Kansas City, MO 64120, USA.</p>
<b>2.2</b>	<b>Presentation by M/s Dow Agro Science India Ltd., for grant of registration for formulation import of <i>Fluroxypyrmeptyl 48% w/v (45.5% w/w) SC (without registering technical) u/s 9(3).</i></b>
	<p>The applicant submitted that for 2-Octanol, no classification and labeling according to CLP criteria for skin sensitization and reproduction/teratogenicity is required. It submitted a Combined repeated dose Toxicity Study with the Reproduction/Developmental Toxicity Screening Test conducted with 2-octanol in 2019 and available on ECHA site which showed the negative results. Further, studies in Guinea pig and LLNA test in mice with Fluroxypyr MHE showed that it is not a skin sensitizer. RC directed the Secretariat of CIBRC to bring complete agenda in the next meeting.</p>
<b>2.3</b>	<b>Presentation by Parijat Industries (India) Pvt. Ltd., regarding enhancement/regularization of the excess quantity of Bispyribac sodium Technical and <i>Chlorpyriphos Technical</i> for import for export only.</b>
	<p>The RC deliberated the agenda and decided as follows:-</p> <ol style="list-style-type: none"> <li>1. The applicant is directed to submit all the authenticated documents from Customs for the quantity exported and imported against the export order issued to the applicant w.r.t. to CR issued to applicant for Chlorpyriphos and Bispyribac for export purpose only,.</li> <li>2. The applicant informed that due to the COVID 19 pandemic and certain disruptions over past many months the mistake occurred due to work from home by staff and also informed that the fact was revealed early in an internal audit they have imported excess quantity of 1400 kg for Bispyribac sodium and 2000 kg for chlorpyriphos and admitted inadvertent mistake.</li> <li>3. It was also ascertained that excess quantity has not been utilized yet for any commercial</li> </ol>

	<p>purposes and same is lying in safe custody in the premises storeunder lock in original sealed drums and packings.</p> <p>4. He also apprised that additional quantity export orders have also been received from same importing country. The applicant should submit the documents including confirmed export if any for using the remaining quantity.</p> <p>5. Applicant should submit the undertaking on NJSP that he will not sell the extra imported quantity in Indian Market.</p> <p>6. The warning should be issued to the applicant that in future such mistakes should not be repeated.</p> <p>7. RC committee after looking into facts of disruptions during pandemic and also that it is case of technical import for export and will be exclusively used for export purpose only, decided to approve excess quantity with above conditions at point no. 4,5,6.</p>
<b>2.4</b>	<b>Presentation by M/s Tropical Agrosystem (India) Pvt. Ltd., for grant of registration for technical import of <i>Chlorimuron ethyl technical 95% w/w min.</i> u/s 9(3) (TI vs TIM).</b>
	The applicant made a presentation on points raised in 426 <sup>th</sup> RC meeting minutes at agenda item no.6.7. RC directed the applicant to submit the relevant information such as authorization letter for conduction of trials and data alongwith use of surfactants, weed control efficiency data as per guidelines to the Secretariat of CIB&RC.
<b>2.5</b>	<b>Presentation by M/s United Chemicals, for revival of application for registration of <i>Pretilachlor Technical, Sulfosulfuron technical and Clodinafoppropargyl technical</i> for indigenous manufacture u/s 9(4) TIM which have been closed in 381<sup>st</sup> RC.</b>
	<p>The applicant made a presentation. Following facts appeared:</p> <ol style="list-style-type: none"> <li>1. The application was closed in 381<sup>st</sup> RC on 6.12.17 because of no response to Secretariat queries.</li> <li>2. Now after a gap of about four years, applicant has requested for revival.</li> <li>3. RC reiterated the 381 RC decision and advised applicant to apply afresh online as per guidelines.</li> </ol>
<b>2.6</b>	<b>Presentation by Mr. Deba Bharata Biswas in respect of his representation dated 13.01.2021 submitted regarding LLIN issue.</b>
	<p>In terms of the decision of the RC taken in its 426<sup>th</sup> meeting whereby the applicant was called for presentation of his submissions on its representation dated 13.01.2021. The applicant was represented by its learned counsel Sh. Ankit Virmani through video conference and inter alia other submission the counsel submitted as under:-</p> <ol style="list-style-type: none"> <li>1. No registration be granted for any long lasting insecticide impregnated nets (LLIN) without full evaluation and satisfaction by the RC on all safety and efficacy parameters.</li> <li>2. Several applications for registration are being considered where RC has categorically found that the requisite data has not been furnished reference was given to the decisions of 423<sup>rd</sup> meeting vide agenda item no. 6.8 and 6.9, decision of RC taken in its 424<sup>th</sup> meeting vide agenda item no. 1.2 &amp; 1.3 and further the decision of the RC taken in its 426<sup>th</sup> meeting vide agenda item no. 10.20.</li> <li>3. The counsel further submits that in the year 2014 the revised common protocol for uniform evaluation of public health pesticides including biolarvices for use in vector</li> </ol>

control (ICMR protocol) the same was evolved by a sub-committee comprising of experts from all concerned Government bodies dealing with vector control including CIB, NVBDCP, Vector control research centre, ICMR etc. The counsel contents that the ICMR protocol has to be followed by all concern including RC for evaluation and registration of LLINs before permitting such LLIN to be manufactured and sold in India and further the requirement to follow ICMR protocol is also provided in the guidelines for registration of long lasting insecticides impregnated bed nets and long lasting insecticides incorporated mosquito net which is available on the website of the RC. It is further his submission that the ICMR protocol clearly recognizes that the recommendation/approval by WHO pesticides evaluation scheme (WHOPES) is not sufficient and three phase evaluation in Indian condition is mandatory.

4. It is also submitted that no provision registration u/s 9(3b) of the Act pending full evaluation cannot be granted for LLINs including Alphacypermethrin as active ingredient as the LLINs using Alphacypermethrin are not new product being introduced in the country for the first time. He further submits that the regular use of section 9(3b) to grant registration without full evaluation and satisfaction more so without following the ICMR protocols would defeat the entire objective of the Act.
5. It is also brought to the cognizance of the RC that the applicant Sh. Deba Brata Biswas had also filed a Writ Petition (PIL) No. 11 of 2021 against the CIB&RC impleading M/s HIL (India) Ltd., and M/s V.K.A. Polymers Pvt. Ltd., as private respondents, against the decision of the RC taken in its 423<sup>rd</sup> meeting and 424<sup>th</sup> meeting. Further the applicant has also moved an application for the grant of interim relief on the ground that the RC in its 426<sup>th</sup> meeting had considered the grant of registration to M/s V. K. A. Polymers Pvt. Ltd., and the Hon'ble High Court of Punjab and Haryana at Chandigarh was pleased to grant stay on the decision vide its order dated 25.03.2021.

RC after careful hearing of the submissions advanced on behalf of the applicant observed that prima-facie the matter requires examination /review, and accordingly the RC decided as under:-

- a. The Sectt. of CIB&RC is directed to provide all the relevant documents pertaining to the above matter for scientific examination of the same.
- b. RC further observed that it would be expedient in the interest of natural justice that the registrants M/s HIL (India) Ltd., and M/s V.K.A. Polymers Pvt. Ltd., may also be provided an opportunity to present their point of view w.r.t. the representation of Sh. Deba Brata Biswas dated 13.01.2021 and accordingly they may also be called for presentation in the next RC meeting.
- c. In terms of the interim order dated 25.03.2021 passed by the Hon'ble High Court of Punjab and Haryana at Chandigarh and in view of the fact that the matter is sub-judice, the impugned decision, shall be kept in abeyance till further orders by the Hon'ble High Court.

2.7	<b>Presentation by M/s Shri Balaji Impex for Boric Acid import permit application.</b>
	<p>The representative of M/s Shri Balaji Impex made a presentation. RC noted following points:</p> <ol style="list-style-type: none"> <li>1. Boric Acid is not used in the manufacture of Ramming mass. It comes into use after the Ramming mass is manufactured and it is mixed with already manufactured Ramming mass in order to bind the Ramming mass in the steel furnace.</li> <li>2. End use of boric acid as such could not be established clearly. Ramming mass is 98-99% silica with remaining of AI and other trace elements. Silica is a totally different molecule than boric acid and boric acid can not be used to manufacture silica. If the applicant claims to use Boric Acid in the manufacture of Ramming mass, then he may kindly clarify what is the difference in chemical composition of Boric Acid before it is consumed and after it is consumed, in the manufacture of Ramming mass.</li> </ol> <p>Therefore the case does not qualify for approval.</p>
2.8	<b>Presentation by Agro Chem Federation of India (ACFI) regarding extension of validity of certificate of registration for technical import.</b>
	<p>M/s ACFI made a presentation regarding their issues related to validity of extension with enhance purity. RC accepted the clarifications submitted by ACFI and decided that the cases of enhancement of purity upto 10% may be considered for grant of registration with following conditions:</p> <ol style="list-style-type: none"> <li>i) Submission of an Analytical Test Report to support the enhancement of purity and an undertaking stating no change in the manufacturing process and impurity profile, from the same source.</li> <li>ii) The applicant shall apply for enhanced purity.</li> </ol>
2.9	<b>Presentation by M/s Biotech International Ltd., in respect of rectification and issuance of corrected endorsement of field application and dose and time of application, amendment in registration certificate qua <i>Bacillus thuringiensis var israelensis</i>.</b>
	<p>M/s Biotech International Ltd. made a presentation and inter-alia following submissions were made before the RC.</p> <ol style="list-style-type: none"> <li>1. The applicant during presentation apprised that the applicant had applied for amendment of the Registration Certificate and label &amp; leaflets and the RC after due deliberations had granted the endorsement dated 24.02.2009. The above endorsement dated 24.02.2009 was never challenged and therefore the same has attained a finality. Further the third person has no locus under the Insecticides Act, 1968 to challenge the grant of registration or any amendment there of, that too after a considerable period of almost 12 years. The applicant further submitted that no material has been provided to him by the Sectt. of CIB&amp;RC so as to submit an adequate reply. The applicant also apprised that they had preferred a revision petition before the Hon'ble Appellate/Revisional Authority under section – 11 of the Insecticides Act, 1968.</li> <li>2. The applicant apprised that the latest field evaluation Technical Report from NIMR of February 2008 was submitted. According to the Trial Report dated February, 2008 of National Institute of Malaria Research which was having project duration from</li> </ol>

July 2007 to February 2008 with specific recommended dosage and formulation to be used is 200 mg/sqm at weekly interval in polluted habitats against *Culex quinquefasciatus* and fortnightly against *Anopheles stephensi*, *Anopheles culicifacies*, *Anopheles subpictus* and *Aedes aegypti* in clean water habitats or on positive. The applicant explained that if it is calculated to one hectare, the dose comes to 2kg/ha.

3. The applicant had also made a submission that the RC has no power to review its earlier decision and the RC can't sit as a court of appeal over its own decision.
4. RC observed that the facts have been brought to its notice by the virtue of a complaint
5. Since the issue has been brought to the cognizance of the RC, and therefore it was felt necessary to examine the facts / issues, in view of the fact that the matter pertains to the issues relates to public health. And therefore RC observed that if any irregularity is brought to the notice of the RC it is the pious responsibility of the RC to take corrective measures pertaining to any in advertent error related to label and leaflet which is un matching to the trial reports has occurred at some point of time. The nature of power that is conferred under the Insecticide Act 1968 spells out that power is vested with RC to prevent any sort of risk to human beings and animals and environment at large while granting registration / approval to an applicant who is desirous to import, manufacture, sell or stock and use etc. of insecticides in India. Keeping in view this objective, RC decided to examine /review the gamut of the issues involved and therefore adhering to the principals of natural justice the applicant was invited for presentation before RC to submit their point of view.
6. The Committee observed that the dosage and the time of application in the endorsement dated 24.02.2009 is at variance with that in the Trial Report and felt it expedient that necessary rectifications are desirable to be carried out in the CR and/or the endorsement approval, because doses could never be in ranges scientifically and further RC also found that label and leaflets are provided by the respective company and examined by CIBRC. But apparently it seems that inadvertently, the doses and time of application erroneously appeared on the label and leaflet and the same was not as per the above said NIMR trial report recommendations.
  - RC while examining the facts noticed that company commercialized the products at doses in ranges from 2-5 kg/ha whereas as NIMR trial report the product was found effective at optimum dose of 2kg/ha. It may lead to epidemic situation as product which is to be used one week in polluted water and 2 weeks in cleaned water, wherein label leaflet it was mentioned that it should be used in 2-4 weeks. Scientifically it may lead to issues related to spurt in vectors and vector borne diseases.
  - RC further observed that the power to review its own decision has been upheld by Hon'ble High Court of Kerala at Ernakulam and further RC has been entrusted with a responsibility for ensuring safety and right uses of

	<p>product under the regulatory regime and further if any mistake or error in registration had occurred the same is liable to be corrected/rectified.</p> <ul style="list-style-type: none"> <li>Now after careful examination of the facts and after hearing the submissions of the applicant RC decided to rectify it in supersession of all previously approved “Field application and Dosage” and “Time of application”, now approved as per NIMR recommendations given at page number 42 of Technical report of February 2008 as under:-</li> </ul> <p><b><u>“Field application and Dosage:</u></b></p> <p>Bacticide Formulation W.P. should be sprayed @ <b>2kg/hectare</b> water surface of any habitat (depending upon the densities of mosquitoes in the habitat). In case of basins deeper than 0.5 meter or with heavy vegetation, the quantity may be doubled. For optimum results, remove vegetation before spraying.</p> <p><b><u>Time of application:</u></b></p> <p>Spray freshly prepared suspension of “Bacticide Formulation W.P.; as soon as the mosquito breeding starts and <b>at weekly interval in polluted habitats and at fortnightly interval in clean water bodies</b> or as and when mosquito breeding reappears. Spray preferably in late evening for optimum efficacy.”</p> <ul style="list-style-type: none"> <li>The above mentioned “Field application and Dosage” and “Time of application” shall, with immediate effect, be recorded on the label &amp; leaflets of the product of the registrant, M/s Biotech International Limited, New Delhi.</li> </ul> <p>RC informs the applicant to immediately submit original certificate of registration with label leaflets to the Secretariat of CIB&amp;RC along with other subsequent amendment issued to him for verification and amendment purpose. RC further directed Sectt. of CIB&amp;RC to issue the revised endorsement letter with immediate effect as per above said field application and dosage and time of application.</p>

<b>10.13</b>	<b>Follow-up action of the minutes of 426<sup>th</sup> RC vide agenda item no. 10.6 on the issued w.r.t. AMES test for 9(4) TIM.</b>
	<p>RC deliberated the agenda in the context of presentations made on similar issue in the 420th RC and subsequent decisions in the matter. RC also observed the following facts:-</p> <ol style="list-style-type: none"> <li>1. In response to query that product could not be compared point to point in mutagenic studies as it showed cytotoxicity at a lower dose as compared to the 9(3) registrant, the applicant was asked to clarify that how their product can be considered equivalent to 9(3) registrant. <ul style="list-style-type: none"> <li>• The question of end point to end point results of AMES test and possible reasons for differences in cut off cytotoxicity were explained with reference of FAO Manual. Results of AMES test are compared by end point to end point between the test substance and reference substance (9(3) registrant as per FAO (Manual on development and use of FAO and WHO specifications for pesticides- Pesticide specifications, F 3.4, page 28). AMES data generated on 9 (4) applicant is from GLP CRO and followed stipulated test guidelines TG 471, OECD Guidelines for the Testing of Chemicals, Section 4, p 1-11. RC noted that AMES data developed from GLP lab is more authentic and is widely acceptable and is found non mutagenic in results. Detailed verification of data from CRO has unequivocally shown the technical manufactured is non-mutagenic and results are in line matching with registered technical by end point to end point comparison as per FAO guidelines (Manual on development and use of FAO and WHO specifications for pesticides- Pesticide specifications, F 3.4 page 28).</li> </ul> </li> <li>2. In support to their case scientifically, applicants were asked to submit another in-vitro test (in-vitro chromosomal aberration study) and one in-vivo test (Mammalian erythrocyte micronucleus assay). A point was also raised for clarification that</li> </ol>

	<p>international guidelines are based on 5 batch analysis mostly as compared to 1 batch analysis.</p> <ul style="list-style-type: none"> <li>It was explained that additional studies are not required to be submitted for 9(4) TIM registration, which is me too registration and original registrant data in 9(3) are more detailed. According to 9(4) TIM guideline 381 RC, page 11, point 46, only AMES test 1<sup>st</sup> tier is needed and also described in 371 RC, page 16, point 4 that AMES test 1st tier shall replace all toxicological data requirements in case of TIM u/s 9(4). In both of guidelines, no where it is mentioned that results of AMES should be point to point. It was also described by chemistry expert that if chemical equivalence has been established, as per existing guidelines mutagenicity study is not required. Under such conditions additional studies are not required. In present cases CC is matching and sample verified by CIL. The question of 5 batch analysis for establishing chemical equivalence does not arise because CIBRC guidelines require only single batch analysis for comparison and question of interpretation of AMES result is always guided by end point as per FAO.</li> </ul> <p>3. So far as low dose is concerned, the test guidelines says to select either top dose 5000 microgm if no precipitation and if researcher finds technical difficulty such as clumping, precipitation due to factors attributable to be test chemical, he has liberty to choose any low dose to 5000 micro grams and go down to that as long as he is comfortable with a non-precipitation concentration. RC noted that factors such as precipitation, solubility, cytotoxicity are confounding variables in the AMES test which are likely to be influenced by culture conditions and nature of compounds, therefore test conc. selected for study are best judged by investigator and hence no point to point comparison between study of 9(4) and reference study may not be possible and feasible. Recognizing these variables, FAO recommends that results are compared by end point that is mutagenic or non mutagenic.</p> <p>4. During presentation by industry representatives in 420 RC, new facts mentioned above came into notice of the RC. The RC directed to put up all such cases in RC for deliberation, which have not been put up with details so far.</p> <p>In light of above discussion and facts, RC decided to approve all six cases (M/s Bharat Rasayan Ltd., Deltamethrin Technical 98% w/w min.; M/s Anu Products Ltd., Difenconazole Technical 95% w/w min.; M/s Bhagiradha Chemicals &amp; Industries Ltd., Difenconazole Technical 95% w/w min.; M/s Anu Products Ltd., Fenoxaprop-p-ethyl Technical 88% w/w min.; M/s Anu Products Ltd., Isoprothiolane Technical 92% w/w min.; M/s Herenba Industries Ltd., Thiamethoxam Technical 97% w/w min.) for grant of registration u/s 9(4) TIM.</p>

<b>10.18</b>	<b>Contents for permission DAC&amp;FW.</b>
	The rodents are responsible for huge losses of crops in the field conditions. The formulation product will be used as rodenticides by putting bait stations by PCOs. But it will take longer time to kill or moribund the rats, as mechanism of killing the rodents is dependent on distorting the otherwise well balanced system of coagulatory mechanism in the mammals. These affected rats can be made part of food chain and other wild animals may be involved and affected. The LD50 values obtained on the formulation products are observed for fourteen days only on acute oral/dermal studies, therefore the product falls under category where bright blue color is allotted under the Insecticides Rules 1971. But health hazards potentials on their uses are immense and difficult to diagnose and treat at a village set up. Therefore to raise the degree of alarm it is recommended to allot bright red color to the toxicity triangle to this formulation product and all the such rodenticides registered earlier. A request may be sent to DAC&FW for the permission to change the color of the toxicity triangle to bright red color.

	<ol style="list-style-type: none"> <li>1. The RC noted that the Certificates of Registration (CR) are invariably granted based on generic or common names to encourage these insecticides, without recognizing the trade / brand name and a condition to this effect is already being given on the CR.</li> <li>2. Further, as per the provisions of Section 34 of the Insecticides Act, 1968, DAC&amp;FW may be requested to issue suitable directions for: <ol style="list-style-type: none"> <li>a. State Department to issue manufacturing licenses specifically mentioning generic pesticides (not by trade name) to propagate generic products.</li> <li>b. All the stockiest/retailers should be directed to keep the separate shelves for display of the generic pesticides for sale which should be visible to the end-user. (Rule 10D)</li> </ol> </li> <li>3. The training by the Central and State Agriculture Extension Functionaries to create awareness regarding purchase and use of generic pesticides by farmers and other end-users.</li> <li>4. The term 'Common name' of insecticides has already been used in the Rules, 1971 that denotes to generic insecticides. Hence, the definition of generic insecticides replacing common name may be incorporated by way of amendment in the insecticides Rules.</li> <li>5. The amendment may be considered in Chapter-V Rule 19 (Manner of labeling), dealing with labeling provision in the Insecticides Rules, 1971, so as to give more prominence to the common/generic name than the trade name (making the generic name above two font size larger than the trade name). - Sec. 36 (2) (a).</li> </ol>

a	For Seed treatment products: Residue data of 1 Season-4 Location accepted to see the dissipation behaviour.	For Seed treatment products: Residue data of one season three locations in different agro-climatic zone will be accepted.	Approved subject to condition that out of three locations, two locations will be in extreme.
b	For residue in Soil applied insecticides, two season data will be required.	If residue at harvest is above LOQ then 2 season data will be sought or else 1 season will suffice the purpose.	Approved subject to condition that the applicant will submit an undertaking that no residue detection is observed in the second season.
c	Bio-efficacy data for 2 Season, 3 Location is required for Post Harvest Use insecticides	For Post Harvest Use Bio-efficacy data of 1Season 3 Location (two sets of studies) will be accepted.	Approved subject to data generation in controlled condition.
d	For registration of Technical, Bio-efficacy data is required.	For registration of Technical, Bio-efficacy data will not be required.	Approved subject to condition that bio-efficacy data is not required for registering technical where formulation folder with bioefficacy data is submitted for registration. However, if application is submitted for technical alone then chemical equivalence (through five batch analysis) with already registered technical is required to get this exemption.

e	In Manufacturing Use Product (MUP) the Persistence data in soil and water is required.	In Manufacturing Use Product (MUP) Persistence data in soil and water will not be required.	Approved
f	For Pesticide Used on Non- edible crops (Rubber, Jute, Floriculture) the data on Residue and Persistence in plant is required.	For commercial non-edible crops only the data on Residue and Persistence in plant may be exempted and not for the edible crops.	Approved
