	<p>The RC was apprised the following:-</p> <ol style="list-style-type: none"> 1. RC had accepted to allow the use of Glyphosate through PCOs when it was advised by an in house group that it has occupational hazards including Non Hodgkin Lymphoma and it was informed on the basis of classification of Glyphosate was upgraded to under Group 2A by the International Agency for Research on Cancer,WHO. 2. RC had accepted the proposal on the recommendation of a different in house group constituted at its Secretariat to expand use of Glyphosate beyond the restricted use of by PCOs after appreciating that PCOs are in limited numbers and their availability is restricted to urban areas as several objections and suggestions received consequent to draft Gazette Notification on Glyphosate and these were studied by that in house group. 3. During the VC meeting held on 7th July 2021, it was realized that number of trained personnel even from other functionaries would not be sufficient for India to deal with restricted use through other trained personnels because of their non-availability in the rural areas. (iv) The in house group held its meeting and revisited the whole issue. It was observed that the label claims of Glyphosate are limited and are on tea and on non crop area. It was further appreciated that its use is less in major tea grown states viz Assam, West Bengal, Tamil Nadu and Kerala and there is no definition available for non crop areas. 4. It is recommended that the use of Glyphosate should be kept under surveillance to avoid its misuse 5. It is further proposed to the RC to explore the possibilities to utilize the trained human resources for the use of Glyphosate and other inherently toxic pesticides which poses acute and chronic occupational hazards. The use of Glyphosate should be through the trained personnels and to observe real existing picture at international level 6. An Affidavit may be taken from M/s Bayer that how many Court Cases are existing against it and erstwhile M/s Monsanto and how much compensation was given in various countries including USA. <p>Based on submission of the in-house group on glyphosate and considering the Pan India presence of pest control operators (PCOs) the RC is of the opinion to continue the decision of restricting use of Glyphosate through the trained PCOs. RC further agreed to recommend involvement of the State agriculture department/ and Central/State Governments institutes after adequate training for the proper use of Glyphosate to prevent the occupational hazards associated with the improper use of Glyphosate. Training module may be finalised by the Plant Protection Adviser. RC also agreed to seek an Affidavit from M/s Bayer Crop Science as indicated sl. no 6 above. Accordingly, recommendation of the RC may be communicated to DAC&FW.</p>

The data on some of the parameters as per the guidelines of the RC has not been submitted by the applicant. Further, both technical as well as formulation are skin sensitizer. This is very old pesticide and its registration approval in EU has expired on 31.05.2021. No renewal has been granted yet. A number of data gaps have been identified by EU. The applicant has not submitted information on the data gaps identified in EU and status of data submission in response to identified data gaps. Considering its repro-toxic, feto-toxic and skin sensitizer potential, the fact that the data submitted to support registration as well as the pesticide is very old and better new chemistries are available, the RC did not approve the registration.

It was also apprised that ICAR adheres to a different chemical composition which is not similar to any one of above mentioned chemical compositions, however it seemed more close to formerly accepted composition came to notice during discussion. The MRL does not seem to be fixed on field trials by any applicant and this issue is to be taken up with FSSAI for confirmation in light of recommendations of Joint Parliamentary Committee on fixation of MRL. The matter is of concerns because of above and concerns raised on development of resistance on various crops and is part of Parliament Assurance and earlier concern on development of resistance for Streptomycin antibiotic effectiveness in the treatment of tuberculosis which now co exists with HIV infection, and Tetracycline group of antibiotics which are broad spectrum antibiotics used in various kind of bacterial infections and infestations with other microbes including viral.</p> <p>RC deliberated the agenda and approved the recommendation of subcommittee to phase out the use of Streptomycin + tetracycline as per availability of alternatives. RC further decided to direct Coordinator, MPRNL project for conducting studies on MRL to generate data on major crops in which label claim for antibiotics is available and submit to the RC.
