<u>Agenda item No.</u>	<u>Particulars of Agenda</u>
1.0	Confirmation of minutes of the 432nd and 433rd RC meeting of the Registration Committee.
	RC confirmed the minutes of 432 nd and 433 rd RC meetings.
2.0	<u>Presentation</u>
2.1	Presentation by M/s Bhagiradha Chemicals & Industries Ltd., regarding grant of registration <i>Dinotefuran technical 97.00% w/w min. u/s 9(3).</i>
	Dr. Venkatesan Subbusamy & Mr. G.S. Sai Prasad from M/s. Bhagiradha Chemicals & Industries Ltd., made a presentation on the above issue. It was informed by the presenter that they have applied for the grant of registration of Dinotefuran technical 97.00% w/w min under 9(3) TIM under TIM vs FI-WRT guidelines. The computer serial No. & File No are as 1,08,406&9,380-TIM/9(3)/2018, respectively dated 27-04-2018. The In-process sample was drawn on dated 11-08-2021 by the team of officers. They further informed the RC that Dinotefuran 20% SG FI-WRT was registered in 326 th RC. It was also submitted by the applicant that their product is equivalent to technical of the M/s. PI Industries Ltd. CC submitted at the time of FI-WRT. It was also stated by the applicant that in the past many applicants have established the chemical equivalence for the same product registered under FI-WRT and got the registration of 9(3) TIM. This product has already been registered in favour of M/s. Best Crop Science and M/s. Insecticides India Ltd., with 97% min in TIM category in

416th RC held on 29.05.2020. The applicant claimed that they applied for this product simultaneously with that of M/s. Best Crop Science coincidentally.

The RC discussed the matter in details and observed that “Establishing of Chemical Equivalence” with earlier registrant is a mandatory requirement under certain categories like 9(3) TI/TIM/FIM and 9(4) TIM/FIM to get the data relaxation on certain parameters. It was also divulge that “Establishing of Chemical Equivalence” is a multifaceted qualification to decide the eligibility of molecule for data exemption in India and globally. It is a settled practice in India that while Establishing of Chemical Equivalence u/s 9(4), the intended product shall be the mirror image of already registered product while u/s 9(3) TIM category it should not be matching with earlier registrant. In the instant case the applicant has claimed the equivalence with earlier registrant M/s. PI Industries Ltd., of (Dinotefuran 20% SG FI-WRT) Dinotefuran technical 97% min. The CC of the applicant is matching with that of M/s. PI Industries Ltd., It was also pointed out that the CC of the applicant is matching a mirror image with M/s. Best Crop Science and M/s. Insecticides India Ltd., and Process of Manufacturing (POM) is also identical. The applicants informed that the following applicant got the registration while comparing their CC:

The RC observed that the minimum purity of each pesticide is different from each other in most of the cases. Even in establishing of Chemical equivalence POM plays a pivotal role, which is in the instant case is a mirror image of earlier registrant of TIM category.

Therefore, in the above circumstances, the RC felt expedient and accordingly decided that since the CC of the applicant is matching with the original registrant and they have applied long back under 9(3) TIM simultaneously with other registrant of 9(3) TIM category. To meet the ends of justice, the RC decided to take an exceptional considerate view. Accordingly, the Secretariat of CIB&RC is directed to bring the complete agenda in the upcoming RC.

The RC further advised the Secretariat of CIB&RC that once a pesticides got registered (Approved by RC) in TIM vs FI-WRT category, after that while establishing Chemical Equivalence it has to be ensured that TIM product were also considered before declaring equivalent or not.

2.2 Presentation by M/s Indogulf Cropscience Ltd., regarding grant of registration *Abamectin technical* under section 9(3).

Mr. Saurab Abhiranjan and Mr. Rudra Pratap Singh made a presentation requesting for waiver of toxicity study to livestock on the basis of similar waiver earlier granted by RC. It was submitted that this product was registered in 369th RC under TI category in favour of M/s. Syngenta India Ltd., It was further informed that Livestock toxicity study is mainly required to demonstrate that no adverse effects on livestock are expected from exposure to residues on livestock feed or fodder from crops treated with pesticide. Mr. Abhiranjan told that In this case both crops are not used as feed or fodder – it is to be used on ROSE & GRAPES. As per New Guidelines approved in 381 RC it is mentioned in case of TI New Source studies will be Required/Not Required with justification; Required – for direct application on animal for Treatment on Ectoparasite / Any crop or parts treated with pesticides used as feed or feeder. They further informed that Registration Committee has granted full study waiver based on

	<p>availability of scientific literature in public domain for many application on the basis of their uses.</p> <p>The RC observed that this product Abamectin is intended to be used on Rose and Grapes, which are never used as a feed and fodder crop, hence the request of waiver is accepted and accorded. The complete agenda of application shall be put up to RC in its next meeting.</p>

Guidelines for Registration requirements of pesticides for drone application

The applicant may apply for seeking registration for drone-based application of pesticides and the endorsement (label expansion) related approvals under the relevant provisions/category to the secretariat of the CIB&RC. For various categories of applications, the RC recommended the following requirements:-

A. Products with existing label claim in a crop recommended for spray with conventional sprayers and to endorse the use of Drones as alternate/additional spraying equipment.

Requirement:

a) If critical Good Agriculture Practices (cGAP) e.g. AI dose/ ha, Pre harvest Interval (PHI) and number of applications is within a recommended range of conventional spray then; Data on phyto-toxicity on the approved crop for one season two different agro-climatic conditions, where the target crop is cultivated, to be generated as per protocol (**given at Annexure II**) and also in the Spray Monitoring Form (**given at Annexure I**) from the Institutes approved by the RC, ICAR, SAU's or on the government/private land (for Drone based trial only) under supervision of trials through ICAR, SAU's on the private land.

b) If critical GAP e.g. AI dose/ha, PHI and number of applications is not within a recommended range of conventional spray then; Data on bio-efficacy, phyto-toxicity and residue may be generated **as per approved guidelines** alongwith protocol (**given at Annexure II and III**) and details shall also be submitted in the Spray Monitoring Form (**given at Annexure I**) from the Institutes approved by the RC, ICAR, SAU's or on the government/private land (for Drone based trial only) under supervision of trials through ICAR, SAU's on the private land.

No data requirement for chemistry/ Toxicology/Packaging/ Legal disciplines.

B. New product/Insecticide / new endorsement (label expansion) registration with use of conventional sprayers or Drones as spraying equipment or use of both as spraying equipment.

Requirement:

The applicant will submit the data/ information as per approved guidelines w.r.t. toxicity, bio efficacy, chemistry, packaging, Legal.

If the applicant wants to register new product for drone application as well, in addition to Conventional sprayer, and critical Good Agriculture Practices (GAP) is within a recommended and registered range of conventional spray, then they would submit additional data on phytotoxicity carried out as per protocol (**given at Annexure II**) for same (Drone application) from the Institutes approved by the RC, ICAR, SAU's or on the government/private land (for Drone based trial only) under supervision of trials through ICAR, SAU's on the private land.

In case cGAP for Drone application is not within recommended range of conventional spray, or a new product/label claim for exclusive use of Drone as spraying equipment is applied for; then data on Bio-efficacy studies as per protocol (**given at Annexure III**), phyto-toxicity (**given at Annexure II**) and residue should be submitted from the Institutes approved by the RC, ICAR, SAU's or on the government/private land (for Drone based trial only) under supervision of trials through ICAR, SAU's on the private land.

Note:

I. RC further decided that, each applicant wish to generate data, for seeking registration for drone-based application of pesticides and their endorsement (label expansion); shall intimate about proposed data generation to the Secretariat of CIB&RC in advance. Those who have already started data generation as on date, shall intimate to the Secretariat of CIB&RC with in 30 days of uploading of the minutes following in RC approved procedure/ form etc.

II. Wherever, the data alignment is required it should be as per the existing RC approved guidelines.

III. Further, no intimation required for use of RC approved pesticides with Drone where the use of any pesticide by any person for his own household purposes or for kitchen garden or in respect of any land under his cultivation is being done as envisioned in the provisions of section 38 under the Insecticides Act, 1968.

IV. The applicant shall also submit the label and leaflet with appropriate instruction, precautions do's and don't's for Drone based applications which shall be aligned as per DA&FW approved SOP document for use of Drone application of pesticide for crop protection.

The below mentioned Guidelines are to be read in consonance with the DA&FW approved SOP document for use of Drone application of pesticide for crop protection (small, marginal and organized sector) in agriculture, forestry, non-cropped areas (Annexure).

Drones are going to be important for increasing efficiency of application of crop protection chemicals/bio-pesticides/Plant growth regulators etc. by reducing manpower requirement, time of application, volume of water, quantity of chemicals and reducing exposure to human being to hazardous chemicals. Therefore, to facilitate the use of Drone technology in Agriculture in-line with the Government policy and thrust for increasing the use of Drone in different sectors including Agriculture, following requirements, guidelines, protocols, form etc. are prescribed:

2. Form for intimation of conducting Trails on Pesticides application with Drones and spraying activity of pesticides with drone application:

Any applicant desires to generate data, for seeking registration for drone-based application of pesticides, their endorsement (label expansion) shall submit an application to the “Technical Committee” headed by the Plant Protection Adviser(PPA), DPPQ&S, through online/ offline mode in the Secretariat of CIB&RC, DPPQ&S by providing the following details:

- Name of the applicant
- Office addresses email and contract details
- Responsible Person for use of drone with Mobile Number contact details, email etc.
- Proposed/actual area of coverage by drone application in each season
- Products proposed/used for drone application
- Crops proposed/ actual covered for drone application
- No. of months/ time interval within which drone applications shall be made.
- Details of existing label claim with conventional application technology;

- Name and address of the Service Provider having following details:
- Full address
- Responsible Person with Mobile Number
- Name/Model of Drone/s to be used
- DGCA License No
- Names of Pilots with their License Nos.
- Any other relevant information

Further, those who have carried out the Spraying activity with drone, while data generation and on commercial scale are to ensure that Spray monitoring data dully filled by the operator/ service provider and submit through email (cibsecy@nic.in) /online portal created for the purpose, with-in seven days of actual use of Drone for application of pesticides, in the form as prescribed in Annexure-II;

The technical committee constituted by the Central Insecticide Board will then examine the proposal for its consideration /approval or otherwise in line with the directions issued by the CIB from time to time.

Guidelines for Registration requirements of pesticides for drone application:

The applicant may apply for seeking registration for drone-based application of pesticides and the endorsement (label expansion) related approvals under the relevant provisions/category to the secretariat of the CIB&RC as per the Guidelines and procedure approved by the RC from time to time (Annexure-III).

Endorsement

This Standard Operating Procedure (SOP) for use of Drone application with pesticides for crop protection in agricultural, forestry, non-cropped areas, is prepared by the committee constituted vide O.M. No 13-15/2020- M&T (I&P), dated 31st of March, 2021 under the chairmanship of Plant Protection Adviser, Directorate of Plant Protection, Quarantine & Storage, Faridabad, for undertaking safe and effective control of Pest and diseases by Drone application with pesticides through aerial spraying. This SOP will render guidance to the stakeholders/ pilot/operators/ users/regulators while undertaking safe and effective control of Pest and diseases by Drone based Pesticide application.

(Dr Ravi Prakash)

Plant Protection Adviser
Directorate of Plant Protection, Quarantine & Storage,
NH-IV, Faridabad-121001 India

1. Objective:

Indian Agriculture has gone through rapid advancements and has benefited from research and adoption of new technologies by farmers. Technologies like drip irrigation, mechanized farming for planting, harvesting and grading are being successfully used for sustainable agriculture in India.

In recent years, use of drone in agriculture has gained prominence and some states are actively engaged in checking the suitability of this new technology in Indian agriculture. Application of pesticides using drones has a great potential as we move towards commercialization and achieving precision in agricultural crops.

Drones are going to be important for increasing efficiency of application of crop protection chemicals by reducing manpower requirement, reducing time of application, reducing volume of water, quantity of chemicals and saving drift to environment along with reducing exposure to human being to hazardous chemicals.

In conventional agricultural practices, pesticides are sprayed either manually or with the help of tractor-mounted sprayers where high quantity of pesticides and water are used and where a sizable portion of spray goes waste in environment. However, drone-based spray requires less amount of water, as well as pesticides, due to better application and bio-efficiency.

To achieve the above stated objectives, Drones as a future technology for pesticide spraying, custom hiring and cooperative use will be encouraged and facilitated by Ministry of Agriculture and Farmers Welfare so that they are widely available and easily accessible to the farmers of the country. Drone as future technology for pesticide spraying are also expected to be linked with Agriculture insurance system for tackling any kind of damage and loss.

The SOP for drone regulation for pesticide application therefore covers important aspects like statutory provisions, flying permissions, area distance restrictions, weight classification, overcrowded areas restriction, drone registration, safety insurance, piloting certification, operation plan, air flight zones, weather conditions, SOPs for pre, post and during operation, emergency handling plan etc.

2. Statutory Provisions:

As per the provisions of the Insecticides Rules 1971, Under the Insecticides Act, 1968 one of the functions of the board (Central Insecticides Board) constituted under section 4 of the Act, is to specify the uses of the classification of insecticides on the basis of their toxicity as well as their being suitable for aerial application [Rule 3 (b)].

Further, as per Insecticide Rules 1971, Chapter VIII Rule 43 on Aerial Spraying Operations, the aerial application of Insecticide shall be applicable for pesticide application through drones subject to the following provisions:

- a. marking of the area shall be the responsibility of the operators;
 - b. the operators shall use only approved insecticides and their formulations at approved concentration and height;
 - c. washing decontamination and first-aid facilities shall be provided by the operators;
 - d. All aerial operations shall be notified to the public not less than twenty-four hours in advance through competent authorities (written intimation to be sent to the Executive Officer of the respective Gram Panchayat & Panchayat Samiti, as well as the concerned Agriculture Officer of the area, at least 24 hours in advance).
 - e. Animals and persons not connected with the operations shall be prevented from entering such areas for a specific period; and
 - f. The pilots shall undergo specialization training including clinical effects of the insecticides (details on Pilot Training are given at point no.5.4 of this SOP).
- 3.** The drone operations are being permitted by Ministry of Civil Aviation (M/o CA) and Director General of Civil Aviation (DGCA) through the conditional exemption route. New drone directorates have been established in DGCA recently to speed up the approval process. They have published a detailed DGCA Requirements for Operation of Civil Remotely Piloted Aircraft System (RPAS) Guidance Manual with an objective to acquaint the public and the industry with the procedures being followed for processing all matter pertaining to issue of unique identification number, unmanned aircraft operator permit, and related activities. It will help understand the flow of various processes involved and understand the intricacies of the system.

Further, Requirements for Operation of Civil Remotely Piloted Aircraft System (RPAS) mentions about the Civil Aviation Requirements (CAR) issued under the provisions of Rule 15A and Rule 133A of the Aircraft Rules, 1937 under the Aircraft Act, 1934 (22 of 1934) and lays down requirements for obtaining Unique Identification Number (UIN), Unmanned Aircraft Operator Permit (UAOP) and other operational requirements for civil Remotely Piloted Aircraft System (RPAS). These operations of drones are regulated by Unmanned Aircraft System (UAS) Rules, 2021, as published by Ministry of Civil Aviation vide G.S.R. 589(E) dated 25th August, 2021. Operators have the flexibility to utilize any RPAS/drone in case of agricultural pesticide spraying, irrespective of weight category or use case, provided the discharge of substance is cleared and mentioned in the Unmanned Aircraft Operator Permit (UAOP) issued by the DGCA.

- xix. Don't fly drone over groups of people, public events, or stadiums full of people without permission
- xx. Don't fly drone over government facilities/military bases or over/ near any no-drone zones.
- xxi. Don't fly drone over private property unless permission is given.
- xxii. Don't fly drone in controlled airspace near airports without filing flight plan or AAI/ADC permission (at least 24 hours before actual operation).
- xxiii. Don't drop or carry hazardous material
- xxiv. Don't fly drone from a moving vehicle, ship or aircraft.
- xxv. Don't fly the Drone in contraventions to the Unmanned Aircraft System Rules (UAS), 2021 rules as published by Ministry of Civil Aviation vide G.S.R. 589(E) dated 25th August, 2021 and as amended from time to time.

4.2. During Application:

- i. Read labels carefully to understand safety guidance.
- ii. Wear Personal Protect Equipment (PPE).
- iii. Do not eat, drink or smoke while spraying.
- iv. Confirm the flying route was reasonable to minimize turn around.
- v. Operation team shall always stay at the downwind end of the field and backlight direction.
- vi. Spray with pure water first to test operation for at least 5 minutes wherever feasible and required.
- vii. Ensure two-step dilutions to fully dissolve the pesticide.
- viii. Adopt proper pressure for optimized droplet spectrum ($>100\mu\text{m}$).
- ix. Check weather conditions for:
 - a. Appropriate Wind speed,
 - b. Appropriate Temperature,
 - c. Appropriate Humidity
- x. Ensure appropriate flying height above target crop.
- xi. Ensure appropriate water volume.
- xii. Ensure appropriate flying speed.
- xiii. Avoid having to walk through crop which has been contaminated by drifting spray.
- xiv. Do not spray during active bee foraging period of the day. Avoid spray drift to flowering nectar crop.
- xv. When spraying pesticides that are toxic to non-target organisms such as fish, birds and silkworm, strictly abide by the product label requirements and take effective measures to avoid risks.
- xvi. Use anti-drift nozzle to decrease drift to human and environment.

4.3. Post Application:

- i. Timely evacuation and transfer to fresh air.
- ii. Triple rinse of empty container is mandatory.
- iii. Ensure waste generated is kept to a minimum.
- iv. The disposal of waste must conform to the local laws.
- v. Never burn or bury hazardous waste.

- vi. Never leave empty containers in the field. It should be disposed of as per the Insecticides Rule 1971.
- vii. Set up warning signs in the spray area for reminding people.
- viii. Take a shower and put on clean clothes.
- ix. To prevent leakage of plant protection products in the process of transport and waiting to use.
- x. Securely store plant protection products away from unauthorized people, animals and food when transporting and storing PPP. Safely dispose all spills immediately.
- xi. Follow the maintenance schedule as prescribed by the Drone manufactures.

5. Critical parameters to be considered for Drone based pesticide application:

5.1. Drone related:

- i. Only Director General of Civil Aviation (DGCA) certified/approved drone shall be permitted to carry-out agriculture spray. The reliability of the drone is assured through DGCA certification process.
- ii. The drone must have capability to handle variable payload (depleting tank). The nozzle system should be attached in a manner that the spray swath is continuous when sprayed from the minimum permitted height above the uniformly distributed crop (e.g. paddy/sugarcane).
- iii. The drone must be fitted with accurate altitude sensor to ensure desired height above the crop is maintained throughout the spraying mission.
- iv. The GPS accuracy of the drone and accuracy of the map shall be characterized and the same shall be utilized to define the safety/buffer margin while creating the geo-fencing around the field or obstacles.
- v. The drone spray system must support variable flow control to ensure uniform dispensing of the payload.
- vi. The drone must have necessary fail-safes including Return to Home (RTH) on empty tank and auto mission restart from the point RTH was engaged.
- vii. The drone spray system should be leak proof and dripping of Pesticides/Insecticides should be avoided during the application. (Check before flight)

5.2. Pesticides/Insecticides

- i. Only Central Insecticides Board and Registration Committee (CIB&RC) approved Pesticides/Insecticides shall be used.
- ii. The dose has to remain within the range approved by CIB&RC.
- iii. The Pesticides/Insecticides (liquid/solid) compatibility with the drone spray system shall be established prior to the mission for the desired dilution. This is to ensure Pesticides/Insecticides solubility formulation stability and ability to spray with the type of

nozzles provided in the drone. In case of mixing of more than one Pesticides / Insecticides, CIB&RC specified guidelines must be adhered to.

- iv. The minimum dilution shall be decided based on the fulfilment of the above-mentioned requirements and ensuring satisfactory coverage of sprayed input both horizontally and vertically.
- v. Pesticides/Insecticides should be diluted only with clean water wherever applicable or with other suitable ingredient as has been approved by the CIB&RC.

5.3.Environment Limitations

The drone based spray should be undertaken and may be permitted under the conducive weather conditions to get the best results in terms of appropriate Wind speed, Temperature& Relative Humidity etc.

5.4. Pilot Training

- i. Only DGCA certified pilots shall be permitted to fly the agri drones.
- ii. A training module as devised by NIPHM, Hyderabad encompassing pesticide/ insecticide handling, agri-mission specific operational protocols, and relevant crop protection guidelines shall be made mandatory for pilots operating pesticide/ insecticide spray drones.

5.5.Drift Management -Critical Operational Parameters

Majority of land holdings are small and there are possibilities of spray drift to the nearby crop fields while spraying with drones. To minimize the spray drift, apart from wind limitation, the following are important and to be suitably adopted:

- i. Spray height above crop canopy
- ii. Speed of the drone
- iii. Suitable nozzles and Droplet size
- iv. A buffer zone can be demarcated (geo fenced)
- v. Spray schedule should be at appropriate time gap either before rainfall or after rainfall.
- vi. Others, as specified in guidelines issued by CIB&RC from time to time.

5.6.Safe guarding the non-targets

The non-targets shall be safe guarded by adhering to the following operational protocols:

- i. Buffer zone as per CIB&RC approved guidelines to cater to Pesticides/Insecticides drift, shall be maintained between the adjacent farms or different crops to avoid spray on non-targets.
- ii. During the spray operation operator should always maintain the distance approved by CIB&RC from the drone and avoid windward direction as much as possible.

- iii. No human or animal movement shall be permitted within the farm during and immediately after the spray operations.
- iv. Drone based pesticides spray operations should be conducted at a distance approved by CIB&RC from water bodies, residential areas, fodder crops, public utilities, dairy, poultry etc. and as per DGCA guidelines.

6. Registration requirements of pesticides for drone application:

The Registration requirements of pesticides for drone application and the modalities are dynamic in nature and will be considered based upon the safety, efficacy, statutory and legal requirements and published by the Central Insecticides Board and Registration committee (CIB&RC) from time to time. Drone users shall use only Central Insecticides Board and Registration Committee approved pesticides.

For registration of insecticides/pesticides and for use with drone, the applicant shall apply before Secretariat of CIB&RC, in the manner, as prescribed by CIB&RC under the Insecticides Act, 1968.

7. Spray Monitoring Form& Data Submission:

Spray monitoring data dully filled by the operator/ service provider shall be submitted through email(as mentioned in the guidelines issued by CIB&RC)/online portal created for the purpose, with-in seven days of application of pesticides through drone, in the form as prescribed in Annexure-I below.
