11.0	Any Other item
11.1	Follow up action of the decision made in 429th RC meeting regarding draft guidelines recommended in the report of the sub-committee to review guidelines for registration of pesticides u/s 9(3b), 9(3) and 9(4).
	RC decided to conduct detailed discussion on draft guidelines recommended in the report of the sub-committee to improve the existing guidelines for registration of pesticides u/s 9(3b), 9(3) and 9(4).

11.2	Consideration of application of M/s Shobika impex applied for grant of registration of Alphacypermethrin incorporated long lasting mosquito bed net 0.58% w/w under section 9(3).
	<p>RC deliberated the agenda and considering that the applicant M/s Shobika Impex had earlier applied for provisional registration of Alphacypermethrin incorporated long lasting mosquito bed net 0.55% w/w under section 9(3B) and their previously submitted Form-1 was also attached at the annexure. The claim was at 0.55% w/w and almost two set of data was submitted, and provisional registration was granted at 0.55% w/w which continued for 5 years with commercialization. Most of the RC members had furnished their views on the revised claim of the applicant to grant him registration of Alphacypermethrin incorporated long lasting mosquito bed net at 0.58% w/w u/s 9(3) and opined that the applicant should be given regular registration at 0.55% w/w as there was no adverse report from the user department National Vector Borne Disease Control Programme, Ministry of Health & Family Welfare which uses it selectively. There is similar application under consideration at 0.55 % w/w and how RC can consider the registration for the same purpose at 2 different level of active ingredients i.e. 0.55 and 0.58 w/w as this will create ambiguity in the absence of any sound scientific justification which applicant could not submit before the RC. This is also pertinent to mention that the RC follows BIS specification wherein the formulations/compounds are given +10% and -5% of leverage which are under 9% of active ingredients. The applicant has quoted +25% and -25% of leverage may affect the quality of LLIN because, if permitted, they may have legitimate right to manufacture LLINs at -25% of the claimed items which have not been tested in Indian circumstances during generating the data to reveal their bio-effectiveness. Pyrethroids are very prone to develop resistance in the target vector (insect) and therefore RC decided to grant registration of Alphacypermethrin incorporated long lasting mosquito bed net at 0.55% w/w u/s 9(3) to M/s Shobika impex.</p>

	<p>RC deliberated the agenda and noted the concerns raised, it further observed that vide (S.O.677 (E) dated 17th July, 2001) the Government has banned the production, marketing and use of Aluminium Phosphide tube packs with a capacity of 10 and 20 tablets of 3 g each of Aluminium Phosphide completely And the State Governments shall have power to take such steps under the relevant provisions of the Act and Rules as they may deem fit for the execution of these Orders in the State concerned.</p> <p>However, RC also observed that recently the Government has published draft rule seeking objection/ suggestions of stakeholders vide GSR 670(E) dated 08.09.2021, wherein the government proposes</p> <p>“after rule 10D, the following rule shall be inserted namely:-</p> <p>(10E) Sale of insecticides through online portal “A licensee, during the currency of license, may undertake sale of any insecticide through online portal for supply of insecticide to the door step of the farmers.
