Implementation of Notification for Restricted use of Glyphosate

RC deliberated the issue and decided that it is required to strengthen and increase the availability of PCO's enabling the safe use of Glyphosate by the farmers -

1. For this a 3-days online/off-line training programme with specified content on Glyphosate use and related safety and efficacy aspects may be designed, and shared with all the stakeholders identified for imparting such trainings.
2. Existing Pest Control Operators (PCOs) to be notified for use of Glyphosate.
3. To achieve the above objective the existing PCO's may also be encouraged to follow the designed training programme and enhance their scope of accreditation apart from MBr and AIP as the case may be.
4. The Insecticides Rule under the Act may require some amendments that may be identified and carried out.
5. Any other step as may be required.

The training curriculum may be consisting of broadly the following: Three days training of Safe and Judicious use of Glyphosate.

CURRICULUM FOR GLYPHOSATE USE TRAINING PROGRAM

Duration: 3 days (Theory + Practical) total =15 hrs

Theory

1. Introduction to Glyphosate and its uses.
2. Physical and chemical properties of Glyphosate herbicide
3. Available formulations of Glyphosate and their mode of action
4. Toxicity classification of Glyphosate including acute and chronic toxicity, carcinogenicity, reproductive effects and fate in the body
5. Environmental fate and ecotoxic studies of Glyphosate

Practical

1. Calculation on dose and quantities of Glyphosate,
2. Calculation on weed control efficiency and weed index
3. Hands on experience on method of application of Glyphosate including type of sprayer, nozzle etc.
4. Do's and Don'ts including the safety precautions and label and leaflet warnings of Glyphosate Application.

Proposed Institutes/ organization for imparting the training programme:

To be provided through State Agriculture Universities (SAU)/Agriculture Colleges, Krishi Vigyan Kendras (KVK), ICAR Institutes, IPM Centres, NIPHM, Hyderabad, IIGRI (Indian Grain Research Institute), Hapur, (UP), State Government Identified/Recognized Agencies (Samiti's etc.)

The detailed course curriculum based on the above content will be prepared in consultation with the concerned ICAR/other institutes.

- ii. Separately carcinogenicity study in mice is required.

Toxicity study no. 23: No separate footnote is required because feeding and metabolism study can be done together. Some metabolites can be more harmful than parent compound even in very small quantity due to bio-activation, so it can be conditional requirement, depending on case to case basis.

Toxicity study no. 24: Pharmacokinetics and metabolism in other mammals and its similarities or differences from humans ##: Peer reviewed International literature is also acceptable in this toxicity study

- 1) **Technical (TI and TIM) u/s 9(3b) and 9(3):-** In case of Technical, name and Percentage of relevant and toxic impurities and /or metabolites should be indicated. Also data /information should be provided about their toxicity)
- 2) **Technical u/s 9(3):-**
 - a. **TI u/s 9(3):-**In case of Technical Import, data from Sl.No.1 to35 are required.
 - b. **TIM u/s 9(3):-**In case of Technical Indigenous Manufacture, data of Sl. No. 33 and S. No. 34 are not required.
- 3) **Technical Import from new Source u/s 9(3):-** Data on parameters 1 to 11;21, 32-33 and 35 is required.
- 4) **Technical Indigenous Manufacture u/s 9(3)**in case same technical is registered for import or formulation made from the same technical is registered for import or indigenous manufacture:
 - I. If impurities are identified, quantified and impurities are within limits (i.e. within maximum of already registered technical), then data on parameters 1-6 and 21 is required.
 - II. In case impurities which are not toxic and not relevant and are not within maximum limits of registered technical however are within +3%) and no new impurity is there, then same data as above (Parameters 1to6 and 21) will be required.

III. If impurities are identified, quantified and are not within limits of registered technical or if impurities are not within+3%) and/or any additional impurity is present then in addition to the tests as indicated in (4) above, additional tests based on the nature and quantity of impurity and QSAR alert will be taken on case to case basis.

- 5) **Technical indigenous manufacture u/s 9(3) in case same technical is registered for import or formulation made from the same technical is registered for import BY THE SAME APPLICANT WITH SAME COMPOSITION, PROCESS OF MANUFACTURE ETC.:- Data on Ames Test only is required.**
- 6) **9(4) TIM:-**In case of Technical indigenous Manufacture u/s 9(4), data on Sl. No. 21 data of @ AMES Test (Tier-I) is required. (Only AMES test is required)
- 7) **Formulation u/s 9(3b):** Data as per FIM u/s 9(3b) required as indicated in table above.
- 8) **Formulation u/s 9(3):-** For FIM:- as indicated in table except data of Sl. No. 33 and S. No. 34 are not required.
- 9) **In case of FI-WRT (Formulation Import without registering Technical) OR FIM WRT (Formulation Indigenous Manufacture without registering Technical):-** in addition to data on formulation, complete toxicity data on technical as per the guidelines of TI, or TIM (as the case may be) should also be submitted.
- 10) **9(4) TI/FIM:-** No data is required, in case of Technical Import (TI) or Formulation Indigenous Manufacture (FIM) u/s 9(4) application.
- 11) **For LLIN:** Acute toxicity studies (Six pack) i.e. S.No. 1 to 6 is required with Premix and health monitoring studies in users as per approved protocol is required with final product (LLIN).
- 12) **MUP:**
 - a) Data on the parameters from S.No. 1 to 6, should be submitted.
 - b) If the Technical grade pesticide from which MUP is to be prepared is not registered, complete data with respect to product Chemistry (along with sample and reference standard of technical grade pesticide and impurities), Bioefficacy, Toxicity and Packaging as per the applicable guidelines for registration of technical should be submitted.
- 13) **Household Pesticide Formulations:**
 - a) Data on the parameters from S.No.1 to 6, should be submitted for pesticides in Solid & Liquid form. In case of Pesticides in Vapour form or which emits vapour/ fumes, in addition to parameters from S.No. 1 to 6, Health monitoring study of the user by using the household pesticides in its actual use should also be submitted. The study should be as per the protocol approved by the RC.
 - b) Data on household pesticides formulation shall be considered along with the data on technical grade pesticides and not in isolation.
- 14) **Pesticide Formulation for use in Public Health:** Data on the parameters from S. No. 1 to 6, 26, 27& 29 should be submitted. Recommendations from National Vector Disease Control Program, M/o Health & Family Welfare are also required.
- 15) **Formulation for use for Aircraft Disinfection:** If the technical grade is duly registered as per guidelines of the Registration Committee, data on the parameters from S.No.1 to 6 should be submitted.
- 16) **Herbicides in twin pack with no other herbicide or with surfactant:** MSDS and Acute toxicity information on surfactant should be submitted along with data on herbicide formulation.

***REFER TO GUIDANCE DOCUMENT ON TOXICOLOGY FOR REGISTRATION OF CHEMICAL PESTICIDES IN INDIA.**

** In Mutagenicity test; an Ames test, any two *in-vitro* and one *in-vivo* Mutagenicity tests are required.

#Repeated Dose Inhalation toxicity Study for 90daysexposurewouldberequiredifthereislikelihoodof significant repeated inhalation exposure as in case of gas, vapours , aerosols, fumigants or likely duration of human exposure viainhalation is longviz. Mosquito coils; sprays used repeatedly.

Note: The general recommendations as mentioned in the Guidance Document on Toxicology for registration of Chemical Pesticides in India will be applicable on the basis of merit case to case basis.

Waiver would be considered only when existing information provides robust and full scientifically sound weight of evidence approach and read across/bridging from structurally and /or biologically related similar pesticides specifically case to case basis on full merits.

The replacement alternatives not involving experiments on animals would not be normally considered, except in exceptional and rare cases where in case of alternatives if available with full and sound justification is provided specifically case to case basis on merit subject to full satisfaction of the expert regarding full toxicity data provided for the alternatives.
