10.0	<u>Miscellaneous</u>
10.1	Consolidated Pendency Report relating applications for registration in CIB&RC.
	RC Noted.
10.2	Compliance with the Order dated 12.06.2026 of the Hon'ble Revisional Authority regarding re-examination of the issues raised w.r.t the application of M/s Agrow Allied ventures Private Limited for grant of registration for indigenous manufacture of Fluxametamide Technical 93.5 % min. u/s 9(3) TIM vs TI of the Insecticides Act, 1968.
	RC perused the Order dated 12.06.2026 passed by the Hon'ble Revisional Authority whereas the matter had been remanded by the Hon'ble

	Revisional Authority for a limited review of the issues relating to the manufacturing process, impurity profile and any potential toxicological implications arising therefrom. RC also perused the letter dated 22.06.2026 from M/s Godrej Agrovet Ltd. The Committee was apprised that, in compliance with the directions of the Hon'ble Revisional Authority, the complete chemistry dossier and all documents available on record were re-examined. The Committee noted that the applicant had submitted the requisite documents prescribed under the extant TIM vs. TI Guidelines, including the list of raw materials and intermediates with source of supply, stepwise manufacturing process, chemical equations, flow sheet diagram from raw materials to the final technical product, effluent treatment method, specifications, method of analysis, impurity profile and supporting analytical data. The Committee further noted that chemical equivalence had already been established with the registered source, M/s Godrej Agrovet Limited, and that the chemical composition, specifications and impurity limits submitted by the applicant were identical to those of the registered source. The Committee also noted that an in-process sample drawn during inspection by officers of the Directorate had been tested by the Central Insecticides Laboratory (CIL) and found to conform to the submitted specifications. The CIL analysis did not reveal any unidentified impurity or any additional impurity having any toxicological concern. The reported impurity profile was within the prescribed limits and no toxicologically significant impurity arising from the disclosed manufacturing process was detected. The Committee further deliberated upon the concerns raised before the Hon'ble Revisional Authority regarding the manufacturing process and the possible formation of toxicologically significant impurities. After examining the chemistry dossier, impurity profile, CIL analytical report and other material available on record, the Committee observed that no chemistry-related deficiency or safety concern has been established. The available data do not indicate the formation or presence of any additional toxicologically significant impurity under the disclosed manufacturing process.
--	--

	The RC also noted that the petitioner's contention regarding the use of chloroform during the manufacturing process, including the alleged possibility of the formation of isocyanides and its derivatives or any other additional impurities arising therefrom, is not revealed from the technical dossier or the reports available on record. The Committee observed that no such concerns are reflected in the technical documentation or analytical reports submitted by the applicant or generated by the Central Insecticides Laboratory. Accordingly, the RC found no merit or substance in the averments made by the petitioner in this regard. Accordingly, the Registration Committee, after thorough re-examination of the matter in compliance with the Order dated 12.06.2026 of the Hon'ble Revisional Authority and considering the available material on records, found no reason to interfere with its earlier decision taken in the 470th RC Meeting under Agenda Item No. 6.54, to grant registration for the indigenous manufacture of Fluxametamide Technical 93.5% Min. under Section 9(3) of the Insecticides Act, 1968, in the TIM vs. TI category, to M/s Agrow Allied Ventures Private Limited. The Committee, therefore, decided to uphold its earlier decision for grant of registration for indigenous manufacture of Fluxametamide Technical 93.5% Min. under Section 9(3) (TIM vs TI) to M/s Agrow Allied Ventures Private Limited, with a provisional shelf life of two years based on Accelerated Storage Stability (ASS) data, in accordance with the decision of the 424th RC (Agenda Item No. 10.48). The applicant shall submit real-time shelf-life data within two and a half years from the date of submission of the application, failing which the Registration Certificate shall be deemed cancelled. The existing condition shall continue to form part of the Certificate of Registration. RC directs the Secretary, CIB&RC to communicate this decision to the Hon'ble Revisional Authority and the respective Parties.

	The RC deliberated the agenda and re-iterated its earlier decision regarding of import of CRMs in its 470th meeting vide agenda item No. 10.29. It added the following: 1. It may be noted that Certified Reference Materials (CRMs) which may include banned and/or restricted pesticides are analytical standards used exclusively for testing, calibration, method validation, quality control, and standardization purposes in laboratories. These materials are imported

	and utilized in very small quantities and are not intended for commercial use, formulation, manufacturing, sale, distribution, or field application. Considering their limited quantity and specialized use in analytical and research activities, the Central Insecticides Board & Registration Committee (CIB&RC) has exempted the import of Certified Reference Materials (CRMs) from the requirement of obtaining import permission under the provisions administered by CIB&RC. Stakeholders may therefore import CRMs intended solely for research and development purposes, laboratory testing, calibration, validation, and standardization activities to be carried out in Research and development Laboratories/Centers, testing and calibration laboratories, etc. for testing of pesticides, without obtaining prior import permission from CIB&RC. Keeping this in view, importers are advised to maintain adequate records demonstrating that the imported materials are Certified Reference Materials and are being used exclusively for the aforesaid purposes. For the import of chemicals and laboratory reagents which are included in the schedule of the Insecticides Act, 1968, the RC has directed Secretary, CIB&RC to arrange for a joint meeting with DCPC, DGFT, Customs and FSSAI to gauge the situation, and discuss present issues.
